This book is a multidisciplinary study of the borderland that intersects the territory of the Polish, Czech, and Slovak languages. Teschen Silesia is a region of transitional language and culture that today is divided between the Czech Republic and Poland. The author examines

the complex historical development of this region and describes the diachronic and synchronic development of the traditional dialect. This work explores the complex relation that links language, culture, social networks, and ethnic consciousness in a Slavic borderland.

"She was given her own plate, her own cup, everything of her own, even when she just touched a cloth then nobody wanted to touch it again." (Halima, HIV-seropositive) The book sheds light on the profound influence of an HIV-seropositive diagnosis on the lives of women and their social environment in the United Republic of Tanzania. The author, a medical doctor and social anthropologist, tells the story of six Tanzanian HIV-seropositive women, focusing on their negotiation and perception of illness and disease. Furthermore, the high levels of discrimination and stigmatization in the context of HIV-seropositivity that they experience are presented in detail, weaving together the impacts of an HIV-seropositive diagnosis with results analyzed both from a Medical Anthropology and Public Health perspective. Despite a new era of antiretroviral treatment, available in Tanzania free of cost, that has given cause for hope in a change in how the disease is perceived, the book impressively underlines that being HIV-seropositive remains a great challenge and heavy burden for women in Tanzania.

Containing more than three hundred poems, including nearly a hundred previously unpublished works, this unique collection showcases the intellectual range of Claude McKay (1889-1948), the Jamaican-born poet and novelist whose life and work were marked by restless travel and steadfast social protest. McKay's first poems were composed in rural Jamaican creole and launched his lifelong commitment to representing everyday black culture from the bottom up. Migrating to New York, he reinvigorated the English sonnet and helped spark the Harlem Renaissance with poems such as "If We Must Die." After coming under scrutiny for his communism, he traveled throughout Europe and North Africa for twelve years and returned to Harlem in 1934, having denounced Stalin's Soviet Union. By then, McKay's pristine "violent sonnets" were giving way to confessional lyrics informed by his newfound Catholicism. McKay's verse eludes easy definition, yet this complete anthology, vividly introduced and carefully annotated by William J. Maxwell, acquaints readers with the full transnational evolution of a major voice in twentieth-century poetry. *Death and the Regeneration of Life* Legare Street Press

Hugh's River Cottage Veg Every Day! became the UK's best-selling vegetable cookbook, persuading us through sheer temptation to make vegetables the mainstay of our daily cooking. In this much-anticipated follow-up, Hugh delivers more irresistible recipes, and this time, takes things one step further. Fuelled by his passionate belief that plant foods should be the dominant force in our kitchens, Hugh has put cheese, butter, cream, eggs, and refined flour and sugar firmly to one side. Instead, he uses veg, fruit, wholegrains, nuts, seeds, spices and cold-pressed oils to explore the length and breadth of what can be achieved with natural, unprocessed plant foods. River Cottage Much More Veg! makes it clear that unadulterated ingredients are the very best building blocks for delicious and healthy meals. In typical Hugh style, the recipes are easy, utterly foolproof and delicious. All but a handful are gluten-free, and at least half the dishes require 20 minutes (or less) hands-on work time. With recipes such as Roast squash and chickpeas with spicy apricot sauce, Blackened cauliflower with pecans and tahini, Spiced beetroot, radicchio and orange traybake, Celeriac and seaweed miso broth, Seared summer cabbage with rosemary, chilli and capers, and Baked celery agrodolce, River Cottage Much More Veg! demonstrates how easy it is to make versatile, plentiful and delicious vegetables the bedrock of your diet.

"Basics of Oncology" provides an easily understood and general overview of the basic medical, scientific and clinical aspects of cancer. Causes, pathology, clinical features, diagnostic investigations, treatments and outcomes are all carefully explained and discussed, both for cancers in general and for the common cancers in individual countries. The reader will thereby be provided with an understanding of how and why people develop cancer, how the body reacts to cancer, what can be done to prevent the disease, and how the various cancers are best diagnosed and treated. The book will serve as a sound basis for the more detailed or specific studies that may be needed in different areas of practice and in different countries. It will be invaluable for students of medicine, nurse oncologists, students of medical sciences and other health professionals in all parts of the world.

It is a classical anthropological paradox that symbols of rebirth and fertility are frequently found in funerary rituals throughout the world. The original essays collected here re-examine this phenomenon through insights from China, India, New Guinea, Latin America, and Africa. The contributors, each a specialist in one of these areas, have worked in close collaboration to produce a genuinely innovative theoretical approach to the study of the symbolism surrounding death, an outline of which is provided in an important introduction by the editors. The major concern of the volume is the way in which funerary rituals dramatically transform the image of life as a dialectic flux involving exchange and transaction, marriage and procreation, into an image of a still, transcendental order in which oppositions such as those between self and other, wife-giver and wife-taker, Brahmin and untouchable, birth and therefore death have been abolished. This transformation often involves a general devaluation of biology, and, particularly, of sexuality, which is contrasted with a more spiritual and controlled source of life. The role of women, who are frequently associated with biological processes, mourning and death pollution, is often predominant in funerary rituals, and in examining this book makes a further contribution to the understanding of the symbolism of gender. The death rituals

and the symbolism of rebirth are also analysed in the context of the political processes of the different societies considered, and it is argued that social order and political organisation may be legitimated through an exploitation of the emotions and biology.

All the characteristics and driving force of The Cleveland Clinic are to be found in this

book on pelvic floor function. The Cleveland Clinic is a group practice founded in 1921 on the principles of cooperation, collaboration, and collegiality. Its founders believed that many physicians working together will discover better solutions to medical problems than physicians working in isolation. They believed that the

combination of disciplines, with their inherent differences in philosophy and skills, will produce a better outcome than might have evolved singularly. The power of the collaborative approach is on full display in this book. The pelvic floor unites three separate organ systems. Before this time, each has been approached individually. Urologists, gynecologists, and

colorectal surgeons are each trained in their own disciplines, and the pelvic floor is subsumed in these larger fields of study. When they combine their focus on the pelvic floor, they bring their unique perspectives and different approaches to a common goal: the relief of pelvic floor syndromes such as incontinence and pelvic organ prolapse.
