This playful photo series by local
photographer Mimi Mollica thrusts the
viewer straight into the inspiring,
frustrating, wild and living streets of east
London. Abstract, colourful snapshots of
people, fabrics, architecture, wildlife and
everyday objects together tell a story of
a vibrant, ever-changing community.
Mollica's (sometimes extreme) close-ups

are full of warmth and spontaneity;
making us yearn for a time when close
proximity to strangers was inherent in
our day-to-day lives.

An Opinionated Guide to Vegan London
Gwen Romack

From the author of *The Agitators*, the acclaimed and captivating true story of two restless society girls who left their affluent lives to “rough it” as teachers in the wilds of Colorado in 1916. In the summer of 1916, Dorothy Woodruff and Rosamond Underwood, bored by society luncheons, charity work, and the effete men who courted them, left their families in Auburn, New York, to teach school in the wilds of northwestern Colorado. They lived with a family of homesteaders in the Elkhead Mountains

and rode to school on horseback, often in blinding blizzards. Their students walked or skied, in tattered clothes and shoes tied together with string. The young cattle rancher who had lured them west, Ferry Carpenter, had promised them the adventure of a lifetime. He hadn't let on that they would be considered dazzling prospective brides for the locals. Nearly a hundred years later, Dorothy Wickenden, the granddaughter of Dorothy Woodruff, found the teachers' buoyant letters home, which captured the voices of the pioneer women, the children, and other unforgettable people the women got to know. In reconstructing their journey, Wickenden has created an exhilarating saga about two intrepid women and the “settling up” of the West.

Understanding Eastern Philosophy Ten
Speed Press

Understanding Eastern Philosophy provides an accessible critical introduction to how some of the key philosophies of the East compare with those in the West. Starting from a discussion of the problems of distinguishing between religions and philosophies, Ray Billington presents a clear picture of the key tenets behind Hinduism, Buddhism, Taoism, Jainism and Confucianism. Moving on to compare the key themes of religious philosophy that cut across East and West, such as a belief in God, the soul, moral decision-making, nature and

authority, *Understanding Eastern Philosophy* presents a fascinating and controversial picture of the contribution theistic religions have to make. With its belief in a personal God bestowing a particular version of 'truth', Ray Billington concludes that the universal mysticism characteristic of Eastern thought provides a more realistic and rewarding path than is commonly supposed in the West. *Understanding Eastern Philosophy* assumes no prior knowledge of religion or philosophy. A "masterful . . . brilliantly constructed novel" of love and chaos in 1950s Vietnam (Zadie Smith, *The Guardian*). It's 1955 and British journalist Thomas Fowler has been in Vietnam for two

years covering the insurgency against French colonial rule. But it's not just a political tangle that's kept him tethered to the country. There's also his lover, Phuong, a young Vietnamese woman who clings to Fowler for protection. Then comes Alden Pyle, an idealistic American working in service of the CIA. Devotedly, disastrously patriotic, he believes neither communism nor colonialism is what's best for Southeast Asia, but rather a "Third Force": American democracy by any means necessary. His ideas of conquest include Phuong, to whom he promises a sweet life in the states. But as Pyle's blind moral conviction wreaks havoc upon innocent lives, it's ultimately his romantic compulsions that will play a role in his own undoing. Although criticized upon publication as anti-

American, Graham Greene's "complex but compelling story of intrigue and counter-intrigue" would, in a few short years, prove prescient in its own condemnation of American interventionism (The New York Times). [The Adlard Coles Book of Mediterranean Cruising](#) Good Press

Colorado has 53 14ers, more than 600 13ers, and hundreds of other peaks that can be reached without special equipment or expertise. Numerous guides dryly catalog these trails, but *Best Summit Hikes in Colorado* stands out from them all. Author James Dziezynski has meticulously selected 80+ of the state's absolute best peaks in more than 50 superlative hikes, and his opinionated narrative brings each route to life. Each summit is included because

of a notable feature--whether it's the site of a ghost mine or airplane wreckage, has thundering waterfalls or colorful floral meadows, is the best summit for spotting wildlife or bringing out-of-town friends, or is very accessible. Some peaks offer unique opportunities, such as a trailhead accessible only via a steam-powered railroad. Several summits are described in no other publication. Covering all Colorado's major mountain ranges, including the well-known Sangre De Cristo, Gore, Sawatch, Indian Peaks, and Maroon Bell wilderness areas to the lesser-known Grenadiers, Medicine Bow, and Outer San Juan peaks, this distinctive guide makes it easy to select exactly the right hike for the right day, the right mood, and the right companions.
