Anthropological Approaches to Understanding Consumption Patterns and Consumer Behavior

Routledge
 Essentials of Consumer Behavior offers an alternative to traditional textbooks for graduate students. Shorter than competing books, but no less rigorous, it includes unique material on vulnerable consumers and ethics. Balancing a strong academic foundation with a practical approach, Stephens emphasizes that consumer behavior does not simply equate to buyer behavior. She examines the thoughts, feelings, and behaviors that shape consumers' attitudes and motivations in relation to brands, products, and marketing messages. Providing a concise guide to the discipline, the author covers key themes such as vulnerable consumers, new technologies, and collaborative consumption. The book is supported by a rich companion website offering links to videos and podcasts, surveys, quizzes, further readings, and more. It will be a valuable text for any graduate student of consumer behavior or marketing, as well as any interested consumers.

An Introduction to the Economic Theory of Market Behavior Lulu.com

Consumer behaviour is one of the most explored topics in tourism and hospitality marketing, interchangeably denoted by the terms 'traveller behaviour', 'tourist behaviour' or 'guest behaviour'. Consumer behaviour acts as an origin for every tourism and hospitality marketing activity. It offers an understanding of why people tend to choose certain products or services and what sort of factors influence them in making their decision. The decision process of buying tourism products or services takes time, because they are mostly intangible in nature due to which there are many risks involved in their buying process. The Routledge Handbook of Consumer Behaviour in Hospitality and Tourism aims to explore and critically examine current debates, critical reflections of contemporary ideas, controversies and pertinent queries relating to the rapidly expanding discipline of consumer behaviour in hospitality and tourism. The Handbook offers a platform for dialogue across disciplinary and national boundaries and areas of study through its diverse coverage. It is divided into six parts: Part I offers an overview of consumer behaviour; Part II focuses on the service quality perspectives of consumer behaviour; Part III deliberates on customer satisfaction and consumer behaviour linkages; Part IV explores the re-patronage behaviour of consumers; Part V addresses the vital issues concerning online consumer behaviour; and Part VI elaborates upon other emerging paradigms of consumer behaviour. Although there is no dearth of empirical studies on different viewpoints of consumer behaviour, there is a scarcity of literature providing conceptual information. The present Handbook is organised to offer a comprehensive theoretical body of knowledge narrating consumer behaviour, especially for hospitality and tourism businesses and operations. It attempts to fill this research gap by offering a 'globalised' volume comprising chapters organised using both practical and academic approaches. This Handbook is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, International Business and Consumer Behaviour.

Socio-Economic Perspectives on Consumer Engagement and Buying Behavior Woodhead Publishing

The Routledge Companion to Consumer Behavior Analysis provides a unique and eclectic combination of behavioral, cognitive and environmental perspectives to illuminate the real-world complexities of consumer choice in a marketing-oriented economy. Edited by a leading authority in the field, the contributing authors have created a unique anthology for understanding consumer preference by bringing together the very latest research and thinking in consumer behavior analysis. This comprehensive and innovative volume ranges over a broad multi-disciplinary perspective from economic psychology, behavioral psychology and experimental economics, but its chief focus is on the critical evaluation of consumer choice in the natural settings of affluent, marketing-oriented economies. By focussing on human economic and social choices, which involve social exchange, it explores and reveals the enormous potential of consumer behavior analysis to illuminate the role of modern marketing-oriented business organizations in shaping and responding to consumer choice. This will be of particular interest to academics, researchers and advanced students in marketing, consumer behavior, behavior analysis, social psychology, behavioral economics and behavioral psychology.

