Beyond Cultural Imperialism

Routledge
This is a provocative piece of scholarship, and it engages an intriguing aspect of postcolonial writing.-Choice "Fawzia Afzal-Khan's excellent book could stand as a

reply to those hostile critics who today attack 'multiculturalism' for reductively politicizing literature. In her trenchant discussion, Afzal-Khan shows just how complex the politics of 'liberation' can be for colonial and postcolonial novelists." -Gerald Graff, University of Chicago "Afzal-Khan's study is a major new

contribution to the related fields of Indian writing in English and post-colonial literatures. Focused primarily on four Indian novelists, its arguments and conclusions are of vital importance to our understanding of the many new literatures from the former British colonies. Through her judicious use of the theoretical constructs of

Frantz Fanon, Fredric Jameson, Edward Said, and others, Afzal-Khan has produced a fresh and compelling interpretation of the Indian-English novel."-Amritjit Singh, Rhode Island College Cultural Imperialism and the Indo-English Novel focuses on the novels of R. K. Narayan, Anita Desai, Kamala Markandaya, and Salman Rushdie and explores the tension in these novels between ideology and the generic fictive strategies that shape ideology or are

shaped by it. Fawzia Afzal-Khan raises the important question of how much the usage of certain ideological strategies actually helps the ex-colonized writer deal effectively with post-colonial and post-independence trauma and whether or not the choice of a particular genre or mode employed by a writer presupposes the extent to which that writer will be successful in challenging the ideological strategies of "containment" perpetuated by most

Western "orientalist" texts and writers. She argues that the formal or generic choices of the four writers studied here reveal that they are using genre as an ideological "strategy of liberation" to help free their peoples and cultures from the hegemonic strategies of "containment" imposed upon them. She concludes that the works studied here constitute an ideological rebuttal of Western writers' denigrating "containment" of non-Western cultures. She also notes that self-

criticism, as implied in Rushdie's works, is not be confused with self-hatred, a theme found in Naipaul's work.

analyzes the nexus of culture and contemporary manifestations of U.S. imperialism. The contributors, established and emerging cultural studies scholars, define culture broadly to include a range of media, literature, and political discourse. They do not

posit September 11, 2001 as the beginning of U.S. belligerence and authoritarianism at home and abroad, but they do provide context for understanding U.S. responses to and uses of that event. Taken together, the essays stress both the continuities and discontinuities embodied in a present-day U.S. imperialism constituted through expressions of millennialism, exceptionalism, technological might, and visions of world

dominance. The contributors address a range of topics, paying particular attention to the dynamics of gender and race. Their essays include a surprising reading of the ostensibly liberal movies *Wag the Dog* and *Three Kings*, an exploration of the rhetoric surrounding the plan to remake the military into a high-tech force less dependent on human bodies, a look at the significance of the popular *Left Behind* series of novels, and an interpretation of the Abu Ghraib prison photos.

They scrutinize the national narrative created to justify the U.S. invasions of Afghanistan and Iraq, the ways that women in those countries have responded to the invasions, the contradictions underlying calls for U.S. humanitarian interventions, and the role of Africa in the U.S. imperial imagination. The volume concludes on a hopeful note, with a look at an emerging anti-imperialist public sphere. Contributors. Omar Dahbour, Ashley Dawson, Cynthia Enloe, Melani

Things Fall Apart UBC Press

Walt Whitman is one of the most innovative and influential American poets of the nineteenth century. Focusing on his masterpiece Leaves of Grass, this book provides a foundation for the study of Whitman as an experimental poet, a radical democrat, and a historical personality in the era of the American Civil War, the growth of

the great cities, and the westward expansion of the United States. Always a controversial and important figure, Whitman continues to attract the admiration of poets, artists, critics, political activists, and readers around the world. Those studying his work for the first time will find this an invaluable book. Alongside close readings of the major texts, chapters on Whitman's biography, the history and culture of his time, and the critical reception of his work provide a

comprehensive understanding of Whitman and of how he has become such a central figure in the American literary canon. Globalization and Culture Peter Lang GmbH, Internationaler Verlag Der Wissenschaften Why Men Rebel was first published in 1970 after a decade of political violence across the world. Forty years later, serious conflicts continue in Africa, Asia and the Middle East. Ted Robert Gurr reintroduces us to his landmark work,

putting it in context with the research it influenced as well as world events. Why Men Rebel remains highly relevant to today's violent and unstable world with its holistic, people-based understanding of the causes of political protest and rebellion. With its close eye on the politics of group identity, this book provides new insight into contemporary security challenges. *Why Men Rebel* University of Chicago Press "... brilliantly original ... brings cultural and post-colonial theory to bear on

