Compassionate and effective strategies for raising a child with ADHD. Parenting children with ADHD, whether diagnosed or undiagnosed, can be challenging and complex. But just as a child who struggles with reading can learn to decode words, children with ADHD can learn patience, communication, and solution-seeking skills to become more confident, independent, and capable. This book, rich with optimism, tips, tools, and action plans, offers science-based insights and systems for parents to help cultivate these skills. Combining expert information with practical, sensitive advice, the eight "key" concepts here will help parents reduce chaos, improve cooperation, and nurture the advantages—like creativity and drive—that often accompany all of that energy.

Based on author Cindy Goldrich's seven-session workshop entitled Calm and Connected: Parenting Kids with ADHD®, this book focuses on developing and strengthening effective interpersonal skills in

both parents and children as a way to improve conflict resolution. Following the parenting principle to "Parent the child you have," Goldrich offers advice to help readers tailor their parenting to meet the needs of their unique child. The book also leads parents to recognize the value of being a leader and a guide to children, building parents' confidence in their decision-making, and giving children a sense of safety, security, and confidence. The principles outlined in 8 Keys to Parenting Children with ADHD are appropriate for parenting kids of all ages—until they have "launched" and are on their own.

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. Disability law can be complex and intimidating, so how can concerned parents use it to ensure their child with a disability receives the appropriate education they are legally entitled to? A Guide to Special Education Advocacy gives strategies for advocating for better provision of special education in schools. Despite the many services and accommodations that have been made for students with disabilities, such as the use of Braille or providing specialized education in a regular or special classroom, many children with disabilities do not get the services they need and are not placed in appropriate programs or settings. Because of this, the perception of disability often remains unchanged. Matthew Cohen's insightful manual gives a practical vision of how a parent or a professional can become an advocate to achieve a more inclusive and rewarding education for the child with a disability. This book will provide parents, people with disabilities, professionals and clinicians thinking about special education advocacy with an overview of current disability law and how it works, identifying practical ways for building positive and effective relationships with schools.
