Genocides by the Oppressed Wilfrid Laurier Univ. Press
En 1977, une centaine de familles hmong furent installées au coeur de la forêt guyanaise par l'administration française. Ce livre

présente cette singulière communauté, ses aspirations, ses craintes pour l'avenir, ses conflits internes et ses contradictions, qui entourent notamment l'idée de tradition. Existe-t-il une tradition hmong, une culture authentique. *Le petit pot* Editions L'Harmattan
Discusses the

programs, policies, and laws that affect ethnic minorities in eight countries: Burma, Cambodia, Indonesia, Laos, Malaysia, the Philippines, Thailand, and Viet Nam. Once targeted for intervention, people such as the Orang Asli of Malaysia and the "hill tribes" of Thailand often become the subject of programs aimed at radically changing their lifestyles, which the government views as backward or primitive. Several chapters highlight the tragic consequences of forced resettlement, a common result of these programs.

Désormais légal au Canada, le cannabis sort de l'ombre pour devenir un produit dont

on peut (et doit!) discuter. Le hic est que cette drogue, beaucoup plus complexe que l'alcool, est encore largement méconnue et entourée de mythes et préjugés. Ce petit guide vise à informer les Canadiens sur les aspects pratiques, scientifiques et économiques du cannabis. Sans dramatiser ni banaliser, il cherche à donner l'heure juste en fonction des meilleures connaissances actuelles.

- Comment le cannabis agit-il sur le cerveau et sur le corps?
- Quelles différences y a-t-il entre le fumer en joint, l'inhaler avec un vaporisateur ou le manger dans des biscuits?
- Quels sont les signes dénotant un problème de consommation?

Quelle est la différence entre du pot Harlequin, du Gorilla Glue #4 et du Sour Tsunami ? • Qui tire les ficelles de l'industrie du cannabis? Retrouvez dans les pages de ce livre des informations vérifiées et pertinentes au sujet d'une substance qui suscite à la fois craintes et euphorie.

The Vision Thing Taylor & Francis
How can bitter enemies who have inflicted unspeakable acts of cruelty on each other live together in peace? At a time in history when most organized violence

consists of civil wars and when nations resort to genocidal policies, when horrendous numbers of civilians have been murdered, raped, or expelled from their homes, this book explores the possibility of forgiveness. The contributors to this book draw upon the insights of history, political science, philosophy, and psychology to examine the trauma left in the wake of such actions, using, as examples, numerous case studies from the Holocaust, Russia, Cambodia, Guatemala, South Africa, and even Canada. They consider the fundamental psychological and philosophical issues that have to be confronted, offer insights about

measures that can be taken to facilitate healing, and summarize what has been learned from previous struggles. Dilemmas of Reconciliation is a pioneering effort that explores the extraordinary challenges that must be faced in the aftermath of genocide or barbarous civil wars. How these challenges of reconciliation are faced and resolved will affect not only the victims' ability to go on with their lives but will impact regional stability and, ultimately, world peace.

Contemporary politics goes on at a mythic level. This is the provocative argument put forward in this unique book which results from the collaboration of practising politicians, organisational and political consultants, scholars of mythology and culture, and Jungian analysts from several countries. The first part of the book focuses on leadership and vision, and features a reflection on

myth and leadership by former U.S. Senator Bill Bradley. The second part deals with the way the theme of 'the one and the many' works itself out in politics today. From the perspective of 'the many', there are chapters on factionalism, ethnic strife, genocide and multiculturalism. From the perspective of 'the one', there are chapters on the economic myth and gender politics showing how these bring coherence to today's confused political scene, culminating in the suggestion that the modern political psyche is itself in the midst of a rite of passage. The relevance of the book to the practice and study of politics, mainstream and

marginal, cannot be overemphasised and the book will provide stimulating reading for practitioners and students in these areas as well as for those engaged in psychological work such as therapy, counselling or analysis.

Illness and misfortune
 more broadly are
 ubiquitous; thus,
 healing roles or
 professions are also
 universal. Ironically,
 however, little
 attention has been
 paid to those who heal

or promote wellbeing.
 These come in many
 different guises: in
 some societies, healing
 is highly professional
 and specialized; in
 some cases, it is more
 preventative, in others
 more interventionist.
 Based on rich and
 wide-ranging
 ethnographic data and
 especially written for
 this volume, these
 essays look at how a
 great variety of health
 providers are
 perceived - from
 traditional healers to
 physicians, from
 diviners to nursing
 home providers.
 Conversely, the
 authors also ask how
 healers, or those
 concerned with wider
 matters of well being,
 view themselves and
 to what degree social
 attitudes differ in
 regard to who these
 people are, as well as

their power, prestige and activities. As these essays demonstrate, class, gender, sexuality, ethnicity, or state policy may all play formative roles in shaping the definition of health and wellbeing, how they are delivered, and the character and prestige of those who provide for our health and welfare in society.

