It's the 10th anniversary of the world's best-selling almanac for kids! This year the Almanac features

all-new content, interviews with explorers in each chapter, a special look at what was going on in the world when the first National Geographic Kids Almanac came out 10 years ago, plus the results of the 2019 Almanac Challenge and a new Challenge for kids who want to get involved with helping our planet. Kids can have fun keeping up with our quickly changing world with the New York Times best-selling almanac, packed with incredible photos, tons of fun facts, crafts, activities,

and fascinating features about animals, science, nature, technology, conservation, and more. There's a whole chapter full of fun and games, including activities, jokes, and comics. Practical reference material, including fast facts and maps of every country, has been fully updated. Homework help on key topics is sprinkled throughout the book. Ecology National Geographic Kids Learn something about everything with 13 mind-blowing facts plus a little

myth-buster about every topic under (and including) the Sun! Exploded images of everyday objects, from cars and skeletons to pianos and chocolate, will take you on an incredible factual adventure. Did you know that one in every four animals on Earth is a beetle? Were you aware that white chocolate isn't technically chocolate? Or that the dwarf planet Pluto is so small that two of it could sit side-by-side across the USA? 131/2 Incredible Things You Need to Know About

Everything includes over 1000 facts on 80 different subjects to satisfy your thirst for knowledge. Familiar objects - the Earth, a tiger, an Apollo spacesuit, a scorpion - are exploded to reveal their extraordinary insides. Surprising myth-busters will give you lots of new favorite facts, such as chameleons change color to stand out not blend in and that on sharks on average only kill 6 people annually while people kill 100 million sharks a year! Awesome images will draw you into 131/2

Incredible Things You Need to Know About Everything and irresistible and fascinating information will keep you there.

2023 has you covered!  
*An Encyclopedia on Every Page* National Geographic Books

Early anthropological evidence for plant use as medicine is 60,000 years old as reported from the Neanderthal grave in Iraq. The importance of plants as medicine is further supported by archeological evidence from Asia and the Middle East. Today, around 1.4 billion people in South Asia alone have no access to modern health care, and rely instead on traditional medicine to

alleviate various symptoms. On a global basis, approximately 50 to 80 thousand plant species are used either natively or as pharmaceutical derivatives for life-threatening conditions that include diabetes, hypertension and cancers. As the demand for plant-based medicine rises, there is an unmet need to investigate the quality, safety and efficacy of these herbals by the “scientific methods”. Current research on drug discovery from medicinal plants involves a

multifaceted approach combining botanical, phytochemical, analytical, and molecular techniques. For instance, high throughput robotic screens have been developed by industry; it is now possible to carry out 50,000 tests per day in the search for compounds, which act on a key enzyme or a subset of receptors. This and other bioassays thus offer hope that one may eventually identify compounds for treating a variety of diseases or conditions. However, drug

development from natural products is not without its problems. Frequent challenges encountered include the procurement of raw materials, the selection and implementation of appropriate high-throughput bioassays, and the scaling-up of preparative procedures. Research scientists should therefore arm themselves with the right tools and knowledge in order to harness the vast potentials of plant-based therapeutics. The main objective of Plant and

Human Health is to serve as a comprehensive guide for this endeavor. Volume 1 highlights how humans from specific areas or cultures use indigenous plants. Despite technological developments, herbal drugs still occupy a preferential place in a majority of the population in the third world and have slowly taken roots as alternative medicine in the West. The integration of modern science with traditional uses of herbal drugs is important for our understanding of this

ethnobotanical relationship. Volume 2 deals with the phytochemical and molecular characterization of herbal medicine. Specifically, it focusses on the secondary metabolic compounds, which afford protection against diseases. Lastly, Volume 3 discusses the physiological mechanisms by which the active ingredients of medicinal plants serve to improve human health. Together this three-volume collection intends to bridge the gap for

herbalists, traditional and modern medical practitioners, and students and researchers in botany and horticulture.

Fascinating, Far-Out, Fun-tastic Facts Centro de Linguística da Universidade de Lisboa - Centro de Línguas, Literaturas e Culturas da universidade de Aveiro Provides the latest information on a wide range of topics, including animals, culture, geography, the environment, history, and science.

Little Kids First Big Book of the World Springer  
Science & Business Media  
The essential annual for the 21st century, this high-energy almanac is packed with facts, photos, infographics, time lines, and maps--the perfect

stocking stuffer and book to browse all year long. A guide to the world like no other, this vivid and comprehensive book offers the best of National Geographic and more: science, nature, history, world cultures, geography, and the environment, illustrated with amazing photography, fascinating infographics, and maps created by expert cartographers. Highlights this year include the

James Webb telescope, launching in 2021; a brand-new wildflower guide; a guided tour of the moons of our solar system; a beautiful infographic on jellyfish; and a feature on lithium, central to the work of recent Nobel prize-winning chemistry. Divided into lively chapters including Exploration & Adventure, Life on Earth, and The Science of Us, this year's almanac features top photos from National

Geographic's celebrated Instagram account and geniuses past and present including Jane Goodall, Amelia Earhart, and acclaimed conservationist Kris Tompkins, dedicated to preserving much of Patagonia. With new discoveries on every page, this cutting-edge book--called a "category buster" by Booklist--brings you, as Publishers Weekly puts it, "all the things that National Geographic does best."
