...Throughout this lesson, they learn two types of adaptations and how those adaptations affect animals in their environments. Students will: describe the basic survival needs of animals (e.g., air, water, and food). identify adaptations that help animals survive in various environments.
 Adaptations of Animals - SAS - pdesas.org
 Shells of certain animal embryos such as reptiles and birds are examples of adaptation to a terrestrial environment. The hard

shell prevents the embryo from dying by providing physical protection outside of the body.
 Types of Adaptations in Animals - With Examples
 Children research and chart different organisms, their adaptations, and functions. This activity can be used in conjunction with a lesson on animal adaptations, evolution, biomes/habitats, or ecology.
 Animal Adaptations Project -- Worksheet 1 - TeacherVision
 Physical Adaptation: A

characteristic in a plant or in an animal's body that helps it to survive in its environment. Examples are protective coloration (camouflage) and the ability to retain water.
