Economist Books

From the author of Future Shock, a
striking way out of today's despair . . . a
bracing, optimistic look at our new
potentials. The Third Wave makes
startling sense of the violent changes
now battering our world. Its sweeping
synthesis casts fresh light on our new
forms of marriage and family, on today's
dramatic changes in business and

economics. It explains the role of cults, the new definitions of work, play, love, and success. It points toward new forms of twenty-first-century democracy. Praise for *The Third Wave* “Magnificent . . . an astonishing array of information.”—The Washington Post “Imperishably fresh.”—Business Week “Will mesmerize readers, and rightly so.”—Vogue “Alvin Toffler . . . has written another blockbuster . . . a powerful book.”—The Guardian “Fresh ideas, clearly explained. . . . Toffler has proven again that he is a master.”—United Press International “Toffler has imagination and an ability to think of various future possibilities by transcending prevailing values, assumptions and myths.”—Associated Press “Once you have walked into his

version of the future, you may decide never again to whitewash some of the built-in frailties of the real present.”—Financial Post “Rich, stimulating and basically optimistic . . . will unquestionably aid many to a greater understanding of [today’s] puzzling social changes.”—The Globe & Mail “A detailed breathtakingly bold projection of the social changes required if we are to survive. . . . Toffler’s vision of a democratic, self-sustaining utopia is a brave alternative to recent grim warnings.”—Cosmopolitan *Super Subs* Libraries Unlimited *Uncivilized* is an anthology of Green Anarchy magazine from Eugene Oregon. It collects the uncompromising attack against civilization, technology, the Left that Green Anarchy provided shaped into

a weapon for the next generation of anti-civilization anarchists.

Children's Books in Print, 2007 MIT Press

This collection of essays from international scholars from various disciplines addresses the theme of technological pessimism; the conviction that technology has given us the means not only to achieve unlimited progress, but to destroy ourselves and our most cherished values.

Critique of Economic Reason

University of Toronto Press

This source of information on contemporary American reference works is intended for the library and information community. It has nearly 1600 descriptive and evaluative entries, and reviews material from more than 300 publishers in nearly 500 subject

areas. It should help the user keep abreast of reference publications in all fields, answer everyday questions and build up reference collections.

Into Infinity Crabtree Publishing Company

Technology has shrunk the physical world into a "global village," where we all seem to be connected in an online community worldwide. Yet while we think of platforms such as Twitter and Facebook as accessible to all, in reality, these are commercial entities developed primarily by and for the Western world. Considering how new technologies increasingly shape labor, economics, and politics, these tools often reinforce the inequalities of globalization, rarely

reflecting the perspectives of those at the bottom of the digital divide. This book asks us to reconsider "whose global village" we are shaping with the digital technology revolution today. Sharing stories of collaboration with Native Americans in California and New Mexico, revolutionaries in Egypt, communities in rural India, and others across the world, Ramesh Srinivasan urges us to reimagine what the Internet, mobile phones, or social media platforms may look like when considered from the perspectives of diverse cultures. Such collaboration can pave the way for a people-first approach toward designing and working with new technology worldwide that embraces the realities of communities too often relegated to the margins

Megatech Twenty-First Century Books
This book offers in-depth legal and political analysis concerning the compatibility of the Westphalian state model with globalization and the digital revolution. It explores the concept of democracy in a globalized world, discusses the legitimacy of economic integration in the global market, and presents three case studies (from Brazil, Taiwan and Spain) on the impact of social media on elections. It further entails novel perspectives on the impact of digitalization on national borders, and the role of citizens and experts in the shaping of globalization. A final chapter addresses the extent to which insights gained from the analysis of the abovementioned aspects will need to be considered in efforts to recover from the

current global health and economic crisis.

Children's Books in Print Turtleback
An introduction to the history of the Internet and World Wide Web, how they work, and how they have changed the way people do research, buy merchandise, teach, publish, and communicate.

