Middle-class Values in India and Western Europe discusses the distinctive attributes of the middle classes in France, Germany and India. The

construction of new norms of respectability is a universal feature of the middles classes, though their rhetoric has varied in different societies.

Drawing on historical experiences in both western Europe and colonial India, the contributors to this volume try to understand the common inheritance of these newly emerging middle classes and the social and political impact they have had on their societies of origin. Each study is based on detailed research and combines both theoretical and empirical material. The book is divide into three sections. The first section, 'The Rise of the Middle Class in India and Western Europe' has three chapters and they dwell on the middle class and secularization; the middle classes in twentieth-century India; and the values of the middle classes in Germany. The second section, 'Class Formation in the Twentieth Century' contains four essays which discuss the character of the Indian middle class; middle-class values and the creation of a civil society; the 'Grand Ecoles' in France; and the

changing social structure of the German society and the transformation of the German bourgeois culture. The last section, 'Values and Orientations' consists of five papers on the Indian middle class and explore the cultural construction of gender in urban India; the Dalit middle class; the political orientation of the middle classes; the politics of the middle classes and their shifting class values.

Jainism: A Guide for the Perplexed Syracuse University Press

One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu, *Social Media in South India* provides an understanding of this subject in a region experiencing rapid transformation. The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the

traditions of rural life. While certain class tensions have emerged in response to this juxtaposition, a study of social media in the region suggests that similarities have also transpired, observed most clearly in the blurring of boundaries between work and life for both the old residents and the new. Venkatraman explores the impact of social media at home, work and school, and analyses the influence of class, caste, age and gender on how, and which, social media platforms are used in different contexts. These factors, he argues, have a significant effect on social media use, suggesting that social media in South India, while seeming to induce societal change, actually remains bound by local traditions and practices.

Studies in Religion and the Everyday is a collection of essays addressing the contours of religious beliefs and practices in the context of everyday life in India. Events and processes in contemporary India--especially post the 1990s--have contributed to distinct modes of articulating religious practices. This volume is an attempt to historicize--and problematize--the categorization of religion as a universally held and analytically distinct feature of human life and seeks to understand the conditions--historical, political, discursive--and processes of authorization under which a particular set of practices, values, and dispositions constitutes the 'religious' at a specific point in time. By bringing together studies that draw from diverse methodological and epistemological approaches, the book will

serve as a useful introduction to religion in India for the general reader and as an indispensable resource for students and researchers. The volume presents fresh perspectives on existing fields of study such as the city, capital, minorities, secularization, and the state--no longer seen as distinct from religion but actively co-produced with religion in the context of the theoretical rubric of the everyday--thereby marking a departure from approaching the question of religion solely through the lens of identity and conflict.

This volume examines several theoretical concerns of embodiment in the context of Asian

religious practice. Looking at both subtle and spatial bodies, it explores how both types of embodiment are engaged as sites for transformation, transaction and transgression. Collectively bridging ancient and modern conceptualizations of embodiment in religious practice, the book offers a complex mapping of how body is defined. It revisits more traditional, mystical religious systems, including Hindu Tantra and Yoga, Tibetan Buddhism, Bon, Chinese Daoism and Persian Sufism and distinctively juxtaposes these inquiries alongside analyses of racial, gendered, and colonized bodies. Such a multifaceted subject requires a diverse approach, and so perspectives from phenomenology and neuroscience as well as critical race theory and feminist theology are utilised to create more precise analytical tools for the scholarly engagement of embodied religious epistemologies. This a nuanced and interdisciplinary exploration of the myriad issues around bodies within religion. As such it will be a key resource for any scholar of Religious

Studies, Asian Studies, Anthropology, Sociology, Philosophy, and Gender Studies.
Autobiography of an Archive EduGorilla Community Pvt. Ltd. Developing a distinctive theoretical framework on civil society, this book examines how Non-Governmental Organizations (NGOs) contribute towards democratization in India and what conditions facilitate or inhibit their contribution. It assesses three different kinds of politics within civil society – liberal pluralist, neo-Marxist, and communitarian – which have had different implications in relation to democratization. By making use of in-depth empirical analysis and comparative case studies of three developmental NGOs that work among the tribal communities in the socio-historical context of south Rajasthan, the book shows that civil society is not necessarily a democratizing force, but that it can have contradictory consequences in relation to democratization. It discusses how the democratic effect of civil society is not a result of the "stock of social

capital" in the community but is contingent upon the kinds of ideologies and interests that are present or ascendant not just within the institutions of civil society but also within the state. The book delivers new insights on NGOs, democratization, civil society, the state, political society, tribal politics, politics of Hindu Nationalism, international development aid and grassroots social movements in India. It enables readers to understand better the multifaceted nature of civil society, its relationship with the state, and its implications for development and democratization.

