Why do fewer teenagers in England from disadvantaged backgrounds go to university than young people from better-off families? Once at university, how well do poorer students fare compared with other students - who drops out from university and who gets the best degrees? After university - who secures better jobs and higher pay? What really has been the impact on university entry of the controversial increases in tuition fees in 2006 and 2012, especially for students from poorer families? Is

there no alternative to charging for university places and what do other countries do? What should governments, universities, and schools do to reduce the gaps in university entry and success by family background? And what advice can be given to families and young people themselves deciding between the costs and benefits of university? This book answers these questions using the latest available evidence, drawing on a wealth of data from administrative records of the school and university system and sample surveys of young people and their families. The authors' analysis of the situation in England is set against a background of

evidence for other countries. The book provides much needed dispassionate analysis of issues that are at the forefront of both public policy and popular debate on higher education around the world today.

Drawing on the magnificent collection of fine prints at the Victoria and Albert Museum, London, this vibrant full-color book celebrates the rich diversity of the print as a 20th-century art form. Edvard Munch, Eduardo Paolozzi, Roy Lichtenstein, Andy Warhol, Marc Chagall, Ben Shahn, and Jasper Johns are just a few of the renowned artists whose prints can be found in these pages.

For every year of the 20th century there is a print or set of prints, ranging from an exquisite photogravure of Lincoln Cathedral (1900) to Shroud (2000), a screen print by artist Lee Wagstaff. Every page conveys the innovative possibilities of printmaking that excite the artistic imagination and make this affordable medium so popular with art lovers and collectors.

 Many of our thoughts

and decisions occur without us being conscious of them taking place; connectionism attempts to reveal the internal hidden dynamics that drive the thoughts and actions of both individuals and groups. Connectionist modeling is a radically innovative approach to theorising in psychology, and more recently in the field of social psychology. The connectionist perspective interprets human cognition as a dynamic and adaptive system that learns from its own direct experiences or through indirect communication from others. Social Connectionism offers an overview of the most recent theoretical developments of connectionist models in

social psychology. The volume is divided into four sections, beginning with an introduction and overview of social connectionism. This is followed by chapters on causal attribution, person and group impression formation, and attitudes. Each chapter is followed by simulation exercises that can be carried out using the FIT simulation program; these guided exercises allow the reader to reproduce published results. Social Connectionism will be invaluable to graduate students and researchers primarily in the field of social psychology, but also in cognitive psychology and connectionist modeling.

 BLACK SUN sheds new light on the sources of Nazi ideology by examining its occult roots in the world of myths, symbols, and fantasies. It traces this development from the writings of various mystics in the early 20th century who propagated the mythology of a superior global ideology whose heroes would fight the forces of moral decadence and greed. The book uses rare archival photographs and sources to chronicle how the Nazis used these mythological foundations to develop Nazism as a political religion. While BLACK SUN documents the

nationalist mystical beliefs that infused National Socialism, the book also reveals the disturbing perpetuation of these beliefs among certain political groups today, in Germany and worldwide, reflecting an ongoing search for salvation, inspiration and messianic leaders. This eye-popping expose' juxtaposes the polarization in German national history between an obsession with capturing light in all its symbolic uses in order to battle the "darkness" of the Others. The final lesson that Black Sun implies - and what makes it a provocative and interesting book for a number of audiences, whether scholars and students of history, or iconography- is the danger of not knowing one's own history. In

this sense, the title signals not only the recurrent theme of evil throughout history, but also the need to shed light upon all its manifestations. English Words and Their Background

South Asia Books Proust's Cup of Tea analyzes Proust's reading of various Victorian authors and shows how they contributed to *A la recherche du temps perdu*. This book proves that British literature and art played a fundamental role in Proust's writing process by citing from the manuscript versions of his novel, as well as from his correspondence, essays and the lengthy critical apparatus accompanying his translations of Ruskin. Eells reflects here on why Proust was attracted to Victorian culture, and how he incorporated it into his novel. The works of the

British novelists he was most interested in- Thomas Hardy and George Eliot-address questions of gender which Proust develops in his own work. He builds Sodome et Gomorrhe I, the section of his novel focusing on homosexuality, on a series of explicit citations and guarded allusions to Shakespeare, Darwin, Walter Scott, Oscar Wilde and Robert Louis Stevenson. Eells explores how Proust followed in the pioneering footsteps of those British writers who had ventured beyond the boundaries of conventional sexuality, though he took pains to erase their traces in the definitive version of his work. This study also highlights how Proust made his fictitious

painter Elstir into a master of ambiguity, by modeling his art on Turner, the Pre-Raphaelites and Whistler. Eells shows that Proust drew on Victorian culture in his depiction of sexual ambiguity, arguing that he confounded eroticism and aestheticism in the way he inextricably linked the man-woman figure with British art and literature. As Proust aestheticized male and female homosexuality using references to British art and letters, Eells coins the term 'Anglosexuality' to refer to his characters of the third sex. She defines Anglosexuality as an intersexuality represented through intertextuality, as an artistic sensitivity, an aesthetic stance, and a

new way of seeing.
 Proust's Cup of Tea
