Teaching U.S. History Using the Internet
Alpha Edition

As students regularly read and perform these age-appropriate texts, they improve decoding, interpretation, fluency, and comprehension.

Handbook of Research in Social Studies Education ASCD

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Using WebQuests in the Social Studies Classroom

International Society for Technology in Education
This Handbook outlines the current state of research in social studies education - a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In

considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field. [Webquests](#) Routledge

The integration of technology in classrooms is rapidly emerging as a way to provide more educational opportunities for students. As virtual learning environments become more popular, evaluating the impact of this technology on student success is vital. *Exploring the Effectiveness of Online Education in K-12 Environments* combines empirical evidence and best practices in current K-12 distance learning and virtual schools. Emphasizing current research and opportunities, this book is an all-inclusive reference source for administrators, teachers, researchers, teacher educators, and policymakers interested in the development and

implementation of blended and electronic learning in primary and secondary education.

Half Mile Down Elsevier

The Petrov Affair: Politics and Espionage is a memoir of the Petrov Affair, a historical event that involves the defection of Vladimir Petrov, a colonel in the Soviet intelligence service in Sydney, and the announcement of his defection ten days later by Australian Prime Minister Robert Menzies. With information gathered from different reliable sources, the book details in chronological order the Petrov's defection - the events that occurred before and the factors that led to it; its announcement; and the implications of this event for politics and espionage. The text also explains how the affair affected the Australian people and the world; the conclusion of this event; and the events that happened after it. The book is recommended for historians and history enthusiasts who would want to know more about this particular event. The text is also recommended for experts who delve in the Cold War and the Soviet Union.

Literacy in the Disciplines Social Studies
Are you ready to break out of the lesson-and-worksheet rut? Use *The EduProtocol Field Guide* to create engaging and effective instruction, build culture, and deliver content to K-12 students in a supportive, creative environment.

How to Be a (Young) Antiracist Guilford Publications

The delivery of quality education to students relies heavily on the actions of an institution's administrative staff. Effective teaching strategies allow for the continued progress of modern educational initiatives. Student Engagement and Participation: Concepts, Methodologies, Tools, and

Applications provides comprehensive research perspectives on the multi-faceted issues of student engagement and involvement within the education sector. Including innovative studies on learning environments, self-regulation, and classroom management, this multi-volume book is an ideal source for educators, professionals, school administrators, researchers, and practitioners in the field of education.

Teaching for Understanding with Technology Routledge

Want to redefine learning? Looking to better utilize devices? Eager to maximize face time in the classroom? HyperDocs are the solution to personalized instruction using technology in today's modern classroom. They provide innovative ways to engage students and package digital lessons on a Google Doc. The HyperDoc Handbook is a practical reference guide for all K-12 educators looking to transform their teaching into blended learning environments. This book strikes a perfect balance between pedagogy and how-to tips, while also providing several lesson plans to get you going. After reading this handbook, educators will feel equipped to design their own HyperDocs using both Google Apps and the myriad of web tools available online. Let this book become your guide to: Explore the pedagogy behind digital lesson design Follow step-by-step directions on how to create a HyperDoc Reflect and revise digital lessons using a checklist to "hack" your own HyperDocs Select tech tools best suited for lessons Connect and share with other educators Copy and customize sample HyperDocs to use in your own classroom HyperDocs will improve collaboration and instruction between all education stakeholders, including: students, teachers, administrators,

instructional coaches, professional developers, and families. After reading *The HyperDoc Handbook* you will be inspired to create and share!

Student Engagement and Participation: Concepts, Methodologies, Tools, and Applications Routledge

As teaching evolves, teacher education must keep up. This book examines systemic reforms that incorporate new technology to improve any teacher education program. While there are books that address the integration of technology into teaching curricula, very few address the process for teacher education faculty and the systemic reform of a teacher education program. *Integrating Information Technology into the Teacher Education Curriculum: Process and Products of Change* provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum. It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating. It describes the creation of Design Teams at Brigham Young University's McKay School of Education (funded by a PT3 grant) and how these teams worked to successfully reconfigure the school's teacher preparation curricula. *Integrating Information Technology into the Teacher Education Curriculum* examines: how to compose and create a curriculum design team including both teacher education and content-specific methods instructors training and collaboration opportunities that focus on the infusion of technology how to facilitate alignment among a university, cooperating school districts, the State Office of Education, and other available teacher preparation programs specific case examples of the redevelopment of teacher education

courses by the instructors who teach them the process of changing a technology course required by the teacher education program the process of extending grant activities to the university's partner school districts and the State Office of Education From the editors: *Preparing tomorrow's teachers to use technology in schools* is a complex endeavor requiring the infusion of technology into curriculum and instructional practices at all levels of the pre-service program. In many early teacher education programs, prospective teachers took a computer literacy class separate from content methods classes and rarely engaged in real collaboration on how schoolteachers could integrate technology into authentic learning experiences. By focusing merely on how to use computers, technology training failed by not addressing how to teach students more effectively using a variety of technological tools. What teachers need to know most is how to teach content more effectively. Technology integration should cause teachers to develop different perspectives through rethinking teaching and learning. Teaching with technology causes teachers to confront their established beliefs about instruction and their traditional roles as classroom teachers. *Esperanza Rising (Scholastic Gold)* Scholastic Inc.

Teaching for Understanding with Technology shows how teachers can maximize the potential of new technologies to advance student learning and achievement. It uses the popular Teaching for Understanding framework that guides learners to think, analyze, solve problems, and make meaning of what they've learned. The book offers advice on tapping into a rich array of new technologies such as web

information, online curricular information, and professional networks to research teaching topics, set learning goals, create innovative lesson plans, assess student understanding, and develop communities of learners.

