The SAGE Handbook of Developmental Psychology and Early Childhood Education

Page Publishing Inc
 The Handbook of International Perspectives on Early Childhood Education provides a groundbreaking compilation of research from an interdisciplinary group of distinguished experts in early childhood education (ECE), child development, cultural and cross-cultural research in the psychological sciences, etc. The chapters provide current overviews of ECE in Latin America and the Caribbean, the Middle East, Asia, Australia, Africa, Europe, the US, and Canada, and convey how ECE is multi-sectorial, multi-cultural, and multi-disciplinary, undergirded by such disciplines as neuroscience, psychological anthropology, cross-cultural human development, childhood studies, and political science.

The Teacher Wars

Frontiers Media SA
 The book includes studies presented at the ATEE Spring Conference 2017 on emerging trends in the use of technology in educational processes, the use of robotics to facilitate the construction of knowledge, how to facilitate learning motivation, transformative learning, and innovative educational solutions. Chapters here are devoted to studies on the didactic aspects of technology usage, how to facilitate learning, and the social aspects affecting acquisition of education, among others. This volume serves as a basis for further discussions on the development of educational science, on topical research fields and practical challenges. It will be useful to scientists in the educational field who wish to get acquainted with the results of studies conducted in countries around the world on emerging educational issues. Moreover, teachers who need to implement into practice the newest scientific findings and opinions and future teachers who need to acquire new knowledge will also find this book useful.

Handbook of International Perspectives on Early Childhood Education Guilford Publications

The Handbook of Research-Based Practices for Educating Students with Intellectual Disability provides an integrated, transdisciplinary overview of research-based practices for teaching students with intellectual disability. This comprehensive volume emphasizes education across life stages, from early intervention in schools through the transition to adulthood, and highlights major educational and support needs of children and youth with intellectual disability. The implications of history, recent research, and existing information are positioned to systematically advance new practices and explore promising possibilities in the field. Driven by the collaboration of accomplished, nationally recognized professionals of varied approaches and philosophies, the book emphasizes practices that have been shown to be effective through multiple methodologies, so as to help readers select interventions based on the evidence of their effectiveness.

The Palgrave Handbook of Disabled Children's Childhood Studies

Routledge
 Changes in social and family structures, gender roles, and working environments have led some countries to introduce integrated centers for early childhood care and education (ECCE) for children ages zero to five years, combining the advantages of preschools and childcare centers. ECCE services are becoming increasingly important for countries as a support system for working parents. In countries such as Sri Lanka, where female participation in the labor force is low in comparison with international standards, providing affordable childcare services could also help more mothers to enter the labor market. Responding to the needs of employees, child development centers in the plantation areas in Sri Lanka are already providing integrated childcare services for children in this age group. The increasing demand for affordable childcare services and the growing recognition of the benefits of holistic early childhood development have brought ECCE to the forefront of Sri Lanka's development agenda. Well-designed ECCE systems can improve the lives of children and families and provide significant advantages to national economies. Access to effective ECCE can equalize learning opportunities by improving school readiness and by putting children on a more equal footing at the primary school level. These early advantages have proved to have a lasting impact, affecting both educational and earning potential in the adult years. The significant income inequalities in countries such as Sri Lanka could be addressed through investment in effective ECCE programs, and enhanced understanding of the benefits and potential long-term impacts of ECCE could help governments tailor programs to ensure maximum return on investment. This study seeks to answer the following questions: Is it more effective to provide early childcare and education services separately or in

an integrated manner? Under what conditions would the provision of separate care and education services be more effective? The study provides an analysis of the ECCE environment in Sri Lanka, with recommendations for improvement within the current context. The information presented in the study is a starting point to foster the improved understanding of a complex subject area involving multiple stakeholders.

Hope and Joy in Education

OECD Publishing
 This Research Topic on Unlearning Attendance champions a serious look at school attendance and absenteeism. It examines all forms of school attendance problems ranging from school refusal, truancy, school withdrawal, to school avoidance and its correlates of criminal, socio-emotional, developmental, psychological, academic, fiscal, technological, and societal impact. The issue gives a synopsis on the known problems and challenges but also those exacerbated by the pandemic and ideas for improvement.

Teaching to Change the World is an up-to-the-moment, engaging, social justice-oriented introduction to education and teaching, and the challenges and opportunities they present. Both foundational and practical, the chapters are organized around conventional topics but in a way that consistently integrates a coherent story that explains why schools are as they are. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers' role in addressing them. This thoroughly revised fifth edition remains a vital introduction to the profession for a new generation of teachers who seek to become purposeful, knowledgeable practitioners in our ever-changing educational landscape—for those teachers who see the potential for education to change the world. Features and Updates of the New Edition: • Fully updated Chapter 1, "The U.S. Schooling Dilemma," reflects our current state of education after the 2016 U.S. presidential election. • First-person observations from teachers, including first-year teachers, continue to offer vivid, authentic pictures of what teaching to change the world means and involves. • Additional coverage of the ongoing effects of Common Core highlights the heated public discourse around teaching and teachers, and charter schools. • Attention to diversity and inclusion is treated as integral to all chapters, woven throughout rather than tacked on as separate units. • "Digging Deeper" resources on the new companion website include concrete resources that current and future teachers can use in their classrooms. • "Tools for Critique" provides instructors and students questions, prompts, and activities aimed at encouraging classroom discussion and particularly engaging those students least familiar with the central tenets of social justice education.

