O'Meara's thoughtful poem about the pandemic, quarantine, and the future suggests there is meaning to be found in our shared experience of the coronavirus and conveys an optimistic message about the possibility of profound healing for people and the planet. Her words encourage us to look within, listen deeply, and connect with ourselves and the earth in order to heal. O'Meara, a former teacher and chaplain and a spiritual director, clearly captures important aspects of the pandemic experience. Her words, written in March 2020 and shared on Facebook, immediately resonated nationally and internationally and were widely circulated on social media, covered in mainstream news media, and inspired an outpouring of creativity from musicians, dancers, artists, filmmakers, and more. A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary

opportunity when we make our work “open access”: digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.
