Since the original Photo Oops was published, Hilary has become a Senator, Arnold Schwarzenegger is in as Governor of California and a host of Democratic hopefuls have sprung up, earnest and unprepared. Quayle has flown the coop, and Clinton (metaphorically) has gone the way of all flesh. This revised update of

Photo Oops offers the quintessential images of today's politicians--trying their best to look honest and forthright, but luckily for us, failing miserably.

Sigmar Polke as photographer is both alchemist and precision artist; he does everything right and everything wrong. Working primarily with his own previously exposed images, he subjects them to an unprecedented degree of manipulation, including solarisation, chemical alterations, folding and physical manipulations of the paper, hand painting,

and multiple layering negatives. This publication presents the German artist's photographic works from the 1960s to the 1990s, including new, unpublished work completed in the winter of 1995. It includes essays and analyses, and also a chronological record of the artist's exhibitions.

"No one has photographed America as has David Plowden. ... He is one of the great artists of our time."—David McCullough
This beautiful volume is both a tribute to

and a celebration of the photographer who, more than anyone else, has given us a visual record of our mark on the land over the last half-century. David Plowden's beautiful black-and-white images reveal his great respect for man's ingenuity and honest work, documenting a disappearing landscape of industry, small towns, wonderful devices, and noble structures. David McCullough writes, "Plowden has produced some of the most powerful photographs we have of man-made America. He is propelled, driven, by a sense of time running out and the feeling that he must not just make a record, but confer a kind of immortality on certain aspects of American civilization before they vanish." As Walker Evans gave us the first half of the twentieth century, David Plowden has given us the second. David Plowden: Vanishing Point represents the best of this magnificent body of work.

Excerpt from *Picture-Making by Photography* Not always sufficiently distinguish between his own personality and that of the Roman Empire. I am afraid that the following chapters may be open

to a similar objection. I fear that a great deal more will be found concerning my own personality and productions than a modest writer would willingly admit; but this cannot easily be avoided. The nature of the information to be conveyed, and the lessons to be inculcated, demand that I should teach the results of my own experience, and suggest that the pictures which have been the outcome of that experience would be the most suitable illustrations. It will be evident that pictures which have been actually produced by photography will better show the peculiarities and limitations of the art than any other method of illustration. Millions of photos are taken every day across the world. Some are just snapshots. Others are more carefully crafted and have the capacity to deepen our vision and sharpen our sense of what life is truly about. *Spirituality in Photography* explores how photography can offer unique perspectives on the self, the world, and what we live by. Readers are invited to take photos more slowly, reframe their gaze, allow themselves to be fully present, and let their photos tell a story--this includes a section on how photography can offer new perspectives on the Bible. The book also explores how photography can help readers meditate on mystery and tune into their own 'rule of life.' *Spirituality in Photography* offers a range of ideas for readers to try out with their camera or smartphone and invites them on a journey of discovery, as they allow their photography and their spirituality to inspire each other.

Missing Pictures Sagwan Press
Historical photographs taken in Latin America have now become key sites for memory politics, ethnographic imagination, and the negotiation of identity. This volume opens up a set of questions relating to the contemporaneous agency of images as well as their current appropriation via new technologies. Case studies of pictures taken in Mexico, Colombia, Peru and Brazil analyze these processes by tracing how the images have been resignified over time and space. The contributions examine photographs that have been recently rediscovered by such diverse actors as European museums, human rights organizations, anthropologists, shamans, local historians, and communities of internet users.

As an artistic medium, photography is

uniquely subject to accidents, or disruptions, that can occur in the making of an artwork. Though rarely considered seriously, those accidents can offer fascinating insights about the nature of the medium and how it works. With *Inadvertent Images*, Peter Geimer explores all kinds of photographic irritation from throughout the history of the medium, as well as accidental images that occur through photo-like means, such as the image of Christ on the Shroud of Turin, brought into high resolution through photography. Geimer's investigations complement the history of photographic images by cataloging a corresponding history of their symptoms, their precarious visibility, and the disruptions threatened by image noise. Interwoven with the familiar history of photography is a secret history of photographic artifacts, spots, and hazes that historians have typically dismissed as "spurious phenomena," "parasites," or "enemies of the photographer." With such photographs, it is virtually impossible to tell where a "picture" has been disrupted—where the representation ends and the image noise begins. We must, Geimer argues, seek to

keep both in sight: the technical making and the necessary unpredictability of what is made, the intentional and the accidental aspects, representation and its potential disruption.

Serious Daring is the story of the complementary journeys of two American women artists, celebrated fiction writer Eudora Welty and internationally acclaimed photographer Rosamond Purcell, each of whom initially practiced, but then turned from, the art form ultimately pursued by the other. For both Welty and Purcell, the art realized is full of the art seemingly abandoned. Welty's short stories and novels use images of photographs, photographers, and photography. Purcell photographed books, texts, and writing. Both women make compelling art out of the seeming tension between literary and visual cultures. Purcell wrote a memoir in which photographs became endnotes. Welty re-emerged as a photographer through the publication of four volumes of what she called her "snapshots," magnificent black-and-white photographs of small-town Mississippi and New York City life. *Serious*

Daring is a fascinating look at how the road not taken can stubbornly accompany the chosen path, how what is seemingly left behind can become a haunting and vital presence in life and art.

