Between 1981 and 1989 in Wroclaw Poland, in an atmosphere in which dissent was forbidden and martial law a reality, the art-activist Orange Alternative movement developed and deployed their 'socialist sur-realism' in absurd street-painting and large-scale performances comprising tens of thousands of people dressed as dwarves, in an effort to destabilize the Communist government. It worked. Beginning with the 'dialectical painting' of

dwarves onto the patches of white paint all over the city's walls, which uncannily marked the censorship of opposition slogans, the group moved on to both stage happenings and over-enthusiastically embrace official Soviet festivals in a way that transformed both of these into mass expressions of dissent. They illegally restaged the mass spectacle of the storming of the Winter Palace on the anniversary of the October Revolution using their own homemade tanks; organized patriotic gatherings in which anyone waving red flags or wearing red (or eating red borscht, or covering oneself in ketchup) was arrested; and inspired other Orange Alternative groups to appear across the country. Although the group existed to the left of the mainstream opposition of Solidarity, their art was a key, acknowledged factor in the overthrow of the Communist government. Lives of the Orange Men tells the story of the movement's main protagonists,

and is the first stand-alone English-language account of the Orange Alternative, written autobiographically by its central figure, and featuring an appendix of newly-translated key texts including Major's 'Manifesto of Socialist Surrealism', a timeline of every Orange Alternative happening and a new foreword from the Yes Men.

Why were so many religious images and objects broken and damaged in the course of the Reformation? Margaret Aston's magisterial new book charts the conflicting imperatives of destruction and rebuilding throughout the English Reformation from the desecration of images, rails and screens to bells, organs and stained glass windows. She explores the motivations of those who smashed images of the crucifixion in stained glass windows and who pulled down crosses and defaced symbols of the Trinity. She shows that destruction was part of a methodology of religious revolution designed to change people as well as places and to forge in the long term new generations of new believers. Beyond blanked walls and whited windows were beliefs and minds impregnated by new modes of religious learning. Idol-breaking with its emphasis on the treacheries of images fundamentally transformed not only Anglican ways of worship but also of seeing, hearing and remembering.

This book is the first full-length work concerning the restoration and excavations carried out at Qal'at Sem'an in Syria in the twentieth century. It was written by the notable architect and

archaeologist Georges Tchalenko based on his notes, plans, photographs and sketches as he undertook the work in the years before and during the Second World War. Left unpublished at the time of his death during the Lebanese Civil War, it is published here for the first time in the original French with an English translation. The text is richly illustrated throughout and accompanied by a biographical essay by John Tchalenko and an introduction to the historiography of Qal'at Sem'an and Symeon Stylites by Emma Loosley Leeming.

This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

New Perspectives on 2 Enoch: No Longer Slavonic Only presents a collection of papers from the fifth conference of the Enoch Seminar. The conference re-examines 2 Enoch, an early Jewish apocalyptic text previously known to scholars only in its Slavonic translation, in light of recently identified Coptic fragments. This approach helps to advance the understanding of many key issues of this enigmatic and less explored Enochic text. One of the important methodological lessons of the current volume lies in the recognition that the Adamic and Melchizedek traditions, the

mediatorial currents which play an important role in the apocalypse, are central for understanding the symbolic universe of the text. The volume also contains the recently identified Coptic fragments of 2 Enoch, introduced to scholars for the first time during the conference.

*All in the Day's Work: An Autobiography* BRILL

"In the nineteenth century a new type of mystic emerged in Catholic Europe. While cases of stigmatisation had been reported since the thirteenth century, this era witnessed the development of the 'stigmatic': young women who attracted widespread interest thanks to the appearance of physical stigmata. To understand the popularity of these stigmatics we need to regard them as the 'saints' and religious 'celebrities' of their time. With their 'miraculous' bodies, they fit contemporary popular ideas (if not necessarily those of the Church) of what sanctity was. As knowledge about them spread via modern media and their fame became marketable, they developed into religious 'celebrities'"--