The EduProtocol Field Guide Routledge
Increase achievement and engagement for all students in 21st century classrooms! Project-based learning has emerged as one of today's most effective instructional practices. In PBL, students confront real-world issues and problems, collaborate to create solutions, and present their results. This exciting new book describes how PBL fosters 21st century skills and innovative thinking. The author provides instructional strategies, assessment methods, and detailed instruction on how to: Design projects for various content areas across all grade levels Integrate technology throughout the learning process Use Khan Academy, webquests, wikis, and more to foster deeper conceptual learning Build social learning networks Differentiate instruction by scaffolding supports for the learning process

The Best of History Web Sites Penguin
This unique guide offers practical strategies for using WebQuests to optimize learning in social studies, foster student inquiry and higher-level thinking, and promote greater intercultural understanding.

Social Studies Units for Grades 9-12
Simon and Schuster

This popular text advocates an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers. Based in practice and experience, it offers systematic support and open, honest advice for new teachers, is conversational not pedantic, and

provides lots of examples. While the structure and most of the topics remain largely the same as before, this Third Edition presents new lesson ideas in every chapter especially designed to help new teachers to address learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Teaching History in the Digital Classroom
Routledge

January 2009 marked the 25th anniversary of one of the most famous three minutes of television history. It was during half-time of the 1984 Super Bowl that APPLE show cased its new Macintosh Computer in an avant-guard commercial. In the following three weeks sales of the new computer, in both the public and private sectors, took off leading some to note this occasion as the "true" start of the information age. At the same time schools joined this so-called information revolution and began to use the new technology, in various forms, in a much more serious manner. Given both the changing nature of technology, as well as its classroom applications, over the past quarter

century this work's goal is to capture the historical trends of both use and application of information technology in the social studies during this era. This is done by providing a retrospective view , from 1984 through 2009 , of where we've been, where we are, and a view of new tools and strategies and possible studies that are emerging that can enhance our understanding of the effects that technology has and will have on the social studies.

The Foot Book IGI Global

Educator and technology trainer Thomas Daccord has painstakingly selected and compiled this guide to the best history sites for use in high school, academic, and public libraries. "The Best of History Web Sites" is the quickest path to a rich variety of content, including multimedia presentations, subject gateways, lesson plans and activities, primary resources, interactive quizzes and games, virtual tours, maps and atlases, statistical collections, and more.

Ditch That Textbook Routledge

This practical, how-to guide makes it easy for teachers to incorporate the latest technology in their classes. Employing an informal workshop approach, the book avoids technical jargon and pays special attention to the needs of teachers who are expanding the use of computers in their classrooms. The authors focus on what teachers do and how they can do it better, and provide a wide variety of proven tools, tips, and methods for enhancing these activities with technology. "Best Ideas for Teaching with Technology" provides extensively illustrated tutorials for a wide variety of software, online tools, and teaching techniques. It covers everything from lesson plans, to time management, how to show animation, blogging, podcasts,

laptop strategies, and much, much more. In addition, periodic updates to the text will be available on the authors' website.

Content Area Reading and Learning Psychology Press

History is not a mere chronicle of facts, but a dialogue between competing interpretations of the past; it should be taught as such. Teaching history in this way makes it both intellectually demanding and more interesting, while at the same time helps students acquire the knowledge and skills necessary to become functioning citizens in a democracy. The opening chapters provide the rationale for the study of history, its epistemological basis, and the logic of the discipline. The bulk of the book deals with practical ways to help students acquire, process, and apply information. In particular, it addresses the specific thinking skills required by the discipline, with many effective techniques for helping students to master them. The implications of this approach for teacher evaluation of student work are also addressed.

The Nexus ISTE (Interntl Soc Tech Educ) A remarkable novel that uniquely melds journalism with fiction, by Elena Poniatowska, the recipient of the prestigious 2013 Cervantes Prize *Jesusa* is a tough, fiery character based on a real working-class Mexican woman whose life spanned some of the seminal events of early twentieth-century Mexican history. Having joined a cavalry unit during the Mexican Revolution, she finds herself at the Revolution's end in Mexico City, far from her native Oaxaca, abandoned by her husband and working menial jobs. So begins *Jesusa's* long history of encounters with the police and struggles against authority. Mystical yet practical, undaunted by hardship, *Jesusa*

faces the obstacles in her path with gritty determination. Here in its first English translation, Elena Poniatowska's rich, sensitive, and compelling blend of documentary and fiction provides a unique perspective on history and the place of women in twentieth-century Mexico.

In Search of Understanding

Routledge

The #1 New York Times bestseller that sparked international dialogue is now in paperback for young adults! Based on the adult bestseller by Ibram X. Kendi, and co-authored by bestselling author Nic Stone, *How to be a (Young) Antiracist* will serve as a guide for teens seeking a way forward in acknowledging, identifying, and dismantling racism and injustice. The New York Times bestseller *How to be an Antiracist* by Ibram X. Kendi is shaping the way a generation thinks about race and racism. *How to be a (Young) Antiracist* is a dynamic reframing of the concepts shared in the adult book, with young adulthood front and center. Aimed at readers 12 and up, and co-authored by award-winning

children's book author Nic Stone, *How to be a (Young) Antiracist* empowers teen readers to help create a more just society. Antiracism is a journey--and now young adults will have a map to carve their own path. Kendi and Stone have revised this work to provide anecdotes and data that speaks directly to the experiences and concerns of younger readers, encouraging them to think critically and build a more equitable world in doing so.
