"The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view ... Unabashed optimism, and unabashed racism, pervades many entries in the 11th, and provide its defining characteristics ... Despite its occasional ugliness, the reputation of the 11th persists today because of the staggering depth of knowledge contained with its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten - except by the historians, scholars"-- The Guardian, <https://www.theguardian.com/books/booksblog/2012/apr/10/encyclopedia-britannica-11th-edition>.

How were Greek texts on the care and medical treatment of the horse transmitted from antiquity to the present day? Using the evidence of Byzantine manuscripts of the veterinary compilation known as the Hippitrica, Anne McCabe traces the journey of the texts from the stables to the medieval scriptorium and ultimately to the printed edition. Surviving manuscripts include both magnificent presentation copies and plain ones intended for use in the field. The Hippitrica is a rich and little-known source of information about horses, medicine, and magic. This book provides a guide to its complex history as well as a host of fascinating details, and includes colour illustrations of a number of manuscript pages.

This comprehensive, fully illustrated Companion answers the need for an in-depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field. The work brings together the myriad strands and the great temporal and spatial breadth of the field into two thematically organized volumes. In twenty-six authoritative and clearly-written essays, this Companion explores the origins, aims, methods and problems of archaeology. Each essay is written by a scholar of international standing and illustrations complement the text.
