"Palast is astonishing, he gets the real evidence no one else has the guts to dig up." Vincent Bugliosi, author of *None Dare Call it Treason* and *Helter Skelter* Award-winning investigative journalist Greg Palast digs deep to unearth the ugly facts

that few reporters working anywhere in the world today have the courage or ability to cover. From East Timor to Waco, he has exposed some of the most egregious cases of political corruption, corporate fraud, and financial manipulation in the US and abroad. His uncanny investigative skills as well as his no-holds-barred style have made him an anathema among magnates on four

continents and a living legend among his colleagues and his devoted readership. This exciting collection, now revised and updated, brings together some of Palast's most powerful writing of the past decade. Included here are his celebrated *Washington Post* exposé on Jeb Bush and Katherine Harris's stealing of the presidential election in Florida, and recent stories

on George W. Bush's payoffs to corporate cronies, the payola behind Hillary Clinton, and the faux energy crisis. Also included in this volume are new and previously unpublished material, television transcripts, photographs, and letters.

The evolution and manipulation of language from the celebrated author of *After Babel*. “A keenly discriminating literary mind at work on what it loves” (The New York Times Book Review).  
*Language and Silence* is a

book about language—and politics, meaning, silence, and the future of literature. Originally published between 1958 and 1966, the essays that make up this collection ponder whether we have passed out of an era of verbal primacy and into one of post-linguistic forms—or partial silence. Steiner explores the idea of the abandonment of contemporary literary criticism, from the classics to the works of William Shakespeare, Lawrence Durrell, Thomas Mann,

Leon Trotsky, and more.

 How policing became the major political issue of our time Combining firsthand accounts from activists with the research of scholars and reflections from artists, Policing the Planet traces the global spread of the broken-

windows policing strategy, first established in New York City under Police Commissioner William Bratton. It's a doctrine that has vastly broadened police power the world over—to deadly effect. With contributions from #BlackLivesMatter cofounder Patrisse Cullors, Ferguson activist and Law Professor Justin Hansford, Director of New York-based Communities United for Police Reform Joo-Hyun Kang, poet Martín Espada, and journalist Anjali Kamat, as well as articles from

Over the past two decades, there has been a huge amount of innovation in both the principles and practice of operating systems. Over the same period, the core

ideas in a modern operating system - protection, concurrency, virtualization, resource allocation, and reliable storage - have become widely applied throughout computer science.

Whether you get a job at Facebook, Google, Microsoft, or any other leading-edge technology company, it is impossible to build resilient, secure, and flexible computer systems without the ability to apply operating systems concepts in a variety of settings. This book examines the both

the principles and practice of modern operating systems, taking important, high-level concepts all the way down to the level of working code. Because operating systems concepts are among the most difficult in computer science, this top to bottom approach is the only way to really understand and master this important material. *A Dictionary of the Portuguese and English Languages, in Two Parts* Voyage Press

The *Shooter's Bible Guide to Bowhunting* offers everything you need to

know about the sport and its gear, from its origin as a means of survival to modern gear. Compound bows and crossbows have undergone an explosive rise in popularity in recent years, due in part, Dr. Todd A. Kuhn explains, to complex socioeconomic, environmental, and biological factors. As expansive tracts of land vanish, many hunters can no longer pursue game with high-powered rifles. That, plus vast improvements in archery gear, has hunters flocking to compound bows and

crossbows as alternatives. In the Shooter's Bible Guide to Bowhunting Dr. Kuhn examines all things bowhunting and archery. Topics covered include: Compound, recurve, and traditional bows Arrows and broadheads Sights and rests Releases and triggers Quivers Tree stands, blinds, decoys, and other popular gear This exhaustive desk reference provides a never before seen look into the history and engineering of archery, theories and trends in game discipline, and, of

course, an exhaustive catalog of archery equipment both new and traditional.

From one of rock's greatest writers, Love Becomes a Funeral Pyre is the definitive biography of the Doors Spanning the entire history of the band, from the birth of its members to the deaths of those who have departed, this book will long remain the definitive history of a band that changed the history of popular music. The band that started out as the "American Rolling

Stones," noted for their wildly unpredictable performances, their jazzy vibe, and the crazed monologues of their front man, ended as badly as did the '60s: abruptly, bloodily, cripplingly. Along with evoking the cultural milieu of Los Angeles in the era, bestselling writer Mick Wall captures the true spirit of that tarnished age. From the release of their classic first album, *The Doors*, to their last with Jim Morrison, *L.A. Woman*, this band biography is a brilliantly penetrating and

contemporary investigation into the real story of the Doors.

James Bamford has been the preeminent expert on the National Security

Agency since his reporting revealed the agency's existence in the 1980s. Now Bamford describes the transformation of the NSA since 9/11, as the agency increasingly turns its high-tech ears on the American public. The *Shadow Factory* reconstructs how the NSA missed a chance to thwart the 9/11 hijackers and details how this mistake has led to a heightening of domestic surveillance. In disturbing detail, Bamford describes exactly how every American's data is being mined and
