(Offshore REliability Data) 1 is a data collection programme that has been going on since the early eighties. Reliability data has been collected for some 24,000 offshore equipment units comprising approximately 33,000 failures. The project is supported by ten oil companies; AGIP, BP, Elf, Esso, Norsk Hydro, SAGA, Shell, Statoil, and Total. Analysis of OREDA Data for Maintenance Optimisation OREDA has published six editions of its reliability data handbook in 1984, 1992, 1997, 2002, 2009, and 2015. OREDA divides equipment according to equipment classes and further subdivides those classes by equipment

taxonomy. Explaining the Differences in Mechanical Failure Rates ...