Control and Freedom Carl Malamud
A work that bridges media archaeology and visual culture studies argues that the Internet has emerged as a mass medium by linking control with freedom and democracy. How has the Internet, a medium that thrives on control, been accepted as a medium of freedom? Why is freedom increasingly indistinguishable from paranoid control? In *Control and Freedom*, Wendy Hui Kyong Chun

explores the current political and technological coupling of freedom with control by tracing the emergence of the Internet as a mass medium. The parallel (and paranoid) myths of the Internet as total freedom/total control, she says, stem from our reduction of political problems into technological ones. Drawing on the theories of Gilles Deleuze and Michel Foucault and analyzing such phenomena as Webcams and face-recognition technology, Chun argues that the relationship between control and freedom in networked contact is experienced and negotiated through sexuality and race. She traces the desire for cyberspace to cyberpunk fiction and maps the transformation of public/private into open/closed. Analyzing "pornocracy," she contends

that it was through cyberporn and the government's attempts to regulate it that the Internet became a marketplace of ideas and commodities. Chun describes the way Internet promoters conflated technological empowerment with racial empowerment and, through close examinations of William Gibson's *Neuromancer* and Mamoru Oshii's *Ghost in the Shell*, she analyzes the management of interactivity in narratives of cyberspace. The Internet's potential for democracy stems not from illusory promises of individual empowerment, Chun argues, but rather from the ways in which it exposes us to others (and to other machines) in ways we cannot control. Using fiber optic networks—light coursing through glass tubes—as metaphor and reality, *Control*

and *Freedom* engages the rich philosophical tradition of light as a figure for knowledge, clarification, surveillance, and discipline, in order to argue that fiber-optic networks physically instantiate, and thus shatter, enlightenment.

Democracy and Globalization New York ; St. Catharines, Ont. : Crabtree Pub.

The exciting frontiers of space aviation are explored in this fascinating book that explains how the space shuttle works, how space stations are currently being constructed, the possibility of "long-stay" colonies, plans for commercial travel into space, and space probes that search beyond the solar system. This title also explores the consequences for society. Full-color illustrations.

Tourism Planning and Destination Marketing New York ; St. Catharines, Ont. : Crabtree Pub.

Our planet is 70% water, much of it unknown. Super Subs explores the latest machines and the people that help reveal the secrets of the oceans.

Fascinating topics include submarines and rescue apparatus, scuba diving, wreck hunters, underwater construction, and living underwater.

In the Absence of the Sacred Springer

This book presents the latest research into the application of information and communication technologies within the travel and tourism sectors. Readers will find insightful contributions on a wide range of topics, including digital marketing, social media and online travel reviews, mobile computing,

augmented and virtual reality, gamification, recommender systems, electronic distribution, online education and learning, and the sharing economy. Particular attention is devoted to the actual and potential impact of big data, and the development and implementation of digital strategies, including digital marketing and the digital economy. In addition to the description of research advances and innovative concepts, a number of informative case studies are presented. The contents of the book are based on the 2018 ENTER eTourism conference, held in Jönköping, Sweden. The volume will appeal to all academics and practitioners with an interest in the most recent developments in eTourism.

Whose Global Village? R. R. Bowker

Adam Smith wrote in a Scotland where Calvinism, Continental natural law theory, Stoic philosophy, and the Newtonian tradition of scientific natural theology were key to the intellectual lives of his contemporaries. But what impact did these ideas have on Smith's system? What was Smith's understanding of nature, divine providence, and theodicy? How was the new discourse of political economy positioned in relation to moral philosophy and theology? In this volume a team of distinguished contributors consider Smith's work in relation to its Scottish Enlightenment religious background, and offer stimulating theological interpretations of his account

of fallible human nature, his providential account of markets, and his invisible hand metaphor. Adam Smith as Theologian it is a pioneering study which will alter our view of Smith and open up new lines of thinking about contemporary economics.

Johannes Gutenberg and the Printing Press Internet

Taking the long view of the big technology trends that will shape our lives and the future of the planet in the decades ahead.

BioTech Univ of Massachusetts Press

This book traces the global circulation of cultures and ideologies from the technological and democratic revolutions of the long nineteenth century to liberal and neoliberal modernity. Focussing on moments of coerced (colonial and

postcolonial) and voluntary contact rather than national boundaries, the author draws attention to the global scope of literatures and geopolitical commodities as actants in world affairs, as in processes of liberalization, democratization, and trade, but also to the distinctiveness of each local environment at its moments of transculturation. Based in extensive experience in collaborative, multilingual, interdisciplinary networks, the book synthesizes existing theoretical scholarship, provides original case studies of world-historical Victorian and modern writers, and articulates a new interdisciplinary methodology for literary studies in a global context. It will be of interest to Victorianists, modernists, comparatists, political theorists,

translators, and scholars of world literatures, world ecology, and globalization.
