Penn State Press

"This collection contains  
two plays by Gao Xingjian,  
winner of the Nobel Prize  
for Literature 2000.

Escape was written in  
1989 in the wake of the  
June 4 Student Movement  
in Tiananmen Square in  
Beijing. With the  
publication of the play,  
Gao was expelled from  
the Chinese Communist  
Party, dismissed from his  
state appointment and  
his house in Beijing  
confiscated. Perhaps  
because of this

controversy, Escape has  
become the most  
performed of all of Gao's  
plays: it has been staged  
in Sweden, Germany,  
Belgium, France, Poland,  
Japan, Ivory Coast,  
Tunisia, and Canada.

Wherever it was staged, it  
was given a locally  
relevant interpretation and  
was well received, which  
lends credence to Gao's  
claim of the universality

of the play he describes  
as the tragedy of modern  
man. The Man Who  
Questions Death is the  
latest of Gao's plays. It is  
also one of the most  
exciting and powerful."--  
Jacket.

Chinese University Press  
This volume contains the  
Proceedings of the 50th  
Colloquium Biblicum  
Lovaniense: the 40  
contributions, written in  
English, French and  
German, focus on the  
canons of the Old and  
New Testament as well as  
those of the Bible as a  
whole. The theme is  
studied from a variety of  
historical, hermeneutical  
and biblical-theological  
points of view. Several  
contributions discuss the  
process that resulted in  
the canonical status of  
certain writings, or groups  
of writings, in particular,  
such as the Book of  
Psalms, Ezekiel, the  
Wisdom of Ben Sira, the  
Pauline corpus, Acts and  
the gospels.

As the Ice Age waned,  
Clovis hunter-gatherers  
began to explore and  
colonize the area now  
known as Colorado. Their  
descendants and later  
Paleoindian migrants  
spread throughout  
Colorado's plains and  
mountains, adapting to  
diverse landforms and the  
changing climate. In this  
new volume, Robert H.  
Brunswig and Bonnie L.  
Pitblado assemble experts  
in archaeology,  
paleoecology-climatology,  
and paleofaunal analysis  
to share new discoveries  
about these ancient  
people of Colorado. The  
editors introduce the  
research with scientific  
context. A review of  
seventy-five years of  
Paleoindian archaeology  
in Colorado highlights the  
foundation on which new  
work builds, and a survey  
of Colorado's ancient  
climates and ecologies  
helps readers understand  
Paleoindian settlement  
patterns. Eight essays  
discuss archaeological  
evidence from Plains to  
high Rocky Mountain  
sites. The book offers the  
most thorough analysis to  
date of Dent--the first

Clovis site discovered. Essays on mountain sites show how advances in methodology and technology have allowed scholars to reconstruct settlement patterns and changing lifeways in this challenging environment. Colorado has been home to key moments in human settlement and in the scientific study of our ancient past. Readers interested in the peopling of the New World as well as those passionate about the methods and history of archaeology will find new material and satisfying overviews in this book. Contributors include Rosa Maria Albert, Robert H. Brunswig, Reid A. Bryson, Linda Scott Cummings, James Doerner, Daniel C. Fisher, David L. Fox, Bonnie L. Pitblado, Jeffrey L. Saunders, Todd A. Surovell, R. A. Varney, and Nicole M. Waguespack.

Larousse French English Dictionary Canadian Edition Рипол Классик

This volume, in celebration of Peter Machinist, Hancock Professor of Hebrew and Other Oriental Languages

at Harvard University, includes twenty-eight illuminating essays on ancient Near Eastern history and literature, which focus especially on the intersection of these fields. Contributors include one of Machinist's teachers, several of his students, and numerous colleagues and friends. These essays probe topics for which Machinist's work has often set new standards. And in the spirit of the honoree and his interests, these comparative studies encompass Babel, Bibel, and more. In them, Assyriologists contend with biblical cruxes and biblicists engage Assyriological research, while classicists and Hittitologists participate with considerations of their respective disciplines within a broad cross-cultural context. The volume is a must for anyone committed to the ongoing comparative study of the ancient Near East, and within that framework, the historical study of the Hebrew Bible. 1818-1848 North Atlantic Treaty Organization Resear Rganization Much instrumentation has been developed for imaging the trajectories of elementary particles produced in high energy

collisions. Since 1968, gaseous detectors, beginning with multiwire chambers and drift chambers, have been used for the visualisation of particle trajectories and the imaging of X-rays, neutrons, hard gamma rays, beta rays and ultraviolet photons. This book commemorates the groundbreaking research leading to the evolution of such detectors carried out at CERN by Georges Charpak, Nobel Prizewinner for Physics in 1992. Besides collecting his key papers, the book also includes original linking commentary which sets his work in the context of other worldwide research. Contents: Low Energy Nuclear Physics with Gaseous Detectors: 1950-1959 Detectors with Optical Imaging: 1956-1992 Filmless Spark Chambers: 1962-1967 Wire Chambers and Drift Chambers: 1968-1994 Multistep Avalanche Chambers: 1978-1990 Imaging of Vacuum Ultra Violet Photons. Application to Cerenkov and Gamma Imaging Miscellaneous Detectors: 1962-1994 Applications of Detectors to Biology or Medicine: 1970-1992 Readership: Nuclear

physicists, particle  
physicists and applied  
physicists.
