question of theory and practice, imbuing it with a burning political urgency. In *Revolution and Disenchantment* Fadi A. Bardawil re-describes for our present how an earlier generation of revolutionaries, the 1960s Arab New Left, addressed this question. Bardawil excavates the long-lost archive of the Marxist organization Socialist Lebanon and its main theorist, Waddah Charara, who articulated answers in their political practice to fundamental issues confronting revolutionaries worldwide: intellectuals as vectors of revolutionary theory; political organizations as mediators of theory and praxis; and nonemancipatory attachments as impediments to revolutionary practice. Drawing on historical and ethnographic methods and moving beyond familiar reception narratives of Marxist thought in the postcolony, Bardawil engages in "fieldwork in theory" that analyzes how theory seduces intellectuals, cultivates sensibilities, and authorizes political practice. Throughout, Bardawil underscores the resonances and tensions between Arab intellectual traditions and Western critical theory and postcolonial theory, deftly placing intellectuals from those traditions into a much-needed conversation.

Oil palms are ubiquitous—grown in nearly every tropical country, they supply the world with more edible fat than any other plant and play a role in scores of packaged products, from lipstick and soap to margarine and cookies. And as Jonathan E. Robins shows, sweeping social transformations carried the plant around the planet. First brought to the global stage in the holds of slave ships, palm oil became a quintessential commodity in the Industrial Revolution. Imperialists hungry for cheap fat subjugated Africa's oil palm landscapes and the people who worked them. In the twentieth century, the World Bank promulgated oil palm agriculture as a panacea to rural development in Southeast Asia and across the tropics. As plantation companies tore into rainforests, evicting farmers in the name of progress, the oil palm continued its rise to dominance, sparking new controversies over trade, land and labor rights, human health, and the environment. By telling the story of the oil palm across multiple centuries and continents, Robins demonstrates how the fruits of an African palm tree became a key commodity in the story of global capitalism, beginning in the eras of slavery and imperialism, persisting through decolonization, and stretching to the present day.

Through its millennium-long existence, Gaza has often been bitterly disputed while simultaneously and paradoxically enduring prolonged neglect. Jean-Pierre Filiu's book is the first comprehensive history of Gaza in any language. Squeezed between the Negev and Sinai deserts on the one hand and the Mediterranean Sea on the other, Gaza was contested by the Pharaohs, the Persians, the Greeks, the Romans, the Byzantines, the Arabs, the Fatimids, the Mamluks, the Crusaders and the Ottomans. Napoleon had to secure it in 1799 to launch his failed campaign on Palestine. In 1917, the British Empire fought for months to conquer Gaza, before establishing its mandate on Palestine. In 1948, 200,000 Palestinians sought refuge in Gaza, a marginal area neither Israel nor Egypt wanted. Palestinian nationalism grew there, and Gaza has since found itself at the heart of Palestinian history. It is in Gaza that the fedayeen

movement arose from the ruins of Arab nationalism. It is in Gaza that the 1967 Israeli occupation was repeatedly challenged, until the outbreak of the 1987 intifada. And it is in Gaza, in 2007, that the dream of Palestinian statehood appeared to have been shattered by the split between Fatah and Hamas. The endurance of Gaza and the Palestinians make the publication of this history both timely and significant.

Following on from 2015's *Healthcare Reform, Quality and Safety: Perspectives, Participants, Partnerships and Prospects in 30 Countries*, this book encompasses a global perspective on healthcare while shifting the focus from reform to showcasing success stories of healthcare systems worldwide. It provides explanations of why various facets of healthcare systems work well in different contexts and offers the reader alternative models for consideration. The book features contributions from 60 countries, going much further than the common practice of focusing on affluent Western nations, to provide a comprehensive exploration of the success of healthcare systems globally. The majority of literature on health-sector improvement attempts to address the problems within systems, relating the errors that can and do occur, for example, and offering solutions and preventative strategies. This book of country case studies will approach the enhancement of health systems, patient safety and the quality of care in a new and innovative way, comprehensively surveying and synthesizing the success stories of healthcare systems around the world, utilizing Hollnagel's Safety-II approach to acknowledge the importance of exploring what goes right, what works well, and why it works. These success stories may include reference to macro, meso or micro levels of healthcare systems, various sectors (e.g., aged care, acute care or primary care), or specific programs or projects. *Health System Improvement Across the Globe: Success Stories from 60 Countries* is unprecedented in terms of both reach and positive emphasis, and as such will be instrumental in changing ways of thinking about and guiding health-sector improvement.