 A critical cultural materialist introduction to the study of global entertainment media. In *Global Entertainment Media*, Tanner Mirrlees undertakes an analysis of the ownership, production, distribution, marketing, exhibition and consumption of global films and television shows, with an eye to political economy and

cultural studies. Among other topics, Mirrlees examines: Paradigms of global entertainment media such as cultural imperialism and cultural globalization. The business of entertainment media: the structure of capitalist culture/creative industries (financers, producers, distributors and exhibitors) and trends in the global political economy of entertainment media. The "governance" of global entertainment media: state and inter-state media and cultural

policies and regulations that govern the production, distribution and exhibition of entertainment media and enable or impede its cross-border flow. The new international division of cultural labor (NICL): the cross-border production of entertainment by cultural workers in asymmetrically interdependent media capitals, and economic and cultural concerns surrounding runaway productions and co-productions. The economic motivations and

textual design features of globally popular entertainment forms such as blockbuster event films, TV formats, glocalised lifestyle brands and synergistic media.

The cross-cultural reception and effects of TV shows and films. The World Wide Web, digitization and convergence culture.

Cultural Diversity Versus US Cultural Imperialism: The Film Industry Vintage

In "Cultural Imperialism," John Tomlinson deals with issues ranging from the

ideological effects of imported cultural products, to the process of cultural homogenization, to the nature of cultural autonomy. He examines a number of related discourses: the debate about "media imperialism" the discourse of national cultural identity; the critique of multinational capitalism and the critique of cultural modernity. His analysis reveals major problems in the way in which the idea of cultural, as distinct

from economic or political, imperialism is formulated.

Cultures of United States Imperialism Taylor & Francis

Essay from the year 2006 in the subject Economics - International Economic Relations, grade: 1,3, University of Leipzig, 5 entries in the bibliography, language: English, abstract: Films can be seen as cultural products. To understand international trade of these cultural products it is necessary to reveal how industries and markets

operate and evolve, furthermore analyzing the influence of industry structure, government policies and global economic conditions. International trade allows expanding markets to become certainly larger than the domestic one, as a result the consumer has the possibility to choose within a greater variety of goods and to take advantage from lower prices. Films are part of each culture. But still, films are products, first of all produced and sold in intention to make profits.

What are films? Why do we speak from US Cultural imperialism? What can be regarded as cultural diversity? Which debates and agreements should be focused on when analyzing international trade of films? And finally, why do the U.S. dominate that industry? Which economic factors play a major role in this case? How sustainable is the U.S.? That sounds interesting? These and more questions will be answered within that economic essay. Racism: A Very Short Introduction Berghahn Books

A major contribution to the cultural and literary history of the Victorian age, *Rule of Darkness* maps the complex relationship between Victorian literary forms, genres, and theories and imperialist, racist ideology. Critics and cultural historians have usually regarded the

Empire as being of marginal importance to early and mid-Victorian writers. Patrick Brantlinger asserts that the Empire was central to British culture as a source of ideological and artistic energy, both supported by and lending support to widespread belief in racial superiority, the need to transform "savagery" into "civilization," and the urgency of promoting emigration. *Rule of Darkness* brings together material from public records, memoirs, popular culture, and canonical

literature. Brantlinger explores the influence of the novels of Captain Frederick Marryat, pioneer of British adolescent adventure fiction, and shows the importance of William Makepeace Thackeray's experience of India to his novels. He treats a number of Victorian best sellers previously ignored by literary historians, including the Anglo-Indian writer Philip Meadows Taylor's *Confessions of a Thug* and *Seeta*. Brantlinger situates explorers' narratives and

travelogues by such famous author-adventurers as David Livingstone and Sir Richard Burton in relation to other forms of Victorian and Edwardian prose. Through readings of works by Arthur Conan Doyle, Joseph Conrad, H. Rider Haggard, Rudyard Kipling, John Hobson, and many others, he considers representations of Africa, India, and other non-British parts of the world in both fiction and nonfiction. The most comprehensive study yet of literature and

imperialism in the early and mid-Victorian years, Rule of Darkness offers, in addition, a revisionary interpretation of imperialism as a significant factor in later British cultural history, from the 1880s to World War I. It is essential reading for anyone concerned with Victorian culture and society and, more generally, with the relationship between Victorian writers and imperialism, 'and between racist ideology and patterns of domination in modern history.

