Budgeting in the United States Senate

Traditionally, economics training in public finances has focused more on tax than public expenditure issues, and within expenditure, more on policy considerations than the more mundane matters of public expenditure management. For many years, the IMF's Public Expenditure Management Division has answered specific questions raised by fiscal economists on such missions. Based on this experience, these guidelines arose from the need to provide a general overview of the principles and

practices observed in three key aspects of public expenditure management: budget preparation, budget execution, and cash planning. For each aspect of public expenditure management, the guidelines identify separately the differing practices in four groups of countries - the francophone systems, the Commonwealth systems, Latin America, and those in the transition economies. Edited by Barry H. Potter and Jack Diamond, this publication is intended for a general fiscal, or a general budget, advisor interested in the macroeconomic dimension of public expenditure management.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called

“the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say.

Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when

- coworkers push their work on you—then take credit for it
- you accidentally trash-talk someone in an email then hit “reply all”
- you're being micromanaged—or not being managed at all
- you catch a colleague in a lie
- your boss seems unhappy with your work
- your cubemate's loud speakerphone is

making you homicidal
 • you got drunk at the holiday party
 Praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green’s] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author’s friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers’ lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work

experience.”—Library Journal (starred review)
 “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

Government is broke. The 2004 federal deficit is the highest in U.S. history. The states have suffered three years of record shortfalls. Cities, counties, and school districts are laying off policemen and teachers, closing schools, and cutting services. But the fiscal pain won't go away, and the bankrupt ideologies of left and right offer little guidance. The Price of Government presents a radically different approach to budgeting -- one that focuses on buying results for citizens rather than cutting or adding to last year's spending programs. It advocates consolidation, competition, customer choice, and a relentless

focus on results to save millions while improving public services.

"You can't really know anything if you just remember isolated facts. If the facts don't hang together on a latticework of theory, you don't have them in a usable form. You've got to have models in your head." - Charlie Munger, investor, vice chairman of Berkshire Hathaway
The world's greatest problem-solvers, forecasters, and decision-makers all rely on a set of frameworks and shortcuts that help

them cut through complexity and separate good ideas from bad ones. They're called mental models, and you can find them in dense textbooks on psychology, physics, economics, and more. Or, you can just read *Super Thinking*, a fun, illustrated guide to every mental model you could possibly need. How can mental models help you? Well, here are just a few examples...

- If you've ever been overwhelmed by a to-do list that's grown too long, maybe you need the Eisenhower Decision Matrix to help you prioritize.
- Use the 5 Whys model to better understand people's motivations or get to the root cause of a problem.
- Before concluding that your colleague who messes

up your projects is out to sabotage you, consider Hanlon's Razor for an alternative explanation.

- Ever sat through a bad movie just because you paid a lot for the ticket? You might be falling prey to Sunk Cost Fallacy.
- Set up Forcing Functions, like standing meeting or deadlines, to help grease the wheels for changes you want to occur. So, the next time you find yourself faced with a difficult decision or just trying to understand a complex situation, let *Super Thinking* upgrade your brain with mental models.

Project Management beyond Waterfall and Agile U.S. Independent Agencies and Commissions Audits provide essential accountability and transparency over government programs. Given the current challenges facing governments and their programs, the oversight provided through auditing is more critical than ever. Government auditing provides the objective analysis and information needed to make the decisions necessary to help create a better future. The professional standards presented in

this 2018 revision of Government Auditing Standards (known as the Yellow Book) provide a framework for performing high-quality audit work with competence, integrity, objectivity, and independence to provide accountability and to help improve government operations and services. These standards, commonly referred to as generally accepted government auditing standards (GAGAS), provide the foundation for government auditors to lead by example in the areas of independence, transparency, accountability, and quality through the audit process. This revision contains major changes from, and supersedes, the 2011 revision.

This book goes beyond the paint by numbers approach, transcending the "how" of project management to the "what" and "why," which is critical for leaders of change. — Dr. Joel B. Carboni, President and Founder, GPM Global and President, IPMA-USA
Project Management beyond Waterfall and Agile presents a flexible, universal, and integrated three-dimensional model for managing projects, the Customizable and Adaptable Methodology for Managing Projects™ (CAMMPTM). By tailoring and customizing the model to a specific industry or

organization and by adapting it to a function or project classification, this model can be used to manage any project. CAMMPTM can also be used both in a traditional or an Agile environment. CAMMPTM integrates leading concepts on competence, processes, and sustainability. The model's three dimensions are project lifecycle, project management processes, and, finally, competence, sustainability, and best practices. The book explains how to integrate these dimensions to manage a project across the three dimensions and the project stages. CAMMPTM is a stage-gate process, which is vital for project

success. The current state of practice in project management is not sustainable. The root causes of this problem include a lack of standardized processes, missing methods or methodological approaches, and no real organizational system for managing projects. This book introduces a system to address these shortcomings. It focuses on the elements of this system, which is a practical and systematic methodological approach for managing and delivering all types of projects. CAMMPTM integrates the best learning from the various global associations in the field. The book distills the experience and

knowledge of a practitioner working in different roles for more than three decades on various types of projects of all sizes and complexities. It is a practical book by a practitioner writing for practitioners.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both

represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal

considerations into its risk-benefit framework for opioid approval and monitoring.

Grant Budgeting and Finance

Do you work for an organization that depends on receiving grant funds for survival? Do you work for one that gives grants? Have you been in the grants business a long time? Or a relatively short time? Do you plan to work for a grant giving or grant-receiving organization? If you answered "Yes" to any of these questions, this book is written for you. It will

save you money. You will share in professional secrets that, up until now, have not been in print. You will find out more about the roles that others play in the grant-spending process; thus you will have an advantage in dealing with others. You will receive tips for spending grant dollars effectively and will be alerted to obstacles that may prevent you from maximizing grant funds. "Grants programs should be run more efficiently, cut out the organizational 'fat,' and develop better management techniques," a trustee of the Rosenberg Foundation was quoted as saying in the Foundation News recently. In this same issue, a leader of the

Alcoholism Center for Women in Los Angeles told of trimming superfluous grant spending across the board. "We want to provide the same services," she stated. "We're cutting the fat." The topic of the article was California's Proposition 13 and its impact on nonprofit organizations that depend on grant funds for their survival. The June 2019 OMB Circular No. A-11 provides guidance on preparing the FY 2021 Budget and instructions on budget execution. Released in June 2019, it's printed in two volumes. This is Volume I. Your budget submission to OMB should build on the President's commitment to advance the vision of a Federal Government that spends taxpayer dollars more efficiently and effectively and to provide necessary services in support of key National priorities while reducing deficits. OMB looks forward to working closely with you in the coming months to develop a budget request that supports the President's vision. Most of the changes in this update are technical

revisions and clarifications, and the policy requirements are largely unchanged. The summary of changes to the Circular highlights the changes made since last year. This Circular supersedes all previous versions. gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour.
