A clear and concise introduction to the study of how new languages come into being.

The History of the Caucasian Albanians Taylor & Francis

The Sierra Leone Language Review is the African Language Journal of Fourah Bay College, the University College of Sierra Leone. The Journal is devoted to the detailed study of languages in Sierra Leone and neighbouring areas of West Africa, and also to the more general study and discussion of African languages and language-problems.

Combating Desertification in Asia, Africa and the Middle East Cambridge University Press

Engaging and sobering. Traces the development of Yizkor from the original memorializing of Jewish communities destroyed by the Crusaders to the touching service we have today, and reflects on how we remember both personal losses and the martyrs of history.

The Hamito-Semitic Etymological Dictionary, a project in the making since 1986, is the first dictionary to reflect the vocabulary of the extinct Proto-

Hamito-Semitic (Proto-Afro-Asiatic) language. Reconstructed on the basis of Semitic, Ancient Egyptian, Berber, Chadic and Cushitic linguistic groups, the Dictionary plays an indispensable role in further research into the field of historical linguistics. It surpasses by far the only comparable work to date, M. Cohen's Essai comparatif sur le vocabulaire et la phonétique du chamito-semitique, published in 1947, which contains much less material and is now outdated. The Dictionary comprises more than 2,500 lexical items and includes an introduction providing valuable information on the historical phonology of Hamito-Semitic as well as an index of meanings, which supplies linguistics, archaeologists and scholars of ancient history with added insight into the culture of the ancient speakers of Proto-Hamito-Semitic. An invaluable contribution to the field of Afro-Asiatic Studies, The Hamito-Semitic Etymological Dictionary will be used and discussed by scholars for years to come.

Conversational New Guinea Pidgin Newnes

This book is about the 'how' of desertification control as opposed to an analysis of the 'why' and fills a gap in the desertification-related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands. There are numerous illustrations to show the successful techniques. This compilation demonstrates that desertification and land degradation can be controlled and reversed with existing techniques in such widely varying environments as the Sahel of Africa to Sri Lanka and the Philippines in SE Asia, from mountains in Lesotho to low lands on desert margins in Mongolia. Proven approaches include technical interventions, changes in governance and to the legislative framework and policy reform. The book fills a gap in the desertification-related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands.

The World as it Is, and as it Has Been Univ of California Press

Through interviews with city residents, Martin King Whyte and William L. Parish provide a unique survey of urban life in the last decade of Mao Zedong's rule. They conclude that changes in society produced under communism were truly revolutionary and that, in the decade under scrutiny, the Chinese avoided ostensibly universal evils of urbanism with considerable success. At the same time, however, they find that this successful effort spawned new and equally serious urban problems—bureaucratic rigidity, low production, and more.

It is a translation of (Cevap Veremedi) into English. Harputlu Ishâk Effendi explains how the Bible - the true book revealed to Isa 'alaihi-salam - was distorted; how words that belonged to people were put into firstly written four Gospels; that the theory of trinity is erroneous; the belief of Tawhid (the unity of Allahu ta'ala) in Islam. Besides, a few very precious letters - a food of a soul by Muhammad Ma'sûm-î Fârûkî - take place. Information about Judaism, Torah and Talmud is also given.

[Soviet Physics](#) Routledge

This is the second volume in a series of critical reviews of the chemical thermodynamic data of those elements of particular importance in the safety assessment modeling of high-level radioactive waste storage and disposal facilities. The objective of these reviews is to provide a set of reliable thermodynamic data that can be used to describe the behaviour of these elements under conditions relevant for radioactive waste disposal systems and the geochemical environments. The present volume is a review of experimental data reported in the literature for americium. On a few occasions, where no data existed, comparisons and estimates were made based on experimental data on analog lanthanide elements. The basic philosophy was to develop a minimum set of solid phases and solution species of americium that would fit all experimental data being reviewed.
