Mental training is scarcely covered in the climbing literature, yet it is as important to performance as strength, flexibility, and technique. In his unique approach to mental training, Arno Ilgner draws essential elements from the rich "warrior" literature, as well as from sports psychology, and combines these with his extensive climbing experience to create The Rock Warrior's Way. Here is a comprehensive program for learning how to focus

your mental resources during a challenging climb. It includes step-by-step guidance on motivation analysis, information gathering, risk assessment, mental focus, and deliberate transition into action. Poor use of attention creates fear, which can manifest itself as anything from performance anxiety to sheer terror. By using attention more purposefully we can understand how fear is created, deal with it effectively, and free ourselves to get back in touch with a far more powerful motivating force: our love of climbing. We can then create the kind of unbending intention that leads to outstanding performance. The Rock Warrior's Way is a revolutionary program for climbers who want to improve both their performance and their enjoyment of climbing.

Contemporary sculptor Aron Demetz uses traditional techniques to create electrifying pieces in conversation with works of antiquity. Working primarily in wood, and specifically with basswood, cedarwood, and sequoia, Aron Demetz uses this traditional material to highlight man's relationship to nature. This volume compares Demetz's works with classical sculpture, opening a fascinating dialogue between modern and ancient forms and techniques. Hailing from Northern Italy, Demetz employs regional 17th-century woodcarving techniques in his figurative works. He updates those techniques by layering his sculptures with foils or resin or by charring the artworks which powerfully alter the original wood in ways that are both haunting and familiar. This volume, complete with beautiful reproductions and scholarly essays, offers an in-depth look into Demetz's oeuvre.

The real-life inspiration for modern-day mystery writer Elizabeth Peters's "Amelia Peabody" novels, celebrated Victorian adventuress Amelia Edwards enjoyed unexpected notoriety, for a woman, as a journalist, political activist, and world traveler. In 1872, she a female companion set off on a "ramble" through the nearly impassable Italian Dolomites, where food and shelter were chancy propositions but the scenery was gorgeous and the people friendly and welcoming. Edwards approached the expedition with humor and enthusiasm, as she regales us with the tale of the journey with the generous, vivacious spirit that made her one of her era's most daring women. - Back cover.

The Reenchantment of the World is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy. Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it, Berman shows how science acquired its controlling position in the consciousness of the West. He analyzes the holistic, animistic tradition--destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries--which viewed man as a participant in the cosmos, not as an isolated observer. Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment, he explores the possibilities for a consciousness appropriate to the modern era. Ecological rather than animistic, this new world view would be grounded in the real and intimate connection between man and nature.

In 1970, Chris Bonington and his now-legendary team of mountaineers were the first climbers to tackle a big wall at extreme altitude. Their target was the south face of Nepal's Annapurna: 12,000 feet of steep rock and ice leading to a 26,

454-ft. summit. As serious armchair climbers will tell you, Annapurna South Face is better than all but a handful of equally gripping classics. One could also argue that all that has happened in the big mountains in the past 30 years has come out of this expedition and out of this book. Bonington and his team—most of whom subsequently died in the mountains—represented a kind of "greatest generation" of modern mountaineers. They pioneered a new, bolder approach to high altitude climbing, and this book is about how they hit the big time.

A history of the nightclub from Studio 54 to the Double Club Nightclubs and discothèques are hotbeds of contemporary culture. Throughout the 20th century, they have been centres of the avant-garde that question the established codes of social life and experiment with different realities, merging interior and furniture design, graphics and art with sound, light, fashion and special effects to create a modern Gesamtkunstwerk. Night Fever: A Design History of Club Culture examines the history of the nightclub, with examples ranging from Italian nightclubs of the 1960s that were created by members of the Radical Design group to the legendary Studio 54 in New York, Philippe Starck's Les Bains Douches in Paris and the more recent Double Club in

London, conceived by German artist Carsten Höller for the Prada Foundation. Featuring films and vintage photographs, posters and fashion, *Night Fever* takes the reader on a fascinating journey through a world of glamour, subculture and the search for the night that never ends.

'A book grows rather like a snow crystal. One doesn't write it from start to finish but, in greater or less degree, all at the same time ... that is why my book is not in chronological order; for everything is of the present, held in the moment when thought captures it.' Kurt Diemberger's *Summits and Secrets* is a mountaineering autobiography like no other. Writing anecdotally, Diemberger provides an abstract look into his life and climbing career that is both fascinating and awe-inspiring to navigate. Known for surviving the 1986 K2 disaster - an account described in harrowing detail in his award-winning book *The Endless Knot* - Diemberger provides a captivating insight into his earlier climbs in *Summits and Secrets*. From climbing his first peak in the Tyrol mountains of Austria, to the epoch-making first ascent of Broad Peak with Hermann Buhl in 1957, and then summiting Dhaulagiri

in 1960, where he became one of only two people to have made first ascents of two mountains over 8,000 metres, Diemberger recounts his experiences with wit, honesty and an infectious enthusiasm: 'Every climber knows the thrill ... the unique inexplicable tension, which the regular shapes of the mountain world awake in him: huge pyramids, enormous rectangular slabs, piled-up triangles of rock, white circles, immense squares - the thrill of simplicity of shape and outline and the excitement of mastering them, to an unbelievable extent, by his own efforts, his own power ... ' *Summits and Secrets* is a must-read for those wanting an insight into the life and achievements of one of the toughest high-altitude climbers the world has ever known.