Aby Warburg's Mnemosyne Atlas (1925-1929) is a prescient work of mixed media assemblage, made up of hundreds of images culled from antiquity to the Renaissance and arranged into startling juxtapositions. Warburg's allusive atlas

sought to illuminate the pains of his final years, after he had suffered a breakdown and been institutionalized. It continues to influence contemporary artists today, including Gerhard Richter and Mark Dion. In this illustrated exploration of Warburg and his great work, Georges Didi-Huberman leaps from Mnemosyne Atlas into a set of musings on the relation between suffering and knowledge in Western thought, and on the creative results of associative thinking. Deploying writing that delights in dramatic jump cuts reminiscent of Warburg's idiosyncratic juxtapositions, and drawing on a set of sources that ranges from ancient Babylon to Walter Benjamin, Atlas, or the Anxious Gay Science is rich in Didi-Huberman's trademark combination of elan and insight.

The Night Albums Nabu Press

An examination of the contradictions within a form of expression that is both public and private, specific and abstract, conventional and countercultural. Snapshots capture everyday occasions. Taken by amateur photographers with simple point-and-shoot cameras, snapshots often commemorate something

that is private and personal; yet they also reflect widely held cultural conventions. The poses may be formulaic, but a photograph of loved ones can evoke a deep affective response. In *Snapshot Photography*, Catherine Zuromskis examines the development of a form of visual expression that is both public and private. Scholars of art and culture tend to discount snapshot photography; it is too ubiquitous, too unremarkable, too personal. Zuromskis argues for its significance. Snapshot photographers, she contends, are not so much creating spontaneous records of their lives as they are participating in a prescriptive cultural ritual. A snapshot is not only a record of interpersonal intimacy but also a means of linking private symbols of domestic harmony to public ideas of social conformity. Through a series of case studies, Zuromskis explores the social life of snapshot photography in the United States in the latter half of the twentieth century. She examines the treatment of snapshot photography in the 2002 film *One Hour Photo* and in the television crime drama *Law and Order: Special Victims Unit*; the growing interest of collectors and

museum curators in “vintage” snapshots; and the “snapshot aesthetic” of Andy Warhol and Nan Goldin. She finds that Warhol’s photographs of the Factory community and Goldin’s intense and intimate photographs of friends and family use the conventions of the snapshot to celebrate an alternate version of “family values.” In today’s digital age, snapshot photography has become even more ubiquitous and ephemeral—and, significantly, more public. But buried within snapshot photography’s mythic construction, Zuromskis argues, is a site of democratic possibility.

Doris Ulmann (1882-1934) was one of the foremost photographers of the twentieth century, yet until now there has never been a biography of this fascinating, gifted artist. Born into a New York Jewish family with a tradition of service, Ulmann sought to portray and document individuals from various groups that she feared would vanish from American life. In the last eighteen years of her life, Ulmann created over 10,000 photographs and illustrated five books, including *Roll, Jordan, Roll* and *Handicrafts of the Southern Highlands*. Inspired by the paintings of the European old masters and by the photographs of Hill and Adamson and Clarence White, Ulmann produced unique and substantial portrait studies. Working in her Park Avenue studio

and traveling throughout the east coast, Appalachia, and the deep South, she carefully studied and photographed the faces of urban intellectuals as well as rural peoples. Her subjects included Albert Einstein, Robert Frost, African American basket weavers from South Carolina, and Kentucky mountain musicians. Relying on newly discovered letters, documents, and photographs—many published here for the first time—Philip Jacobs's richly illustrated biography secures Ulmann's rightful place in the history of American photography. *The Calotype Process* Down East Books Excerpt from *The Fine Art of Photography* The author's thanks are due to Mr. Henry R. In 1935 a fledging government agency embarked on a project to photograph Americans hit hardest by the Great Depression. Over the next eight years, the photographers of the Farm Security Administration captured nearly a quarter-million images of tenant farmers and sharecroppers in the South, migrant workers in California, and laborers in northern industries and urban slums. Of the roughly one thousand FSA photographs taken in Arkansas, approximately two hundred have been selected for inclusion in this volume. Portraying workers picking cotton for five cents an hour, families evicted from homes for their connection with the Southern Tenant Farmers Union, and the effects of flood and drought that cruelly

exacerbated the impact of economic disaster, these remarkable black-and-white images from Ben Shahn, Arthur Rothstein, Dorothea Lange, Walker Evans, Russell Lee, and other acclaimed photographers illustrate the extreme hardships that so many Arkansans endured throughout this era. These powerful photographs continue to resonate, providing a glimpse of life in Arkansas that will captivate readers as they connect to a shared past.