 Cultural Sociology: An Introduction is the first dedicated student textbook to address cultural sociology as a legitimate model for sociological thinking and research. Highly renowned authors present a rich overview of major sociological themes and the various empirical applications of cultural sociology. A timely introductory overview to this increasingly significant field which provides invaluable

summaries of key studies and approaches within cultural sociology. Clearly written and designed, with accessible summaries of thematic topics, covering race, class, politics, religion, media, fashion, and music. International experts contribute chapters in their field of research, including a chapter by David Chaney, a founder of cultural sociology. Offers a unified set of theoretical and methodological tools for those wishing to apply a cultural sociological

approach in their work. Global Entertainment Media Manchester University Press. Combining the perspectives of 18 international scholars from Europe and the United States with a critical discussion of the role of culture in international relations, this volume introduces recent trends in the study of Culture and International History. It systematically explores the cultural dimension of international history, mapping existing

approaches and conceptual lenses for the study of cultural factors and thus hopes to sharpen the awareness for the cultural approach to international history among both American and non-American scholars. The first part provides a methodological introduction, explores the cultural underpinnings of foreign policy, and the role of culture in international affairs by reviewing the historiography and examining the meaning of the word culture in the

context of foreign relations. In the second part, contributors analyze culture as a tool of foreign policy. They demonstrate how culture was instrumentalized for diplomatic goals and purposes in different historical periods and world regions. The essays in the third part expand the state-centered view and retrace informal cultural relations among nations and peoples. This exploration of non-state cultural interaction focuses on the role of science, art, religion, and

tourism. The fourth part collects the findings and arguments of part one, two, and three to define a roadmap for further scholarly inquiry. A group of "commentators" survey the preceding essays, place them into a larger research context, and address the question "Where do we go from here?" The last and fifth part presents a selection of primary sources along with individual comments highlighting a new genre of resources scholars interested in culture and international relations can

consult. Imperial Encore Duke University Press Cultures of United States Imperialism represents a major paradigm shift that will remap the field of American Studies. Pointing to a glaring blind spot in the basic premises of the study of American culture, leading critics and theorists in cultural studies, history, anthropology, and literature reveal the "denial of empire" at the heart of American Studies. Challenging traditional definitions and

periodizations of imperialism, this volume shows how international relations reciprocally shape a dominant imperial culture at home and how imperial relations are enacted and contested within the United States. Drawing on a broad range of interpretive practices, these essays range across American history, from European representations of the New World to the mass media spectacle of the Persian Gulf War. The volume breaks down the boundary between the

study of foreign relations and American culture to examine imperialism as an internal process of cultural appropriation and as an external struggle over international power. The contributors explore how the politics of continental and international expansion, conquest, and resistance have shaped the history of American culture just as much as the cultures of those it has dominated. By uncovering the dialectical relationship between American cultures and international

relations, this collection demonstrates the necessity of analyzing imperialism as a political or economic process inseparable from the social relations and cultural representations of gender, race, ethnicity, and class at home. Cultural Imperialism and the Indo-English Novel
 Oxford University Press
 This title was first published in 1976. The attainment of political independence by more

than ninety countries since the Second World War has directed attention to the conditions of economic helplessness and dependency that continue to frustrate the development of at least two-thirds of the world's nations. Two and sometimes three decades of disappointing efforts to extricate themselves from dependency have begun to provoke serious reappraisals in many

lands about the entire concept of development. Accordingly, the time ahead will surely be a period of growing cultural-communications struggle □ intra- and inter - nationally □ between those seeking the end of domination and those striving to maintain it. The intention of this work is to assist, in a very modest way, in the outcome of this struggle.
