"No nation can win a battle without faith," Steve Biko wrote, and as Daniel R. Magaziner demonstrates in *The Law and the Prophets*, the combination of ideological and theological exploration proved a potent force. The 1970s are a decade virtually lost to South African historiography. This span of years bridged the banning and exile of the country's best-known antiapartheid leaders in the early 1960s and the furious protests that erupted after the Soweto uprisings of June 16, 1976.

Scholars thus know that something happened--yet they have only recently begun to explore how and why. *The Law and the Prophets* is an intellectual history of the resistance movement between 1968 and 1977; it follows the formation, early trials, and ultimate dissolution of the Black Consciousness movement. It differs from previous antiapartheid historiography, however, in that it focuses more on ideas than on people and organizations. Its singular contribution is an exploration of the theological turn that South African politics took during this time. Magaziner argues that only by understanding how ideas about race, faith, and selfhood developed and were transformed in this period might we begin to understand the dramatic changes that took place."--Publisher description.

Die Huisgenoot R. R. Bowker

Andrew Jennings, the investigative sports reporter, spent four years delving into the dark side of 'the beautiful game'. The result is this expose of football's world governing body FIFA - a story of racketeering, bribe-taking, election-rigging, illicit trading, and dirty tricks."

Set in nineteenth-century rural Africa, *Fiela's Child* tells the gripping story of Fiela Komoetie and a white, three-year old child, Benjamin, whom she finds crying on her doorstep. For nine years Fiela raises Benjamin as one of her own children. But when census takers discover Benjamin, they send him to an illiterate white family of woodcutters who claim him as their son. What follows is Benjamin's search for his identity and the fundamental changes affecting the white and black families who claim him.

"Everything a novel can be: convincing, thought-provoking, upsetting, unforgettable, and timeless."—Grace Ingoldby, *New Statesman* "Fiela's Child is a parade that broadens and humanizes our understanding of the conflicts still affecting South Africa today."—Francis Levy, *New York Times Book Review* "A powerful creation of time and place with dark threads of destiny and oppression and its roots in the almost Biblical soil of a storyteller's art."—Christopher Wordsworth, *The Guardian* "The characters in the novel live and breathe; and the landscape is so brightly painted that the trees, birds, elephants, and rivers of old South Africa are characters themselves. A book not to miss."—Kirkus Reviews

"A minor classic in its laconic, spare, compelling evocation by a participant of the shifting moods and maneuvers of the most dangerous moment in human history." —Arthur M. Schlesinger, Jr. During the thirteen days in October 1962 when the United States confronted the Soviet Union over its installation of missiles in Cuba, few people shared the behind-the-scenes story as it is told here by the late Senator Robert F. Kennedy. In this unique account, he describes each of the participants during the sometimes hour-to-hour negotiations, with particular attention to the actions and views of his brother, President John F. Kennedy. In a new foreword, the distinguished historian and Kennedy adviser Arthur Schlesinger, Jr., discusses the book's enduring importance and the significance of new information about the crisis that has come to light, especially from the Soviet Union.

Globalisation and Historiography of National Leaders: Symbolic Representations in School Textbooks, the 18th book in the 24-volume book series *Globalisation, Comparative Education and Policy Research*, explores the interrelationship between ideology, national identity, national history and historical heroes, setting it in a global context. Based on this focus, the chapters represent hand-picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes, and draw upon recent studies in the areas of globalisation, history textbooks, and national leaders. A number of researchers have written on the importance of teaching national

history in order to foster national identity and a sense of belonging to a certain society, state, and people among the younger generation. Some nations prefer to create national heroes out of their political leaders who are still in power, and whose lives and reputation are portrayed as being eminently spotless. Using diverse comparative education paradigms from critical theory, social semiotics, and historical-comparative research, the authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization (or silencing) of the preferred national heroes. They provide an informed critique of various historical narratives depicting national leaders and national heroes. The book provides an easily accessible, practical yet scholarly source of information on international concerns in the field of globalisation, history education and policy research. Offering an essential sourcebook of ideas for researchers, history educators, practitioners and policymakers in the fields of globalisation and history education, it also provides a timely overview of current changes in politically correct history education narratives in history textbooks.