Social Psychology of Consumer Behavior Springer Science & Business Media

Global Marketing and Advertising Routledge

This pathbreaking volume expands on the construct of psychological ownership, placing it in the contexts of both individual consumer behavior and the wider decision-making of consumer populations. An individual's feeling of ownership toward a target represents the perception that something is "mine!", and is highly relevant to buying and relating to specific goods, economic and health decision-making and, especially salient given today's privacy concerns, psychological ownership of digital content and personal data. Experts analyze the social conditions and cognitive processes concerning shared consumer experiences and psychological ownership. Contributors also discuss possibilities for socially responsible forms of psychological ownership using examples from environmental causes, and the behavioral mechanisms involved when psychological ownership becomes problematic, as in cases of hoarding. Included among the topics: Evidence from young children suggesting that even legal ownership is fundamentally psychological. Ownership, the extended self, and the extended object. Psychological ownership in financial decisions. The intersection of ownership and design. Can consumers perceive collective psychological ownership of an organization? Whose experience is it, anyway? Psychological ownership and enjoyment of shared experiences. Psychological ownership as a facilitator of sustainable behaviors including stewardship. Future research avenues in psychological ownership. Psychological Ownership and Consumer Behavior pinpoints research topics and real-world issues that will define the field in the coming years. It will be especially useful in graduate classes in marketing, consumer behavior, policy interventions, and business psychology.

Principles of Agricultural Economics Routledge

Although opinion leadership has been the subject of numerous studies, in areas ranging from politics to fashion and in many societies and cultures, *The Influentials* represents the first systematic analysis of the concept. It offers a multidisciplinary presentation of the definitions, typologies, methods, and findings of opinion leadership, from its early formulation, through the emergence of the first empirical evidence, to the most recent research. Weimann examines opinion leadership and personal influence in a number of areas, including marketing, public opinion and elections, education, fashion, science, agriculture, and health care. He also examines the growing criticism of the model based on theoretical and empirical weaknesses of the original concept and evaluates for the first time modifications that have emerged, including a new measure (the PS Scale) and its

testing and application. The final chapters for the first time link opinion leadership with the important theoretical and research tradition of agenda setting.

'This is an important, rigorous, and thoroughly engaging text on the economic theory of market behavior. It is unique in the attention devoted to the philosophical underpinnings and the historical background of the Walrasian Theory. Professor Katzner challenges his readers to understand the strengths and the limitations of what has gone before, and he provides guidance as to how he would like to see price theory develop in the future. This is among those rare texts that is designed to inspire further research.' - Hugo Sonnenschein, University of Chicago, US

A number of books on economic psychology have appeared in the past few years. The most recent publications are by MacFadyen and Mac Fadyen (1986), Furnham and Lewis (1986), Lea et al. (1987) and Van Raaij et al. (1988). Why produce yet another book for this discipline? This question can be answered in various ways. In a sense, this book is the answer in itself. Its presentation of research and theories is innovative in this field, at least to my knowledge. It attempts to structure the many theories emerging in the interdisciplinary science of economic psychology and to explain the background of the research. The second answer is pragmatic. In our introductory course of economic psychology for economics students at Erasmus University Rotterdam we used several of the above mentioned books. Our experience with this material is that, when preparing our lectures, we had to explain many additional theories and experiments to our students. Furthermore, diagrams, figures and examples had to be culled from other sources or made by ourselves. It is not my intention to run down these publications since I think they provide an excellent treatment of a number of topics by specialists in economic psychology. The plan for the present book, however, emerged from our need to present an integrated introductory course for our students.

Globalization is a leading force for industry worldwide, especially the new technology sector. This presents both problems and opportunities in the emergence of a new type of consumer and the effects of globalization on industry in terms of culture, economics, marketing, and social issues at every scale from local to global. The main aim of the book is to enhance the reader's knowledge - especially from a multidisciplinary perspective rather than from an individual functional perspective - of international consumer behaviour. It also explores the role of globalization in the evolving world of the new technology sector and provides an overview of the development of international consumer behavior from historical, geographical and social perspectives, while focusing on new technology products and services. Professionals, students and researchers working in the fields of new technologies and information and communication technologies (ICT) as well as specialists of marketing and management are the target audience for this book. At the same time, the book will be pitched at a level so as to also appeal to a more general readership interested in globalization.
