*The Child's Discovery of Death* Oxford University Press on Demand

For use in schools and libraries only. A young English boy decides to establish a sanctuary for an assortment of ghosts when the homes they have haunted are replaced by highways and other modern "improvements."

*Inventing Subjects* Basic Books

Robert Murphy was a professor of anthropology at Columbia before he developed a spinal tumour that progressed into quadriplegia. Here, he explores society's fears, myths and misunderstanding about disability, and the effect they have on the disabled person's identity and social standing.

*Dein KdF-Wagen* Gracewing Publishing

Routledge is now re-issuing this prestigious series of 204 volumes originally published between 1910 and 1965. The titles include works by key figures such as C.G. Jung, Sigmund Freud, Jean Piaget, Otto Rank, James Hillman, Erich Fromm, Karen Horney and Susan Isaacs. Each volume is available on its own, as part of a themed mini-set, or as part of a specially-priced 204-volume set. A brochure listing each title in the "International Library of Psychology" series is available upon request.

*Modeling and Simulation* Springer Publishing Company

"Structural unemployment, alarming changes in the environment, periodical signs of an imminent Stock Exchange crash, involvement in armed conflicts: we are faced with an increasingly complex world and the inadequacy of conventional ways of thinking is becoming progressively more evident. Although perfectly planned in itself, the consequences of any intervention to the intricate fabric can have fatal repercussions: feedbacks, time delays and delayed after-effects."--Back cover.

*The Logic Of Failure* Springer Science & Business Media

Articles on the socio-cultural identity of women in West Bengal, India. b)s.

**The Psychology of Death** Anthem Press

Your one-stop reference for Windows Server 2019 and PowerShell know-how *Windows Server 2019 & PowerShell All-in-One For Dummies* offers a single reference to help you build and expand your knowledge of all things Windows Server, including the all-important PowerShell framework. Written by an information security pro and professor who trains aspiring system administrators, this book covers the broad range of topics a system administrator needs to know to run Windows Server 2019, including how to install, configure, and secure a system. This book includes coverage of: Installing & Setting Up Windows Server Configuring Windows Server 2019 Administering Windows Server 2019 Configuring Networking Managing Security Working with Windows PowerShell Installing and Administering Hyper-V Installing, Configuring, and Using Containers If you're a budding or experienced system administrator looking to build or expand your knowledge of Windows Server, this book has you covered.

*Research in Religious Education* Hackett Publishing

Under Platform 13 at King's Cross Station there is a secret door that leads to a magical island . . . It appears only once every nine years. And when it opens, four mysterious figures step into the streets of London. A wizard, an ogre, a fey and a young hag have come to find the prince of their kingdom, stolen as a baby nine years before. But the prince has become a horrible rich boy called Raymond Trottle, who doesn't understand magic and is determined not to be rescued. Shortlisted for the Smarties Prize, *The Secret of Platform 13* is an exciting magical adventure from Eva Ibbotson, the award-winning author of *Journey to the River Sea*. 'This kind of fun will never fail to delight' Philip Pullman *Body Silent* John Wiley & Sons

Originally published in 1980, this seminal work was the first to introduce an ecological perspective into social work practice. The third edition expands and deepens this perspective, further developing the basic premise that, by being situated within the people:environment interface, the social work profession is distinct from other service professions. The book presents the "what" (theories and concepts) and the "how" (practice methods) to help people with their life stressors and, simultaneously, to influence communities, organizations, and policymakers to be

more responsive to them. In this edition, Gitterman and Germain examine major changes to our socioeconomic and political landscape. They restore a chapter on the history of social work practice, offering a view of the limited services for African Americans provided by settlements and charity organization societies. Building on the African American self-help and mutual aid traditions, this chapter traces the replication of a parallel social service system by African American leaders for their own communities. The chapter also addresses the impact of contemporary societal trends, including the global economy, immigration, cultural changes, and the technology revolution. In addition, it discusses current professional contexts of managed mental health care, evidence-based practice, and the professional uses of technology. A new chapter explores issues and processes embedded in assessment, practice monitoring, and practice evaluation. The volume continues to feature innovative schema for assessment and intervention with respect to stressful life transitions and traumatic events, environmental pressures, and dysfunctional interpersonal processes. Practice illustrations offer reflections of today's major social issues, such as AIDS, homelessness, and modern forms of violence.

**LebensWert** Bantam

Why do we make mistakes? Are there certain errors common to failure, whether in a complex enterprise or daily life? In this truly indispensable book, Dietrich Dörner identifies what he calls the "logic of failure"—certain tendencies in our patterns of thought that, while appropriate to an older, simpler world, prove disastrous for the complex world we live in now. Working with imaginative and often hilarious computer simulations, he analyzes the roots of catastrophe, showing city planners in the very act of creating gridlock and disaster, or public health authorities setting the scene for starvation. *The Logic of Failure* is a compass for intelligent planning and decision-making that can sharpen the skills of managers, policymakers and everyone involved in the daily challenge of getting from point A to point B.

*Exit House* McGraw-Hill Companies

The theory of practical rationality does not belong to one academic discipline alone. There are quite divergent

philosophical, economical, sociological, psychological and political contributions. Sometimes the disciplinary boundaries impede theoretical progress. On the other hand it is an indication for the high complexity of the subject that so many divergent paradigms compete with one another, or - what is worse - live separately in a kind of splendid isolation. Decision theory in the broader sense, embracing the theory of games and collective choice theory, can help to understand practical reason in philosophical analysis. But there are interesting aspects which cannot be dealt with adequately within a decision-theoretic conceptual framework. To have both of these convictions justifies to neglect disciplinary boundaries and poses a problem for the orthodoxies of either sides. All the essays of this volume focus on the relation between economic rationality and practical reason and discuss different aspects of the same problem, i. e. a basic deficiency in the standard economic theory of practical rationality. But philosophical analysis would not be of much help if it just rejected the economic paradigm. It must rather help to integrate economic aspects into a broader view on practical reason.

