CARLA HESS

A Catalog of Books Represented by Library of Congress Printed Cards Issued to July 31, 1942 Penguin Young Readers Group
 A description of western Africa, with material on the competition between the Dutch and Portuguese for bases on the coast.
Grand dictionnaire universel du XIXe siècle Springer
 This book offers a comprehensive review of the biology of snakes, focusing on Italian species. The snakes of Italy belong to the two families Colubridae and Viperidae, and for each species the systematic classification and chorology including distribution maps are presented. Furthermore, readers will learn how to carry out field studies, how to handle snakes and how to photograph them. The book concludes with a chapter on the iconography of historical Italian snakes and their importance in popular science, and one on myths and legends. This SpringerBriefs volume will appeal to herpetologists and technical staff. The section on

iconography may also be of interest to museum staff.

From a New York Times-bestselling historian comes the story of how the alphabet ordered our world. *A Place for Everything* is the first-ever history of alphabetization, from the Library of Alexandria to Wikipedia. The story of alphabetical order has been shaped by some of history's most compelling characters, such as industrious and enthusiastic early adopter Samuel Pepys and dedicated alphabet champion Denis Diderot. But though even George Washington was a proponent, many others stuck to older forms of classification -- Yale listed its students by their family's social status until 1886. And yet, while the order of the alphabet now rules -- libraries, phone books, reference books, even the order of entry for the teams at the Olympic Games -- it has remained curiously invisible. With abundant inquisitiveness and wry humor, historian Judith Flanders traces the triumph of alphabetical order and offers a compendium of Western knowledge, from A to Z. "Writing in a lively and refreshingly clear American English, Zimmerman provides an uncompromisingly honest and judicious account... of Heidegger's views on technology and his involvement with National Socialism.... One of the most important books on Heidegger in recent years." -- John D. Caputo "... superb..." -- Thomas Sheehan, *The New York Review of Books* "... thorough and complex..." -- Choice "... excellent guide to Heidegger as eco-philosopher." -- *Radical Philosophy* "... engrossing, rich in substance... makes clear Heidegger's importance for the issue of technology, ethics, and politics." -- *Religious Studies Review* The relation between Martin Heidegger's understanding of technology and his affiliation with and conception of National Socialism is the leading idea of this fascinating and revealing book. Zimmerman shows that the key to the relation between Heidegger's philosophy and his politics was his concern with the nature of working and production.

Storia intima dell'umanità Springer

What time is it? Adventure Time™! Explore the magical world of Ooo with Jake the Dog and Finn the Human, along with the Ice King, Princess Bubblegum, Marceline the Vampire Queen, and all your favorite Adventure Time characters, in this New York Times bestselling companion book to Cartoon Network's hit animated series. Written and compiled by the Lord of Evil himself, *The Adventure Time Encyclopaedia* matches the playful, subversive tone of the television series, detailing everything anyone will ever need to know about the postapocalyptic land of Ooo and its inhabitants—secret lore and spells, fun places you should visit and places where you will probably die, whom to marry and whom not to marry, how to make friends and destroy your enemies—plus hand-written marginalia by Finn, Jake, and Marceline. An indispensable guide to the show fans love to watch, this side-splittingly funny love letter to Adventure Time is sure to appeal to readers of all ages. Heck yeah! From the Back Cover: Written by the Lord of Evil Himself, Hunson Abadeer (a.k.a. Marceline the Vampire Queen's dad), to instruct and confound the demonic citizenry of the Nightosphere, *The Adventure Time Encyclopaedia* is perhaps the most dangerous book in history. Although seemingly a guidebook to the Land of Ooo and its postapocalyptic inhabitants, it is in fact an amusing nightmare of literary pitfalls, bombastic brain-boggles, and ancient texts designed to drive the reader mad. Complete with secret lore and wizard spells, fun places you should visit and places where you will probably die, advice on whom to marry and whom not to marry, and how to make friends and destroy your enemies, this volume includes hand-written marginalia by Finn, Jake, and Marceline. Arguably the greatest encyclopaedia ever written since the beginning of the cosmos, it is also an indispensable companion to humans and demons who know what time it is: Adventure Time! Praise for *The Adventure Time Encyclopaedia*: "Even if you're an adult Adventure Time fan, the book will make you feel like you're 10 again." —USA Today's Daily Candy blog "The brand-new Adventure Time Encyclopaedia will tell viewers everything they need to know about the post-apocalyptic magical land and its inhabitants." —Entertainment Weekly's Family Room blog "The . . . Encyclopaedia will appeal to Adventure Time fans who want to delve deeper into the show's mysterious back story and bizarre details." —The Los Angeles Times' Hero Complex blog [Asolando](#) Sagwan Press

