National Audubon Society Field Guide to Tropical Marine Fishes

Heyday Books

In much of Central Africa, eating wildlife is seen as a normal, desirable and common-sense practice. Almost all wild animals, from the largest mammals to the smallest invertebrates, are hunted, traded and consumed, providing vital income and nutrition for millions of people. But as demand for bushmeat grows, animal populations are being

decimated, directly impacting biodiversity, local economies and public health. Taking an interdisciplinary approach, Bushmeat explores questions ranging from deforestation and conservation strategies to infectious diseases, urban street food and law enforcement. It explains how the popularity of wild meat consumption has spread from rural areas into major cities, fuelled by rapid urbanisation, poorly defined regulations, and developing trade networks-whether small-scale and informal, or commercial and politically connected. While unsustainable hunting practices pose clear problems for wildlife

conservation, they also increase the risk of rural food insecurity and of new infectious diseases emerging-as HIV, Ebola and Covid-19 have shown. But cultural attachment to wild meat, and its dietary importance for many communities, make the 'bushmeat crisis' difficult to solve. Based on extensive interviews and a comprehensive review of secondary literature, Bushmeat presents a startling account of one of the Anthropocene's catastrophes in the making.

Understanding the Dog's Mind Through Survival & Comfort Simon & Schuster Books for Young Readers
It's an unquestioned truth of modern life: we are starved for time. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and

accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or if we don't make excuses, we make sacrifices-taking time out from other things in order to fit it all in. There has to be a better way...and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. When plans go wrong and they run out of time, only their lesser priorities suffer. Vanderkam shows that with a little examination and prioritizing, you'll find it is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and

write a novel without giving up quality time for work, family, and other things that really matter.

Pet Business Simon and Schuster Climate change is having an increasing impact on coastal, estuarine, and marine environments worldwide. This book provides state-of-the-art coverage of climate change effects on estuarine ecosystems from local, regional, and global perspectives. With editors among the most noted international scholars in coastal ecology and estuarine science and contributors who are world-class in their fields, the chapters in this volume consist of comprehensive studies in coastal, estuarine and marine sciences, climate change, and coastal management and provide an extensive international collection of data in

tabular, illustrated, and narrative formats useful for coastal scientists, planners, and managers. Comprised of three sections: (1) physical-chemical aspects; (2) biological aspects; and (3) management aspects, the book not only examines climatic and non-climatic drivers of change affecting coastal, estuarine, and marine environments but also their interactions and effects on populations of organisms, communities, habitats, and ecosystem structure and function. Pulling together today's most salient issues and key literature advances for those concerned with coastal management, it allows the reader to see across direct and indirect interactions among disciplinary and ecosystem boundaries. Climate Change and Estuaries meets the research needs

of climate scientists, estuarine and marine biologists, marine chemists, marine geologists, hydrologists, and coastal engineers, while students, professors, administrators, and other professionals will also find it an exhaustive reference.

Fish and Fisheries in Estuaries Random House

This book explores how daily and seasonal rhythmicity is generated, how these rhythms are synchronised by our environment, and how they regulate the neuroendocrine systems that impact our physiology and behaviour. The constraints of surviving in a seasonal environment have shaped human evolution and migration, have shaped our societies and cultures, and continue to influence our everyday lives, health

and wellbeing. Identifying the mechanisms whereby seasonal rhythmicity is generated and regulates the brain and body is not only important for understanding the natural world and relevant to animal production, it also offers many insights into the human condition. Each chapter is written by an international expert in the field of chronobiology. A historical perspective on how research into photoperiodism and rhythmicity progressed is initially provided, but the main focus of this book is on the remarkable studies in the last few decades that have unravelled the molecular and cellular machinery underpinning circadian and circannual timing. Topics covered include the role of melatonin in communicating seasonal information to the brain and pituitary

gland, the neuroanatomical pathways in mammals, birds and fish by which changes in photoperiod reach the hypothalamus, the role of glial cells (tanycytes) and thyroid hormone in seasonal rhythmicity, neuroplasticity across seasons, effects of changing day length on mood, regulation of “clock” gene expression, and the role of the suprachiasmatic nucleus. This book will appeal to all students and researchers who wish to learn about current and past research on daily and seasonal rhythmicity. This is the tenth volume in the International Neuroendocrine Federation (INF) Masterclass in Neuroendocrinology series (Volumes 1-7 published by Wiley) that aims to illustrate highest standards and encourage the use of the latest

technologies in basic and clinical research and hopes to provide inspiration for further exploration into the exciting field of neuroendocrinology.

A Companion to Ancient Agriculture
Sourcebooks, Inc.

The first book-length overview of agricultural development in the ancient world A Companion to Ancient Agriculture is an authoritative overview of the history and development of agriculture in the ancient world.

