Since the mid-1980s, the  
psychology of liberation

movement has been a  
catalyst for collective and  
individual change in  
communities throughout  
Latin America, and  
beyond; and recent  
political developments are  
making its powerful,  
transformative ideas more  
relevant than ever before.  
Psychology of Liberation:  
Theory and Applications  
updates the activist  
frameworks developed by  
Ignacio Martin-Baro and  
Paulo Freire with  
compelling stories from  
the frontlines of conflict in  
the developing and  
developed worlds, as  
social science and  
psychological practice are  
allied with struggles for  
peace, justice, and  
equality. In these  
chapters, liberation is  
presented as both an  
ongoing process and a  
core dimension of  
wellbeing, entailing the  
reconstruction of social  
identity and the  
transformation of all  
parties involved, both  
oppressed and  
oppressors. It also  
expands the social  
consciousness of  
professionals, bringing  
more profound meaning  
to practice and enhancing  
related areas such as  
peace psychology, as  
shown in articles such as  
these: Philippines: the role  
of liberation movements

in the transition to  
democracy. Venezuela:  
liberation psychology as a  
therapeutic intervention  
with street youth. South  
Africa: the movement for  
representational  
knowledge. Muslim world:  
religion, the state, and the  
gendering of human  
rights. Ireland: linking  
personal and political  
development. Australia:  
addressing issues of  
racism, identity, and  
immigration. Colombia:  
building cultures of peace  
from the devastation of  
war. Psychology of  
Liberation demonstrates  
the commitment to  
overcome social injustices  
and oppression. The book  
is a critical resource for  
social and community  
psychologists as well as  
policy analysts. It can also  
be used as a text for  
graduate courses in  
psychology, sociology,  
social work and  
community studies.

*Early Evolutionary History  
of the Synapsida*

What do stories in games have in common with political narratives? This book identifies narrative strategies as mechanisms for meaning and manipulation in games and real life. It shows that the narrative mechanics so clearly identifiable in games are increasingly used (and abused) in politics and social life. They have »many faces«, displays and interfaces. They occur as texts, recipes, stories, dramas in three acts, movies, videos, tweets, journeys of heroes, but also as rewarding stories in games and as narratives in society - such as a career from rags to riches, the concept of modernity or market economy. Below their surface, however, narrative mechanics are a particular type of motivational design - of game mechanics.

This book celebrates the contributions of Dr. Frederick S. Szalay to the field of Mammalian Evolutionary Morphology. Professor Szalay is a strong advocate for

biologically and evolutionarily meaningful character analysis. He has published about 200 articles, six monographs, and six books on this subject. This book features subjects such as the evolution and adaptation of mammals and provides up-to-date articles on the evolutionary morphology of a wide range of mammalian groups.

**International Media Guide** Springer

Forgeries are an omnipresent part of our culture and closely related to traditional ideas of authenticity, legality, authorship, creativity, and innovation. Based on the concept of mimesis, this volume illustrates how forgeries must be understood as autonomous aesthetic practices - creative acts in themselves - rather than as mere rip-offs of an original work of art. The proceedings bring together research from different scholarly fields. They focus on various mimetic practices such as pseudo-translations, imposters, identity theft, and hoaxes in different artistic and historic contexts. By opening up the scope of the aesthetic implications of fakes, this anthology aims to

consolidate forging as an autonomous method of creation.

*Psychology of Liberation*  
MIT Press

The assassin's bullet misses, the Archduke's carriage moves forward, and a catastrophic war is avoided. So too with the history of life. Re-run the tape of life, as Stephen J. Gould claimed, and the outcome must be entirely different: an alien world, without humans and maybe not even intelligence. The history of life is littered with accidents: any twist or turn may lead to a completely different world. Now this view is being challenged. Simon Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution, repeatedly. Eyes, brains, tools, even culture: all are very much on the cards. So if these are all evolutionary inevitabilities, where are our counterparts across the galaxy? The tape of life can only run on a suitable planet, and it seems that such Earth-like planets may be much rarer than hoped.

Inevitable humans, yes, but in a lonely Universe.

Springer Science & Business Media  
A quest to find something new by excavating the "deep time" of media's development—not by simply looking at new media's historic forerunners, but by connecting models, machines, technologies, and accidents that have until now remained separated. Deep Time of the Media takes us on an

archaeological quest into the hidden layers of media development—dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery; in *Deep Time of the Media*, he illuminates turning points of media history—fractures in the predictable—that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of "dreamers and modelers" of media worlds, from the ancient Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. "Media are spaces of action for constructed attempts to connect what is separated," Zielinski writes. He describes models and machines that

make this connection: including a theater of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, and the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among others. Uncovering these moments in the media-archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the "deep time" media history shed light on today's media landscape and may help us map our expedition to the media future.

*Reason and Revelation in Byzantine Antioch* NeMe Essay Collection covering the point where software, law and social justice meet.

### **International Labour Documentation** BRILL

What happened to ancient Greek thought after Antiquity? What impact did Abrahamic religions have on medieval Byzantine and Islamic scholars who adapted and reinvigorated this ancient philosophical heritage? *Reason and Revelation in Byzantine Antioch* tackles these questions by examining the work of the

eleventh-century Christian theologian Abdallah ibn al-Fadl, who undertook an ambitious program of translating Greek texts, ancient and contemporary, into Arabic. Poised between the Byzantine Empire that controlled his home city of Antioch and the Arabic-speaking cultural universe of Syria-Palestine, Egypt, Aleppo, and Iraq, Ibn al-Fadl engaged intensely with both Greek and Arabic philosophy, science, and literary culture. Challenging the common narrative that treats Christian and Muslim scholars in almost total isolation from each other in the Middle Ages, Alexandre M. Roberts reveals a shared culture of robust intellectual curiosity in the service of tradition that has had a lasting role in Eurasian intellectual history.

