From the mid-seventeenth century to the 1830s, successful gentry capitalists created an extensive business empire centered on slavery in the West Indies, but inter-linked with North America, Africa, and Europe. S. D. Smith examines the formation of this British Atlantic World from the perspective of Yorkshire aristocratic families who invested in the West Indies. At the heart of the book lies a case study of the

plantation-owning Lascelles and the commercial and cultural network they created with their associates. The Lascelles exhibited high levels of business innovation and were accomplished risk-takers, overcoming daunting obstacles to make fortunes out of the New World. Dr Smith shows how the family raised themselves first to super-merchant status and then to aristocratic pre-eminence. He also explores the tragic consequences for enslaved Africans with chapters devoted to the slave populations and interracial relations. This widely researched book sheds new light on the networks and the culture of imperialism.

A Joint Meeting of the
Food and Agriculture
Organization of the
United Nations (FAO)
Panel of experts on
Pesticide Residues in
Food and the
Environment and the
World Health
Organization (WHO)
Core assessment
Group on Pesticide
Residues (JMPR) was
held in Geneva,
Switzerland, from 17 to
26 September 2019.
The FAO Panel
Members met in
preparatory sessions
from 12 to 16
September. The
Meeting evaluated 30
pesticides, including
eight new compounds
and three compounds
that were re-evaluated
for toxicity or residues,
or both, within the
periodic review
programme of the
Codex Committee on
Pesticide Residues
(CCPR). The Meeting
established ADIs and
ARfDs, estimated
maximum residue
levels and
recommended them
for use by CCPR, and
estimated supervised
trials median residue
(STMR) and highest
residue (HR) levels as a
basis for estimating
dietary exposures.

Bridges the gap
between nutrition
research and its
practical application to
children with
developmental and
chronic disorders. After

reviewing prenatal and postnatal growth, and the evaluation of nutritional status, the authors provide succinct accounts of a wide range of pediatric disorders that present special nutritional problems. Each chapter is organized to cover biochemical and clinical abnormalities, techniques in nutrition evaluation, nutritional management, and follow-up procedures. Among the diverse conditions covered in this volume are neurogenetic disorders, behavioral disorders, drug toxicity, obesity, cancer, diabetes, and inborn errors of metabolism. A companion study guide is available from the author.