La maladie dans la Chine médiévale
Princeton University Press

Why did the twentieth century witness unprecedented organized genocide? Can we learn why genocide is perpetrated by comparing different cases of genocide? Is the Holocaust unique, or does it share causes and features with other cases of state-sponsored mass murder? Can genocide be prevented? Blending gripping narrative with trenchant analysis, Eric Weitz investigates four of the twentieth century's major eruptions of genocide: the Soviet Union under Stalin, Nazi Germany, Cambodia under the Khmer Rouge, and the former Yugoslavia.

Drawing on historical sources as well as trial records, memoirs, novels, and poems, Weitz explains the prevalence of genocide in the twentieth century--and shows how and why it became so systematic and deadly. Weitz depicts the searing brutality of each genocide and traces its origins back to those most powerful categories of the modern world: race and nation. He demonstrates how, in each of the cases, a strong state pursuing utopia promoted a particular mix of extreme national and racial ideologies. In moments of intense crisis, these states targeted certain national and racial groups, believing that only the annihilation of

these "enemies" would enable the dominant group to flourish. And in each instance, large segments of the population were enticed to join in the often ritualistic actions that destroyed their neighbors. This book offers some of the most absorbing accounts ever written of the population purges forever associated with the names Stalin, Hitler, Pol Pot, and Milosevic. A controversial and richly textured comparison of these four modern cases, it identifies the social and political forces that produce genocide. *Cours de langue allemande: traité de prononciation et de lecture, appliqué à l'étude de l'orthographe* Routledge

The horrific torture and execution of hundreds of thousands of Cambodians by Pol Pot's Khmer Rouge during the 1970s is one of the century's major human disasters. David Chandler, a world-renowned historian of Cambodia, examines the Khmer Rouge phenomenon by focusing on one of its key institutions, the secret prison outside Phnom Penh known by the code name "S-21." The facility was an interrogation center where more than 14,000 "enemies" were questioned, tortured, and made to confess to counterrevolutionary crimes. Fewer than a dozen prisoners left S-21 alive. During the Democratic Kampuchea (DK) era, the existence of S-21 was known only to

those inside it and a few high-ranking Khmer Rouge officials. When invading Vietnamese troops discovered the prison in 1979, murdered bodies lay strewn about and instruments of torture were still in place. An extensive archive containing photographs of victims, cadre notebooks, and DK publications was also found. Chandler utilizes evidence from the S-21 archive as well as materials that have surfaced elsewhere in Phnom Penh. He also interviews survivors of S-21 and former workers from the prison. Documenting the violence and terror that took place within S-21 is only part of Chandler's story. Equally important is his attempt to understand

what happened there in terms that might be useful to survivors, historians, and the rest of us. Chandler discusses the "culture of obedience" and its attendant dehumanization, citing parallels between the Khmer Rouge executions and the Moscow Show Trials of the 1930s, Nazi genocide, Indonesian massacres in 1965-66, the Argentine military's use of torture in the 1970s, and the recent mass killings in Bosnia and Rwanda. In each of these instances, Chandler shows how turning victims into "others" in a manner that was systematically devaluing and racist made it easier to mistreat and kill them. More than a chronicle of Khmer Rouge barbarism, *Voices from*

S-21 is also a judicious examination of the psychological dimensions of state-sponsored terrorism that conditions human beings to commit acts of unspeakable brutality.

Voices from S-21

Little Books Publishing
Comprising 11 countries and hundreds of languages from one of the most culturally diverse regions in the world, the chapters in this collection explore a wide range of translation issues. The subject of this volume is set in the contrasted landscapes of mainland peninsulas and maritime archipelagos in Southeast Asia, which, whilst remaining a largely minor area in Asian studies, harbors a wealth of textual heritage that opens to inquiries and new

readings. From the post-Angkor Cambodia, the post-colonial Viantiane, to the ultra-modern Singapore metropolis, translation figures problematically in the modernization of indigenous literatures, criss-crossing chronologically and spatially through different literary landscapes. The peninsular geo-body gives rise to the politics of singularity as seen in the case of the predominant monolingual culture in Thailand, whereas the archipelagic geography such as the thousand islands of Indonesia allows for peculiar types of communication. Translation can also be metaphorized poetically to configure the transference in different scenarios

such as the cases of self-translation in Philippine protest poetry and untranslatability in Vietnamese diasporic writings. The collection also includes intra-regional comparative views on historical and religious terms. This book will appeal to scholars and postgraduate students of translation studies, sociolinguistics, and Southeast Asian studies.