### Microelectronic Circuits

Springer Science & Business Media  
Este libro está dedicado a aquellos que están dispuestos a aprender el Comercio HVACR y las Prácticas de Carga/Solución de Problemas de Refrigerantes. En este libro, encontrará Procedimientos Paso a Paso para preparar sistemas de aire

acondicionado y de bomba de calor para el refrigerante, leer el juego de manómetros, medir el nivel de carga de refrigerante y solucionar problemas con el flujo de refrigerante del sistema. Este libro difiere de otros en que proporciona información clave sobre cada procedimiento junto con el uso de herramientas desde la perspectiva de un técnico, en lenguaje que un técnico puede entender. Este libro también explica el ciclo de refrigeración de los acondicionadores de aire y de las bombas de calor, las propiedades del refrigerante, la transferencia de calor, los componentes incluidos en el sistema, las funciones de cada componente, los requisitos de flujo de aire y los problemas comunes. Procedimientos incluidos:

- Bombeo
- Prueba de Vacío y de Vacío Permanente
- Recuperación y Uso de Botellas de Recuperación
- Juego de Manómetros de Refrigerante y Conexión y Desconexión de Manguera
- Posiciones de Válvulas de Servicio y Acceso a Puertos
- Preparación del Sistema para Refrigerante
- Carga y Recuperación de Refrigerante en un Sistema Activo
- Solución de Problemas de Carga de

Refrigerante y  
Funcionamiento del  
Sistema

On the basis of instrument electrical and automatic control system, the 5th International Conference on Electrical Engineering and Automatic Control (CEEAC) was established at the crossroads of information technology and control technology, and seeks to effectively apply information technology to a sweeping trend that views control as the core of intelligent manufacturing and life. This book takes a look forward into advanced manufacturing development, an area shaped by intelligent manufacturing. It highlights the application and promotion of process control represented by traditional industries, such as the steel industry and petrochemical industry; the technical equipment and system cooperative control represented by robot technology and multi-axis CNC; and the control and support of emerging process technologies represented by laser melting and stacking, as well as the emerging industry represented by sustainable and intelligent

life. The book places particular emphasis on the micro-segments field, such as intelligent micro-grids, new energy vehicles, and the Internet of Things.

"En la red está tu oportunidad" es un "Libro-Blog" con aspectos autobiográficos, sencillo, fácil de leer y vinculado al Blog

www.enlaredestatuopuertoridad.com a través de los códigos QR. Cada código QR te vinculará al material multimedia alojado en mi sitio web, de esta forma, será más sencillo seguir los temas tratados. Esta tecnología consigue que este libro no se convierta en una edición extemporánea, me permitirá actualizar constantemente sus contenidos y así estar actualizado de continuo. Es una guía basada en algunas de las más populares aplicaciones que existen en Internet; aplicaciones que nos permitirán construir, con cierta facilidad, nuestro propio entorno virtual. Un entorno con la vista puesta en elaborar nuestra propia "Identidad Digital". Desde la elaboración de un blog, la programación de los códigos QR, la integración de mapas geolocalizados para obtener "callejeros virtuales", hasta los primeros pasos para trabajar en la denominada "nube", son algunos de

los capítulos que centrarán esta publicación, a su vez, podrás seguir las actualizaciones que efectúe en el blog. Intenta a su vez, poner en valor las enormes posibilidades que se abren con la correcta utilización de las Nuevas Tecnologías en el ámbito de la Sociedad del Conocimiento y de la Información. Animarte a sumergirte en el mundo del comercio electrónico, en el de las aplicaciones móviles, en el de los mapas virtuales, etc.. En definitiva, una guía imprescindible para aquellas personas que quieren estar presentes en Internet y no saben por dónde empezar, sin perder nunca de vista, que en la red está tu oportunidad.  Non-mammalian synapsids were the dominant terrestrial vertebrates from the Late Carboniferous to the Middle Triassic and play a key role in understanding the origin and evolution of mammals. Despite these facts and the outstanding fossil record of the group, early synapsids remain obscure. This book showcases the full breadth of contemporary research on non-mammalian synapsids, ranging from taxonomy and phylogenetics to functional morphology, biogeography, paleoecology, and

patterns of diversity. It also underscores the importance and potential of studying non-mammalian synapsid paleobiology in its own right, not just in the context of mammalian evolution.

 University of California Press  
 The Nasrid Kingdom of Granada (1232-1492) was the last Islamic state in al-Andalus. It has long been considered a historical afterthought, even an anomaly, but this impression must be rectified: here we place the kingdom in a new context, within the processes of change that were taking place across all Western Islamic societies in the late Middle Ages. Despite being the last Islamic entity in the Iberian Peninsula, Granada was neither isolated nor exclusively associated with the nearest Islamic lands. The special relationship between Nasrid territory and the surrounding Christian states accelerated historical processes of change. This volume edited by Adela Fábregas examines the Nasrid kingdom through its politics, society,

economics, and culture.