This open access book provides new methodological and theoretical insights into temporal reference and its linguistic expression, from a cross-linguistic experimental corpus pragmatics approach. Verbal tenses, in general, and more specifically the categories of tense, grammatical and lexical aspect are treated as cohesion ties contributing to the temporal

coherence of a discourse, as well as to the cognitive temporal coherence of the mental representations built in the language comprehension process. As such, it investigates the phenomenon of temporal reference at the interface between corpus linguistics, theoretical linguistics and pragmatics, experimental pragmatics, psycholinguistics, natural language processing and machine translation.

In Ancient Marbles in Naples in the Eighteenth Century Eloisa Dodero aims at documenting the history of numerous private collections formed in Naples during the 18th century, with particular concern for the "Neapolitan marbles" and the circumstances of their dispersal.

Geology Emerging Springer

Millions have seen the movie and thousands have read the book but few have fully appreciated the mathematics developed by John Nash's beautiful mind. Today Nash's beautiful math has become a universal language for research in the social sciences and has infiltrated the realms of evolutionary biology, neuroscience, and even quantum physics. John Nash won the 1994 Nobel Prize in economics for pioneering research published in the 1950s on a new branch of mathematics known as game theory. At the time of Nash's early work, game theory was briefly popular among some mathematicians and Cold War analysts. But it remained obscure until the 1970s when evolutionary biologists began applying it to their work. In the 1980s economists began to embrace game theory. Since then it has found an ever expanding repertoire of applications among a wide range of scientific disciplines. Today neuroscientists peer into game players' brains, anthropologists play games with people from primitive cultures, biologists use games to explain the evolution of human language, and mathematicians exploit games to better understand social networks. A common thread connecting much of this research is its relevance to the ancient quest for a science of human social behavior, or a Code of Nature, in the spirit of the fictional science of psychohistory described in the famous Foundation novels by the late Isaac Asimov. In *A Beautiful Math*, acclaimed science writer Tom Siegfried describes how game theory links the life sciences, social sciences, and physical sciences in a way that may bring Asimov's dream closer to reality.

"Richard Beere, 1493-1524. Began Edgar Chapel; built crypt under Lady Chapel and dedicated it to St Joseph; built a chapel of the Holy Sepulchre at south end of nave; built the Loretto chapel; added vaulting under central tower and flying buttresses at east

end of choir; built St Benignus' Church and rebuilt Tribunal. Richard Whiting, 1525-1539. Completed Edgar Chapel."-- Wikipedia.

Il vescovo opera etica, politica, sacra in tre parti distinta di monsignor Alessandro Sperelli vescovo di Gubbio dedicata alla santità di n.s. Alessandro 7. Con due indici copiosi, l'vno de' capitoli, l'altro delle materie. Parte prima [-terza] Getty Publications

A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

Heidegger's Confrontation with Modernity BRILL

Dante's classic is presented in the original Italian as well as in a new prose translation, and is accompanied by commentary on the poem's background and allegory.

Catalogue of the London Library Basic Books

The challenge of Periclean Athens to the students of civilizations is unmistakable: the city and its empire reached a level of culture and well-being scarcely paralleled in the history of man elsewhere. And like the characters in a Greek tragedy, the city and its leaders and citizens were busy in their time of glory making provision for their own tragic decline. "I have tried to suggest in general terms," says the author, "the meaning of Periclean Athens, addressing my interpretation to laymen. . . With the increasing mass of specialized research on ancient Athens, it is imperative to catch a general notion of the significance of the whole. . . The result is a picture of a complex society, as any great civilization is bound to be, with its magnificent achievements and its faults." This first volume in The Centers of Civilization Series does indeed give a clear picture of Athenian civilization, its literature, philosophy, and political and judicial writing; its painting, sculpture, architecture, music, and drama; and even the arts of war. Above all, the book suggests to modern readers the supreme importance of decision in all of man's affairs, and the frightful consequences of wrong decision, once it is made.

