McClelland & Stewart  
Groundbreaking and  
comprehensive, *Driven to*  
*Distraction* has been a  
lifeline to the  
approximately eighteen  
million Americans who are  
thought to have ADHD.  
Now the bestselling book  
is revised and updated  
with current medical  
information for a new  
generation searching for  
answers. Through vivid  
stories and case histories  
of patients—both adults

and children—Hallowell  
and Ratey explore the  
varied forms ADHD takes,  
from hyperactivity to  
daydreaming. They dispel  
common myths, offer  
helpful coping tools, and  
give a thorough  
accounting of all  
treatment options as well  
as tips for dealing with a  
diagnosed child, partner,  
or family member. But  
most importantly, they  
focus on the positives that  
can come with this

“disorder”—including high energy, intuitiveness, creativity, and enthusiasm.

"This collection introduces, theorizes, and illustrates the Writing-Enriched Curriculum (WEC), an approach to integrating relevant writing and communication instruction into diverse departmental curricula. The book organizes into three sections: "The WEC Approach," which tracks WEC's genesis, theorizes

its approach, and explicates the model's component moves; "Accounts of Departmentally-Focused Implementation," which provides examples of the model's adaptive implementation in a range of institutional settings (including large research universities and small liberal arts colleges) and departmental contexts (including those in STEM fields, humanities, social sciences, and arts); and "Extensions and Contextual Variation," which evidences ways in

which WEC extends pre-existing writing initiatives and forges constructive partnerships between idiosyncratic academic departments and programs. Themes taken up in this collection include the transformative potential of engaging academic departments in collectively examining their own tacit and explicit writing values, and ways in which the WEC model's decentralized and iterative processes circumvent factors that have long threatened the

sustainability of writing across the curriculum and writing in the disciplines programming"--  
*Principles and Practice in Second Language Acquisition* Anchor  
World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope

and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart

thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab,

is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than

disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Abrams

A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned.

**The Best We Could Do**

Routledge

Don't miss one of America's top 100 most-loved novels, selected by PBS's The Great American Read. This beloved book by E. B. White, author of *Stuart Little* and *The Trumpet of the Swan*, is a classic of children's literature that is "just about perfect."

Illustrations in this ebook appear in vibrant full color on a full-color device and in rich black-and-white on all other devices. Some Pig. Humble. Radiant. These are the words in *Charlotte's Web*, high up

in Zuckerman's barn. Charlotte's spiderweb tells of her feelings for a little pig named Wilbur, who simply wants a friend. They also express the love of a girl named Fern, who saved Wilbur's life when he was born the runt of his litter. E. B. White's Newbery Honor Book is a tender novel of friendship, love, life, and death that will continue to be enjoyed by generations to come. It contains illustrations by Garth Williams, the acclaimed illustrator of E. B. White's Stuart Little

and Laura Ingalls Wilder's Little House series, among many other books. Whether enjoyed in the classroom or for homeschooling or independent reading, Charlotte's Web is a proven favorite. [Driven to Distraction \(Revised\)](#) Penguin In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end

up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they

avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written

manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

Modern societies set

limits, on everything from how fast motorists can drive to how much waste factory owners can dump in our rivers. But incomes in our deeply unequal world have no limits. Could capping top incomes tackle rising inequality more effectively than conventional approaches? In this engaging book, leading analyst Sam Pizzigati details how egalitarians worldwide are demonstrating that a "maximum wage" could be both economically viable and politically

practical. He shows how, building on local initiatives, governments could use their tax systems to enforce fair income ratios across the board. The ultimate goal? That ought to be, Pizzigati argues, a world without a super rich. He explains why we need to create that world — and how we could speed its creation. *The Fourth Industrial Revolution* The Floating Press  
The Giver, the 1994 Newbery Medal winner, has become one of the most influential novels of

our time. The haunting story centers on twelve-year-old Jonas, who lives in a seemingly ideal, if colorless, world of conformity and contentment. Not until he is given his life assignment as the Receiver of Memory does he begin to understand the dark, complex secrets behind his fragile community. This movie tie-in edition features cover art from the movie and exclusive Q&A with members of the cast, including Taylor Swift, Brenton Thwaites and

Cameron Monaghan. **Rare Air** Createspace

This book is more than a collection of activities or ready-made lesson plans to add to a teaching repertoire. Instead, Goal-Driven Lesson Planning is intended to empower teachers and help them create a principled framework for their teaching—a framework that will shape the varied activities of the ESL classroom into a coherent teaching and learning partnership. After reading

this book, teachers and prospective teachers will be able to articulate their individual teaching philosophies. Goal-Driven Lesson Planning shows readers how to take any piece from English language materials—an assigned text, a random newspaper article, an ESL activity from a website, etc.—and use it to teach students something about language. Readers are walked through the process of reflecting on their role in diagnosing what that “something” is—what students really

need—and planning how to get them there and how to know when they got there in a goal-driven principled manner. This book has chapters on the theory of setting specific language goals for students; how to analyze learner needs (including an initial diagnostic and needs-analysis); templates to use when planning goal-driven English language lessons; explicit instruction on giving corrective feedback; how to recognize and assess student progress; and the

mechanics and logistics that facilitate the goal-driven language classroom.