Focusing primarily on the Near East and Mediterranean regions, this unique text explores the cultivation of the soil and rearing of animals through centuries of

human civilization—from the Neolithic beginnings of agriculture to Late Antiquity. Chapters written by the leading scholars in their fields present a multidisciplinary examination of the agricultural methods and influences that have enabled humans to survive and prosper. Consisting of thirty-one chapters, the Companion presents essays on a range of topics that include economic-political, anthropological, zooarchaeological, ethnobotanical, and archaeobotanical investigation of ancient agriculture. Chronologically-organized chapters offer in-depth discussions of agriculture in Bronze Age Egypt and Mesopotamia, Hellenistic Greece and Imperial Rome, Iran and Central Asia, and other regions. Sections on comparative agricultural history discuss

agriculture in the Indian subcontinent and prehistoric China while an insightful concluding section helps readers understand ancient agriculture from a modern perspective. Fills the need for a full-length biophysical and social overview of ancient agriculture Provides clear accounts of the current state of research written by experts in their respective areas Places ancient Mediterranean agriculture in conversation with contemporary practice in Eastern and Southern Asia Includes coverage of analysis of stable isotopes in ancient agricultural cultivation Offers plentiful illustrations, references, case studies, and further reading suggestions A Companion to Ancient Agriculture is a much-needed resource for advanced students, instructors, scholars, and

researchers in fields such as agricultural history, ancient economics, and in broader disciplines including classics, archaeology, and ancient history.

From viral Instagram sensation, lifestyle photographer, and mommy blogger Laura Izumikawa comes *Naptime with Joey*, a ridiculously delightful photo book of her now internet-famous daughter dressed up in various pop culture costumes—a perfect gift for new parents everywhere. Lights, Camera...Nap! Joey Marie wears many hats (or, rather, wigs): she's dressed up as Inigo Montoya, Britney Spears, Beyoncé, Pikachu, Anna Wintour, Moana, and Barb from *Stranger Things*. She's taken trips to Hawaii, baked croissants, and blasted off to the moon as an astronaut (at least, in her

dreams). She's held occupations such as pizza chef, aerobics instructor, and handy-dandy-fixer-upper (figuratively, of course). She's inspired a parenting blog, been the face of her mom Laura Izumikawa's Instagram account—and for the first time, she's taken the leap from the ranks of internet-baby-snoredom to the pages of a book. *Naptime with Joey* is chockablock full of over a hundred deliciously adorable photos of Joey dressed up as various pop culture characters, movie stars, musicians, vacationers, and holiday-goers, making this the most fun, festive, and downright delightful gift under the sun!

Wild Suburbia guides us through the process of transforming a traditional, high water-use yard into a peaceful

habitat garden abounding with native plants. Author Barbara Eisenstein emphasizes that gardening is a rewarding activity rather than a finished product, from removing lawns and getting in touch with a yard's climate to choosing plants and helping them thrive. Supplementing her advice with personal stories from her decades of experience working with native plants, Eisenstein illuminates the joys of tending a native garden--and assures us that any challenges, from managing pests to disapproving neighbors, should never sap the enjoyment out of a pleasurable and fulfilling hobby. For plant lovers curious about their own ecosystems, *Wild Suburbia* offers a style of gardening that nurtures biodiversity, deepens connection to place, and encourages

new and seasoned gardeners alike to experiment and have fun.

Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 New York Times bestselling novel that's perfect for fans of John Green's *The Fault in Our Stars*, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass

along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella, she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart

really be so dangerous if it stops their hearts from breaking too?

A highly readable Poyser monograph on one of the most widespread raptors. The Osprey is a large, fish-eating bird of prey. Distinctively marked in deep brown and white, with a piercing yellow eye and powerful hooked bill, the Osprey snatches its prey in spectacular swoops above lakes and wetlands around the world – it is one of the most widespread of all birds. Persecuted mercilessly in Britain, it became extinct in the 1890s before returning to the famous Loch Garten in Scotland in the 1950s. The return of the bird has been slow, but reintroduction programmes elsewhere – notably at Rutland Water – have been successful, and this remarkable raptor is an increasingly common sight in our skies. This Poyser monograph is dedicated to this fine species and

includes more than 150 colour photographs. The Osprey looks at the distribution, foraging ecology, migration, breeding behaviour and population dynamics of this spectacular bird, with emphasis placed on conservation efforts both in Britain and in the species' African haunts, which have been discovered only very recently thanks to advances in satellite tagging technology.