This book presents strategies and models for cultural heritage enhancement from a multidisciplinary perspective. It discusses identifying historical, current and possible future models for the revival and enhancement of cultural heritage, taking into consideration three factors - respect for the inherited, contemporary and sustainable future development. The goal of the research is to contribute to the enhancement of past cultural heritage renovation and enhancement methods, improve the methods of spatial protection of heritage and contribute to the development of the local community through the use of cultural, and in particular, architectural heritage. Cultural heritage is perceived primarily through conservation, but that comes with limitations. If heritage is perceived and experienced solely through conservation, it becomes a static object. It needs to be made an active subject, which implies life in heritage as well as new purposes and new life for abandoned heritage. Heritage can be considered as a resource that generates revenue for itself and for the sustainability of the local community. To achieve this, it should be developed in accordance with contemporary needs and technological achievements, but on scientifically based and professional criteria and on sustainable models. The research presented in this book is based on the approach of Heritage Urbanism in a combination of experiments (case studies) and theory.

Canon Pietro Casola's Pilgrimage to Jerusalem in the Year

1494 Touring Editore

A comprehensive overview of ancient ambers, the only such book in English, is now revised. First published in 2012, this catalogue presents fifty-six Etruscan, Greek, and Italic carved ambers from the Getty Museum's collection—the second largest body of this material in the United States and one of the most important in the world. The ambers date from about 650 to 300 BC. The catalogue offers full description of the pieces, including typology, style, chronology, condition, and iconography. Each piece is illustrated. The catalogue is preceded by a general introduction to ancient amber (which was also published in 2012 as a stand-alone print volume titled *Amber and the Ancient World*). Through exquisite visual examples and vivid classical texts, this book examines the myths and legends woven around amber—its employment in magic and medicine, its transport and carving, and its incorporation into jewelry, amulets, and other objects of prestige. This publication highlights a group of remarkable amber carvings at the J. Paul Getty Museum.

Bibliography of Map Projections Donzelli Editore

Make Change is a little handbook for creative rebels that want to do big things. With the goal of empowering and equipping anyone to be an agent of change, the handbook positions social and environmental sustainability as an inherent nexus and core driver. Weaving through a stockpile of historic and contemporary theories and practice opportunities, Make Change guides us through an essential exploration of human behaviour, unpacking brain chemistry, psychological, behavioral and social theories to understand existing systems and how we make decisions within them. The author's logic is that through comprehending existing systems, anyone can intervene to affect, influence and disrupt norms and behaviors with human choice and motivators. Make Change provides practical and theoretical grounding that helps readers craft intended interventions, using systems to enable and enact positive world changing outcomes.

Il Cimento Manchester University Press

Since the beginning of human history Mars has been an alluring dream; the stuff of legends, gods, and mystery. The planet most like ours, it has still been thought impossible to reach, let alone explore and inhabit. Now with the advent of a revolutionary new plan, all this has changed. Leading space exploration authority Robert Zubrin has crafted a daring new blueprint, Mars Direct, presented here with illustrations, photographs, and engaging anecdotes. The Case for Mars is not a vision for the far future or one that will cost us impossible billions. It explains step-by-step how we can use present-day technology to send humans to Mars within ten years; actually produce fuel and oxygen on the planet's surface with Martian natural resources; how we can build bases and settlements; and how we can one day "terraform" Mars; a process that can alter the atmosphere of planets and pave the way for sustainable life.

Cohesion, Coherence and Temporal Reference from an Experimental Corpus Pragmatics Perspective Indiana University Press

This book is the result of collaboration between botanists and food chemists, with the purpose of improving the knowledge of the main wild species of traditional use as foods in the Mediterranean area, focus on ethnobotanical aspects, natural production, uses and nutritional aspects. One of the novelties of the book would be the publication of complete food composition tables of more than 40 species, which are not usually included in nutrient databases of foods. Many of the data included comes from the chemical analysis of representative samples of these species and other are compiled from the scientific literature. Since this topic had not been fully studied, this book provides an interesting tool to be used with the purpose of the revalorization

of wild food species, preservation of their traditional uses, and also as alternatives to improve the diversity of modern Mediterranean diets.

The Adventure Time Encyclopaedia (Encyclopedia) K. G. Saur

The early modern period was rife with attempts to re-imagine the world and the human place within it. This volume looks at natural

philosophers, playwrights, historians, and other figures in the period 1500-1700 as a means of accessing the plethora of world models that circulated in Europe during this era.