*Quaestiones de Notitia Dignitatum. Dissertatio inauguralis historica, etc* Routledge

Models and simulations of all kinds are tools for dealing with reality. Humans have always used mental models to better understand the world around them: to make plans, to consider different possibilities, to share ideas with others, to test changes, and to determine whether or not the development of an idea is feasible. The book *Modeling and Simulation* uses exactly the same approach except that the traditional mental model is translated into a computer model, and the simulations of alternative outcomes under varying conditions are programmed on the computer. The advantage of this method is that the computer can track the multitude of implications and consequences in complex relationships much more quickly and reliably than the human mind. This unique interdisciplinary text not only provides a self contained and complete guide to the methods and mathematical background of modeling and simulation software (SIMPAS) and a collection of 50 systems models on an accompanying diskette. Students from fields as diverse as ecology and economics will find this clear interactive package an instructive and engaging guide.

### **The Summer of Theory** Ayer Publishing

In this extensively updated and revised edition, Dr. Kastenbaum continues to examine and expand upon issues of dying and the ways in which we shape and reshape our conceptions of death. New to the Third Edition are chapters on how we construct death; Death in adolescence and adulthood including discussion on suicide, physician assisted death and Regret Theory and Denial; new approaches to the role of death anxiety, Terror Management Theory, and Edge Theory, and much more. A major contribution to the literature -- this book is must reading for professionals and students of psychology, thanatology, gerontology, social work, and those working in hospice care.

*death and identity* John Wiley & Sons

Essays by the author of *Solaris*: "Lem's delightful sense of humor accentuates his essential seriousness about humanity's possible fate" (Publishers Weekly). In *One Human Minute*, Stanislaw Lem takes a hard look at our world and technology—what it means now and what dire implications it could have for the future—in satirical, wise, and biting prose. With this collection of three essays, Lem targets some of the most pressing issues humanity faces, from our unsettling origins to the cybernetic future of our weaponry. "The Upside-Down Evolution" chronicles the Earth's military evolution from nuclear stockpiles to deadly, robotic microweapons. "The World as Cataclysm" examines how humankind's dominance on Earth is the result of the extermination of another species just as qualified to rule the world. And the title essay presents a disturbing and fascinating snapshot of every single thing happening on the planet in a sixty-second span. Effortlessly blurring the lines between fiction and nonfiction, scientific essay and fantastical short story, cynical reproach and wry humor, Lem's *One Human Minute* combines the best elements of the renowned science fiction author and Kafka Prize winner's writing into one irreverent and intellectually stimulating package.

*LebensWert neu* Lang, Peter, GmbH, Internationaler Verlag Der Wissenschaften

Years ago, terminally ill Jo Roman bravely brought the subject of suicide from the shadows into the clear white light of reason. The subject of the PBS documentary *Choosing Suicide*, she devoted the last months of her life to writing this moving plea for the right to decide the length of one's life span. Long out of print, *Exit*

House is about living life on one's own terms. 8 pages of photographs.

**LebensWert** Oxford University Press, USA

A fluent and accurate new translation of the dialogue that, of all Plato's works, has seemed to speak most directly to the interests of contemporary and analytical philosophers. White's extensive introduction explores the dialogue's central themes, its connection with related discussions in other dialogues, and its implication for the interpretation of Plato's metaphysics.

*Corpus Cultus Cybelae Attidisque (CCCA)* Schocken

A collection of articles by scientists, clinicians, and educators discussing clinical and empirical findings and new perspectives on death.

*LebensWert 2. Niedersachsen* Pan Macmillan

'Theory' - a magical glow has emanated from this word since the sixties. Theory was more than just a succession of ideas: it was an article of faith, a claim to truth, a lifestyle. It spread among its adherents in cheap paperbacks and triggered heated debates in seminar rooms and cafés. The Frankfurt School, Structuralism, Post-Structuralism, Adorno, Derrida, Foucault: these and others were the exotic schools and thinkers whose ideas were being devoured by young minds. But where did the fascination for dangerous thoughts come from? In his magnificently written book, Philipp Felsch follows the hopes and dreams of a generation that entered the jungle of difficult texts. His setting is West Germany in the decades from the 1960s to the 1990s: in a world frozen in the Cold War, movement only came from big ideas. It was the time of apocalyptic master thinkers, upsetting reading experiences and glamorous incomprehensibility. As the German publisher Suhrkamp published Adorno's *Minima Moralia* and other High Theory works of the Frankfurt School, a small publisher in West Berlin, Merve Verlag, provided readers with a steady stream of the subversive new theory coming out of France. By following the adventures of the publishers who provided the books and the reading communities that consumed and debated them, Philipp Felsch tells the remarkable story of an intellectual revolt when the German Left fell in love with Theory.

*Ideologie--Sport--Aussenseiter* Columbia University Press

"Two novellas on the theme of the relationship of fathers to daughters. The first is about a daughter lost in a mountain climbing accident. The second is about a daughter saved." --

*The Art of Interconnected Thinking* CRC Press

This volume collects some of the leading essays in contemporary democratic theory published since 1970. The anthology presents

the work of a select group of contributors and covers many foundational approaches defended by scholars from a range of different disciplines.

[Economic Rationality and Practical Reason](#) HMH