*As a Driven Leaf* Vintage Canada

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That’s a mistake, says Daniel H.

Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between

what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Great New Writers Spring 2017 Selection ALA 2018 Notable Books Selection An intimate and poignant graphic novel portraying one family's journey from war-torn Vietnam, from debut author Thi Bui. This beautifully illustrated and emotional story is an evocative memoir about the search for a better future and a longing for the past. Exploring the anguish of immigration and the lasting effects that displacement has on a child and her family, Bui documents the story of her family's daring escape

after the fall of South Vietnam in the 1970s, and the difficulties they faced building new lives for themselves. At the heart of Bui's story is a universal struggle: While adjusting to life as a first-time mother, she ultimately discovers what it means to be a parent—the endless sacrifices, the unnoticed gestures, and the depths of unspoken love. Despite how impossible it seems to take on the simultaneous roles of both parent and child, Bui pushes through. With

haunting, poetic writing and breathtaking art, she examines the strength of family, the importance of identity, and the meaning of home. In what Pulitzer Prize-winning novelist Viet Thanh Nguyen calls “a book to break your heart and heal it,” *The Best We Could Do* brings to life Thi Bui's journey of understanding, and provides inspiration to all of those who search for a better future while longing for a simpler past. *I'm Back!* Jason Aronson Driving is a fact of life. We are all spending more and

more time on the road, and traffic is an issue we face everyday. This book will make you think about it in a whole new light. We have always had a passion for cars and driving. Now *Traffic* offers us an exceptionally rich understanding of that passion. Vanderbilt explains why traffic jams form, outlines the unintended consequences of our attempts to engineer safety and even identifies the most common mistakes drivers make in parking lots. Based on exhaustive

research and interviews with driving experts and traffic officials around the globe, *Traffic* gets under the hood of the quotidian activity of driving to uncover the surprisingly complex web of physical, psychological and technical factors that explain how traffic works.

**The Arrival** Penguin  
An instant classic and eerily prescient cultural phenomenon, from “the patron saint of feminist dystopian fiction” (*New York Times*). Now an award-winning Hulu series starring Elizabeth Moss. In

this multi-award-winning, bestselling novel, Margaret Atwood has created a stunning Orwellian vision of the near future. This is the story of Offred, one of the unfortunate “Handmaids” under the new social order who have only one purpose: to breed. In Gilead, where women are prohibited from holding jobs, reading, and forming friendships, Offred’s persistent memories of life in the “time before” and her will to survive are acts of rebellion. Provocative, startling,

prophetic, and with Margaret Atwood’s devastating irony, wit, and acute perceptive powers in full force, *The Handmaid’s Tale* is at once a mordant satire and a dire warning.

*Illinois 2021 Rules of the Road* Grand Central Publishing

Chinese students are the largest international student group in UK universities today, yet little is known about their undergraduate writing and the challenges they face. Drawing on the British Academic Written

English corpus - a large corpus of proficient undergraduate student writing collected in the UK in the early 2000s - this study explores Chinese students' written assignments in English in a range of university disciplines, contrasting these with assignments from British students. The study is supplemented by questionnaire and interview datasets with discipline lecturers, writing tutors and students, and provides a comprehensive picture of the Chinese student writer

today. Theoretically framed through work within academic literacies and lexical priming, the author seeks to explore what we know about Chinese students' writing and to extend these findings to undergraduate writing more generally. In a globalized educational environment, it is important for educators to understand differences in writing styles across the student body, and to move from the widespread deficit model of student writing towards a descriptive model which

embraces different ways of achieving success. Chinese Students' Writing in English will be of value to researchers, EAP tutors, and university lecturers teaching Chinese students in the UK, China, and other English or Chinese-speaking countries.

 chillingly personal and

Another Landmark Book by Rick Warren. You are not an accident. Even before the universe was created, God had you in mind, and he planned you for his purposes. These purposes will extend far beyond the few years you will spend on earth. You were made to last forever! Self-help books often suggest that you try to discover the meaning and purpose of your life by looking within yourself, but Rick Warren says that is the wrong place to

start. You must begin with God, your Creator, and his reasons for creating you. You were made by God and for God, and until you understand that, life will never make sense. This book will help you understand why you are alive and God's amazing plan for you---both here and now, and for eternity. Rick Warren will guide you through a personal 40-day spiritual journey that will transform your answer to life's most important question: What on earth am I here for? Knowing God's purpose for creating

you will reduce your stress, focus your energy, simplify your decisions, give meaning to your life, and, most importantly, prepare you for eternity. The Purpose Driven Life is a blueprint for Christian living in the 21st century-- a lifestyle based on God's

eternal purposes, not cultural values. Using over 1,200 scriptural quotes and references, it challenges the conventional definitions of worship, fellowship, discipleship, ministry, and evangelism. In the

tradition of Oswald Chambers, Rick Warren offers distilled wisdom on the essence of what life is all about. This is a book of hope and challenge that you will read and re-read, and it will be a classic treasured by generations to come.