A New Textbook for Nurses in India vol1.,5/e BI Publications Pvt Ltd

In the Sitapur district of Uttar Pradesh, an agricultural region with high rates of infant mortality, maternal health services are poor while family planning efforts are intensive. By following the daily

lives of women in this setting, the author considers the women's own experiences of birth and infant death, their ways of making-do, and the hierarchies they create and contend with. This book develops an approach to the care that focuses on emotion, domestic spaces, illicit and extra-institutional biomedicine, and household and neighborly relations that these women are able to access. It shows that, as part of the concatenation of affect and access, globalized moralities about reproduction are dependent on ambiguous ideas about caste. Through the unfolding of birth and death, a new vision of "untouchability" emerges that is integral to visions of progress.

This publication was made possible through a bequest from my beloved late wife. United together in this present collection are those works by the author which have not previously appeared in book form. The following are excerpted: *Vorlesungen tiber Differential und Integralrechnung* (Lectures on Differential and Integral Calculus) Vols 1-3, Birkhiiuser Verlag, Basel (1965-1968); *Aufgabensammlung zur Infinitesimalrechnung* (Exercises in Infinitesimal Calculus) Vols 1, 2a, 2b, and 3, Birkhiiuser Verlag, Basel (1967-1977); two issues from *Memorial des Sciences on Conformal Mapping* (written together with C. Gattegno), Gauthier-Villars, Paris (1949); *Solution of Equations in Euclidean and Banach Spaces*, Academic Press, New York (1973); and *Stu dien tiber den Schottkyschen Satz* (Studies on Schottky's Theorem), Wepf & Co., Basel (1931). Where corrections have had to be implemented in the text of certain papers, references to these are made at the conclusion of each paper. In the few instances where this system does not, for technical reasons, seem appropriate, an asterisk in the page margin indicates wherever a correction is necessary and this is then given at the end of the paper. (There is one exception: the corrections to the paper on page 561 are presented on page 722. The works are published in 6 volumes and are arranged under 16 topic headings. Within each heading, the papers are ordered chronologically according to the date of original publication.

This book provides the various concepts of advanced practice nursing and factors related to it as examined by the author for graduate and postgraduate nursing students. The book is divided into three sections: the first section describes India's health system, healthcare challenges, and trends. The challenges and trends are discussed in comparison with other countries worldwide. This section also discusses the training requirements for nurse practitioner in critical care (NPCC) in India and the future

challenges likely to be faced by them. The third section provides details about clinical competencies, leadership qualities, and the importance of research and evidence-based practice (EBP) for NPCC. Learning activities are provided in a few chapters to encourage students for further reading. Sample health assessment format is given for the students to follow in their day-to-day practice as well as a few clinical scenarios are provided for discussion. Different EBP resources for nurse practitioners are also offered which will be beneficial for nursing students as well as students from other healthcare disciplines. This book is a complete guide to all aspects of Advanced Practice Nursing, written and presented as per the requirements of NPCC Course in India. Book has exhaustive coverage to help students to clear concepts. This masterly new work spans an entire epoch in the history of the contemporary Palestinian national movement, from the establishment of Israel in mandate Palestine in 1948, to the PLO-Israel accord of 1993. Contrary to the conventional view that national liberation movements proceed with state-building only after attaining independence, the case of the PLO shows that state-building may shape political institutionalization throughout the previous struggle, even in the absence of an autonomous territorial, economic, and social base. That is the central argument of this insightful study, which traces the political, ideological, and organizational evolution of the PLO and its constituent guerrilla groups. Taking the much-vaunted 'armed struggle' as its connecting theme, it shows how conflict was used to mobilize the mass constituency, assert particular discourses of revolution and nationalism, construct statist institutions, and establish the legitimacy of a new political class and bureaucratic elite. The book draws extensively on PLO archives, official publications and internal documents of the various guerilla groups, and over 400 interviews conducted by the author with the PLO rank-and-file. Its span, primary sources, and conceptual framework make this the definitive work on the subject.