 Get a unique insight into the attitudes of mental health professionals working outside the United States! The Mental Health Professions and Homosexuality: International Perspectives examines historical and contemporary attitudes toward homosexuality in the theory and practice of mental health professionals working in Europe and Asia. Edited by two noted authors, educators, and

practitioners, Drs. Vittorio Lingiardi and Jack Drescher, the book's unique insights are an important step in keeping pace with current international mental health literature about homosexuality. *The Mental Health Professions and Homosexuality* addresses the relationship between psychiatric institutions and homosexuality; the history of current theoretical frameworks for thinking about homosexuality; the emergence of an international gay, lesbian, and bisexual psychiatric movement; and how changes in psychoanalytic theory and practice both mirror and are influenced by the changing legal and societal status of homosexuality. *The Mental Health Professions and Homosexuality: International Perspectives* asks three questions of practitioners working in China, India, Italy, Germany, Switzerland, Finland, Norway, and the United Kingdom: 1) what are the prevailing theoretical models about homosexuality found in professional literature in your country; 2) what is known about the actual clinical experiences of gay and lesbian clients; and 3)

what is the status of openly gay and lesbian mental health practitioners in your country? The responses reveal insights on a variety of topics, including: the changing views within British psychiatry a survey of German psychoanalytic institutes regarding their admission policies toward gay and lesbian applicants a detailed review of anti-homosexual biases in Italian scientific literature from 1930 to present the struggle for civil rights of the Chinese tongzhi community the emergence of gay and lesbian civil rights in India efforts to open the World Psychiatric Association and the International Psychoanalytical Association to gay and lesbian mental health professionals *The Mental Health Professions and Homosexuality: International Perspectives* provides first-hand perspectives on how different cultures have created different ways to view homosexuality and different ways to include—or exclude—gays and lesbians from social and public health policy. The book is an essential resource for psychiatrists, psychologists, psychoanalysts,

physicians, social workers, anthropologists, and historians.

When asked to distinguish between different faiths, Mughal prince Dara Shikoh is said to have replied, "How do you draw a line in water?" Inspired by this question, the essays in this volume illustrate how ordinary people in South Asia and the diaspora negotiate their religious identities and encounters in creative, complex, and diverse ways. Taking the approach that narratives "from below" provide the richest insight into the dynamics of religious pluralism, the authors examine life histories, oral traditions, cartographic practices, pilgrimage rites, and devotional music and songs. Drawing on both ethnographic and historical data, they illuminate how, like lines in water, religious boundaries are dynamic, fluid, flexible, and permeable rather than permanently fixed, frozen,

and inviolable. A distinct feature of the volume is its proposition of a fresh and innovative typology of boundary dynamics. Boundaries may be attractive or porous, firmly drawn or transcended. Attractive boundaries invite confluence while affirming the differences between self and other, whereas permeable boundaries facilitate exchanges that create new identities and in turn form new lines. Although people may recognize the significance of religious borders, they can choose to transcend them. Throughout this volume, the authors highlight the fascinating range of South Asian religious and cultural traditions.

Colonialist, nationalist, and regionalist ideologies have profoundly influenced folk music and related musical practices among the Garhwali and Kumaoni of Uttarakhand. Stefan Fiol blends historical and ethnographic approaches to unlock these influences and explore a paradox: how the œfolk designation can alternately identify a universal stage of humanity, or denote alterity and subordination. Fiol explores the lives and work of Gahrwali artists who produce folk music. These musicians create art as both a discursive idea and as a set of expressive practices

across strikingly different historical and cultural settings. Juxtaposing performance contexts in Himalayan villages with Delhi recording studios, Fiol shows how the practices have emerged within and between sites of contrasting values and expectations. Throughout,

Fiol presents the varying perspectives and complex lives of the upper-caste, upper-class, male performers spearheading the processes of folklorization. But he also charts their resonance with, and collision against, the perspectives of the women and hereditary musicians most affected

by the processes. Expertly observed, *Recasting Folk in the Himalayas* offers an engaging immersion in a little-studied musical milieu.