Stand Out Frontiers Media SA

This book captures information about early childhood education and care (ECEC) policies and practices in different countries and aims to question the degree to which these countries have managed to meet the needs of children, families, and the ECEC workforce. The book illustrates how different countries have adapted different strategies focusing on policy when it comes to quality ECEC. The goal of the book is twofold. First and foremost, it aims to present key findings and challenges for improving ECEC as a whole. Second, it aims to highlight problems and concerns which the field of ECEC faces, with respect to delivering high-quality care and education to all children. As neither "ECEC" nor "quality" are universal concepts – but are shaped by social-cultural values, as well as national, economic, and political contexts in which ECEC services are provided – this cross-country volume is extremely relevant for fully understanding issues in the field of ECEC. This book was originally published as a special issue of *Early Child Development and Care*.

This book explores how, why, and with what consequences one no-excuses charter network marketizes teaching and learning, through the author's 1000 hours of covert participant observation at a network charter school. In her research, Brooks found that the "AAG" (pseudonym) network re-conceptualized teaching by urging staff to envision their careers in corporate education rather than in classroom teaching. While some employees received a boost up the corporate ladder, others found themselves being pushed out of the organization. Despite AAG's equity-conscious discourse, administrators emphasized controlling student behavior as a central measure of teaching effectiveness. Brooks develops the concept of creative compliance to describe the most successful teachers' tactics for adhering to formal policies strategically, bending the rules in order to survive and advance in a workplace fraught with competition and insecurity.

Handbook of Speech-Language Therapy in Sub-Saharan Africa
Routledge

This book synthesizes research on language development and communication disability in Sub-Saharan Africa and highlights best practices for providing speech and language therapy services to individuals with language, communication, and hearing disorders across the lifespan. The book brings together a wide range of international contributions from various disciplines, such as speech-language pathology, audiology, developmental psychology, language education, social work, neurology, neuropsychology, pediatrics, linguistics, pedagogy, and phonetics to provide perspectives on problems, challenges, ideas, concepts, and models to serve the people in Sub-Saharan Africa. Key areas of coverage include: Challenges for speech-language therapists in the health sector. Community awareness and the sustainable delivery of services. Culture-specific support of communication and language development in early childhood. Malnutrition, dysphagia, feeding difficulties, pediatric HIV, and related issues. Communication disability treatments, including assessment and intervention, augmentative and alternative communication (AAC), and issues specific to bilingualism and biliteracy. Inclusive education of children with communication disorders with case studies from Rwanda, Tanzania, Kenya, and South Africa. The Handbook of Speech-Language Therapy in Sub-Saharan Africa is an essential reference for researchers, professors, and graduate students as well as clinicians, therapists, and other professionals in developmental psychology, speech-language pathology and therapy, social work, neuropsychology, pediatrics, special education, community based rehabilitation, and all related disciplines.

When the original Visible Learning® was published in 2008, it instantly became a publishing sensation. Interest in the book was unparalleled; it sold out in days and was described by the TES as revealing "teaching's Holy Grail". Now John Hattie returns to this ground-breaking work. The research underlying this book is now informed by more than 2,100 meta-analyses (more than double that of the original), drawn from more than 130,000 studies, and has involved more than 400 million students from all around the world. But this is more than just a new edition. This book is a sequel that highlights the major story, taking in the big picture to reflect on the implementation in schools of Visible Learning, how it has been understood – and at times misunderstood – and what future directions research should take. Visible Learning: The Sequel reiterates the author's desire to move beyond claiming what works to what works best by asking crucial questions such as: Why is the current grammar of schooling so embedded in so many classrooms, and can we improve it? Why is the learning curve for teachers after the first few years so flat? How can we develop teacher mind-frames to focus more on learning and listening? How can we incorporate research evidence as part of the discussions within schools? Areas covered include: The evidence base and reactions to Visible Learning The Visible Learning model The intentional alignment of learning and teaching strategies The influence of home, students, teachers, classrooms, schools, learning, and curriculum on achievement The impact of technology Building upon the success of the original, this highly anticipated sequel expands Hattie's model of teaching and learning based on evidence of impact and is essential reading for anyone involved in the field of education either as a researcher, teacher, student, school leader, teacher trainer, or policy maker.

"Introduces educators and scholars to the legacy and import of Daisaku Ikeda as a singular philosopher, educator, and institution-builder, thus enriching current education discourse. In the process, the book illuminates the benefits of cross-cultural research and learning by considering the relevance of Ikeda's thought not only to established streams of pedagogy and practice in the Deweyan tradition but also to emerging trends in education research such as ecocritical education and critical race feminism"-

Visible Learning: The Sequel Rowman & Littlefield

Reveals that behind the going concern for "global economy education" lies capitalism's indifference to human values, to a fair distribution of resources, to its radical restructuring of workplaces with an attendant intensification of work effort, and to the genuine well-being of workers and their families. Coles provides a real education about the twenty-first-century global economy—and what corporations are doing to prevent our learning about it. He describes the intellectually narrow and morally crippling effects of the corporate-control of education; how the imperative for profit maximizes the misunderstanding of communities, nations, and the environment, even as it minimizes aesthetic appreciation, cultural expression, compassion itself. But it is by understanding all this, Coles argues, that real change can begin. --Adapted from publisher description.
