A Forest of Stars

Image Comics Welcome to Burden Hill — a picturesque little town adorned with white picket fences and green, green grass, home to a unique team of paranormal investigators. Beneath this shiny exterior, Burden Hill harbors dark and sinister secrets, and it's up to a heroic gang of dogs — and one cat — to protect the town from the evil forces at work. These are the Beasts of Burden Hill — Pugs, Ace, Jack, Whitey, Red and the Orphan — whose early experiences with the paranormal (including a haunted

doghouse, a witches' coven, and a pack of canine zombies) have led them to become members of the Wise Dog Society, official animal agents sworn to protect their town from evil. This turns out to be no easy task, as they soon encounter demonic cannibal frogs, tortured spirits, a secret rat society, and a bizarre and deadly resurrection in the Burden Hill cemetery — events which lead to fear and heartbreak as our four-legged heroes discover that the evil within Burden Hill is growing and on the move. Can our heroes overcome these supernatural menaces? Can evil be bested by a paranormal team that doesn't have hands? And even more importantly, will Pugs ever shut the hell up? Adventure, mystery, horror, and humor thrive on every page of *Beasts of Burden* — a comic-book series that will capture readers' hearts and haunt their dreams. Award-winning comics creators Evan

Dorkin (Milk and Cheese) and Jill Thompson (Scary Godmother) first introduced these very special investigators in *The Dark Horse Book of Hauntings* and the other *Dark Horse Book of . . .* anthologies, for which they won coveted Eisner Awards for Best Short Story and Best Painter. Those first tales are collected here, along with the comic series *Beasts of Burden* issues #1-#4.

Stan Sakai's *Usagi Yojimbo* is a popular all-ages graphic novel series that chronicles the action-packed wanderings of a ronin in feudal Japan — as told with anthropomorphic animals. For the first ten years of his career, the battling bunny was published by Fantagraphics Books. This slipcase set collects that entire run (previously published as seven trade paperbacks). With over 1000 pages of story, this is the complete, definitive, early *Usagi* with plenty of extras for fans and collectors.

Twenty years ago, at the Basel Art Fair, Astrid Ullens bought a photograph by Brancusi, more or less on the spur of the moment. This proved to be the first step in the formation of an impressive collection that today comprises more than 5,000 photographs, some by such renowned figures as Lewis Baltz, Lee Friedlander, Helen Levitt and Walker Evans, others by young photographers like Francesco Neri, Georges Senga, Massao Mascaró and Tarrah Krajnak. Ullens, who confided her collection to a specially created foundation, the Fondation A Stichting in Brussels, is not interested in trophy-hunting. For her, it is the photographer's eye and stance that matter, and collecting is an aspect of a wider project to promote photography as a way of looking at and better understanding the world, while also, of course, helping to support contemporary practitioners. This substantial volume provides an excellent introduction to the collection, with more than 100 photographers plentifully represented in no fewer than 2,000 images. In doing so, it takes the reader on a fascinating journey through the self-reflexive and conceptually-inflected documentary photography of the 20th century, with plenty of surprises alongside the well-known landmarks. It also offers a portrait of a cohort of photographers who still, in one way or another, sought to give the viewer a better understanding of the world, of nature, mankind, society, and photography itself? something that can no longer be taken for granted in the flood of images in which we find ourselves immersed today, put into further question by advances in AI. Exhibition: during les Rencontres d'Arles, France (01.07. - 22.09.2024).

How could a community of 2000-3000 Viking peasants survive in Arctic Greenland for 430 years (ca. 985-1415), and why did they finally disappear? European agriculture in an Arctic environment encountered serious ecological challenges. The Norse peasants faced these challenges by adapting agricultural practices they had learned from the Atlantic and North Sea coast of Norway. Norse Greenland was the stepping stone for the Europeans who first discovered America and settled briefly in Newfoundland ca. AD 1000. The community had a global significance which surpassed its modest size. In the last decades scholars have been nearly

unanimous in emphasizing that long-term climatic and environmental changes created a situation where Norse agriculture was no longer sustainable and the community was ruined. A secondary hypothesis has focused on ethnic confrontations between Norse peasants and Inuit hunters. In the last decades ethnic violence has been on the rise in Eastern Europe, the Middle East and parts of Africa. In some cases it has degenerated into ethnic cleansing. This has strengthened the interest in ethnic violence in past societies. Challenging traditional hypotheses is a source of progress in all science. The present book does this on the basis of relevant written and archaeological material respecting the methodology of both sciences.