Das zweibändige Werk *Fish and Fisheries in Estuaries: A Global Perspective* enthält eine Darstellung des aktuellen Wissensstandes über Fische in Ästuaren. In Beiträgen von mehr als fünfzig international anerkannten Forschern und

Experten für Ichthyologie in Ästuaren präsentiert dieses wegweisende Übersichtswerk die Themen Fischbestände und funktionelle Gruppen, Rekrutierung und Produktion in Ästuaren, Ernährungsökologie und trophische Dynamik, Erhaltung von Fischen in Ästuaren und viele mehr. In dreizehn ausführlichen Kapiteln werden die wichtigsten Aspekte zu Fischen und Fischerei in Ästuaren rund um die Welt beschrieben. Es wird die Biologie der Fische in Ästuargewässern und ihre Verbindung zu den dortigen Ökosystemen betrachtet, und es wird analysiert, wie sich die menschengemachte Industrialisierung und globale Ereignisse wie der Klimawandel auf einheimische und andere Arten auswirken. Weitere

Themen sind die Vielfalt der Lebensräume, das Verhalten von Fischen bei der Nahrungssuche, Instrumente und Modelle der Umwelttechnik, Gefahren und Risiken für Fische und Fischerei in Ästuaren sowie die Gesundheit der Umwelt in Ästuaren. Dieses maßgebliche Referenzwerk enthält detaillierte Informationen über die Biologie und Ökologie von Fischen und Fischerei in Ästuaren und bietet außerdem: * Eine Betrachtung aktueller Ansätze und künftiger Forschungsrichtungen, die darauf abzielen, ein Gleichgewicht zwischen der Nutzung und der Erhaltung von Fischen in Ästuaren zu erreichen * Eine Erörterung der Umweltqualitätsziele sowie der nachhaltigen Fischerei und Bewirtschaftung der Ästuar * Eine Untersuchung, wie sich die zunehmende

Nutzung von Ressourcen wie Nahrung, Raum und Wasser durch den Menschen auf die Fischerei in den Ästuaren auswirkt * Zahlreiche internationale Fallstudien zum Fischereimanagement, zu bedrohten Arten, zur Sanierung von Ästuaren, zur Fortpflanzung und Ontogenese und weiteren Themen * Eine Darstellung der Studien- und Probenahmeverfahren, der Feldausrüstung sowie der Verarbeitung, Analyse und Interpretation der Daten Das Werk Fish and Fisheries in Estuaries: A Global Perspective ist ein unverzichtbares Hilfsmittel und eine Referenzquelle für Fischbiologen, Fischereiwissenschaftler, Ökologen und Umweltwissenschaftler, Gewässerökologen, Naturschutzbiologen sowie Studierende der höheren

Semester und Dozenten im Bereich

Feasting Wild Greystone Books Ltd

A New York Times Book Review Summer Reading Selection “Delves into not only what we eat around the world, but what we once ate and what we have lost since then.”—The New York Times Book Review Two centuries ago, nearly half the North American diet was foraged, hunted, or caught in the wild. Today, so-called “wild foods” are becoming expensive luxuries, served to the wealthy in top restaurants. Meanwhile, people who depend on wild foods for survival and sustenance find their lives forever changed as new markets and roads invade the world’s last untamed landscapes. In *Feasting Wild*, geographer and anthropologist Gina Rae La Cerva

embarks on a global culinary adventure to trace our relationship to wild foods. Throughout her travels, La Cerva reflects on how colonialism and the extinction crisis have impacted wild spaces, and reveals what we sacrifice when we domesticate our foods—including biodiversity, Indigenous and women’s knowledge, a vital connection to nature, and delicious flavors. In the Democratic Republic of the Congo, La Cerva investigates the violent “bush meat” trade, tracking elicited delicacies from the rainforests of the Congo Basin to the dinner tables of Europe. In a Danish cemetery, she forages for wild onions with the esteemed staff of Noma. In Sweden--after saying goodbye to a man known only as The Hunter--La Cerva smuggles freshly-caught game meat

home to New York in her suitcase, for a feast of “heartbreak moose.” Thoughtful, ambitious, and wide-ranging, *Feasting Wild* challenges us to take a closer look at the way we eat today, and introduces an exciting new voice in food journalism. “A memorable, genre-defying work that blends anthropology and adventure.”—Elizabeth Kolbert, *New York Times*-bestselling author of *The Sixth Extinction* “A food book with a truly original take.”—Mark Kurlansky, *New York Times* bestselling author of *Salt: A World History* “An intense and illuminating travelogue... offer[ing] a corrective to the patriarchal white gaze promoted by globetrotting eaters like Anthony Bourdain and Andrew Zimmern. *La Cerva* combines environmental history with feminist memoir to craft a

narrative that's more in tune with recent works by Robin Wall Kimmerer, Helen Macdonald and Elizabeth Rush.”—The *Wall Street Journal*

This edited volume represents the research results of two international conferences organized and sponsored by the Annemarie Schimmel Kolleg: “Environmental Approaches in Pre-Modern Middle Eastern Studies” and “Material Culture Methods in the Middle Islamic Periods”. The following work consists of three parts, which correspond to the themes of the aforementioned conferences (Contributions to Environmental History and Material Culture Studies) and a third which bridges the gap between the two

approaches (Practice and Knowledge Transfer). The present contributions cover a wide range of such topics as urban pollution, local perceptions of weather, rural estate economy, Sufi understandings of nature and the body

and mind, houses and socialization, text and gardens, local know-how and interdependence in medieval Syrian agriculture, crop selection and the medieval agricultural economy.
