Abitbol, a lifetime student

of the human voice, takes

readers on an unforgettable odyssey spanning man's first use of voice through the acquisition of language to the use of voice as an expression of self. With great wit and charm, Dr. Abitbol's narrative encompasses everything from the psychological to

the physiological, from explaining the workings of the voice to celebrating the human voice's highest achievements. He describes a fascinating history of the voice, its origins, its course since the Homo Sapiens' first sentences, its episodes of hoarseness, and its

achievements, from the newborn cry to the coloratura soprano, from the impersonator to the ventriloquist. After exploring what is known about the voice, Dr. Abitbol tells us what our voices are capable of. He examines what he describes as "the magic of the voice": the voice as a fingerprint, a reflection of our personality in expressing our sex and sexuality. A great portion of this odyssey is devoted to singing and singers, both to the complexity of singing in general and to

lyrical singing, the intricacies of which requires participation of the mechanical, emotional, and cerebral systems. The mysteries of the voice unfold as Dr. Abitbol guides readers through the latest physiological and pathological research using examples of historical figures', patients', and celebrities' voices to explain how the ways in which the body moves affect the way the voice sounds and how vocal quality is unique to each human being. A

unique tour de force of the human vocal instrument, *Odyssey of the Voice* changes the way we think about our voices.

The study of French culture has long ceased to be purely centred on literature. Undergraduate French courses now embrace all forms of cultural production and consumption, and students need to have a broad knowledge of everything from day-time TV and the latest

detective novels to debates about national identity and immigration policies. This stimulating text is an introduction to the full range of contemporary French culture. Written by a group of leading academics both within and outside France, each chapter focuses on a topic from the French cultural scene today. Starting with an overview of resources for further information (both in print and online), the text discusses the varied forms of French cultural expression and

looks critically at what 'Frenchness' itself means. The book also explores examples of cultural production ranging from sport, media and literature to theatre, cinema, festivals and music. An essential resource for students and scholars alike, this text provides detailed material and analysis, as well as a launch-pad for further study.

This book sheds a new light on the metafictional

aspects of futuristic and science fiction novels, at the crossroads of information and media studies, possible worlds theories applied to cognitive narratology, questions related to the criticism of post-humanity, and, more broadly, contemporary French and Francophone literature. It examines the fictional minds of characters and their conceptions of resistance to the anticipated worlds they inhabit, particularly in novels by Pierre Bordage, Marie

Darrieussecq, Michel Houellebecq, Amin Maalouf, Jean-Christophe Rufin, Antoine Volodine, and Élisabeth Vonarburg. It also explores how corporal postures serve as a matrix for philosophical quests in novels by Amélie Nothomb, Alain Damasio, and Romain Lucazeau. More specifically, from the fictional readers' points of view, it provides a critical approach to the mythologies of writing, in the wake of the French philosophical tales by authors including Cyrano

de Bergerac and Voltaire, to question the traditionally expressed formulations of the mythologies of writing, that is, of the metaphors of the book (the book of life, nature, and the world), to rethink the idea of a humanity within its limits.

Comptes-rendus de L'Athénée Louisianais

Wipf and Stock Publishers People, young and old, need stars to guide them. They need models to construct their own identity, to build their self-esteem, to change the

way they see the world and to overcome their own and others' prejudice. During my childhood, many stars were pointed out to me. I admired them, dreamt about them: Socrates, Baudelaire, Einstein, Marie Curie, General de Gaulle, Mother Teresa... But nobody ever spoke to me about black stars. The world of my education was white, from the colour of the school walls to the pages of my textbooks. I knew nothing about my own ancestors. Slavery was the only black subject

ever mentioned. In this vision, the history of Black people could only ever be a vale of tears and strife. Can you tell me the name of a black scientist? A black explorer? A black philosopher? A black pharaoh? If you don't know the answer to these questions, then, whatever the colour of your skin, this book is for you. Because the best way to fight racism and intolerance is to educate ourselves and to broaden our imaginations. The portraits of the men and women in this book are a

product of my own reading and my interviews with scholars. Starting with Lucy and ending with Barack Obama, and along the way meeting Aesop, Dona Béatrice, Pushkin, Anne Zingha, Aimé Césaire, Martin Luther King and many others. These stars have allowed me to reject the idea that I am a victim, to renew my faith in mankind and, above all, to believe in myself. - Lilian Thuram This translation of Lilian Thuram's bestselling 2010 volume, Mes Etoiles

Noires, by Laurent Dubois (University of Virginia), finally brings his anti-racism work to the attention of an English-language audience (the book has already been translated into several European languages). At a time when the Black Lives Matter movement has reminded us of the need to tell more complex stories about our shared past, this volume constitutes a timely intervention by a prominent black sporting figure.

My Black Stars Springer Nature
Populism is an expression of anger; its appeal stems

from being presented as the solution to disorder in our times. The vision of democracy, society, and the economy it offers is coherent and attractive. At a time when the words and slogans of the left have lost much of their power to inspire, Pierre Rosanvallon takes populism for what it is: the rising ideology of the twenty-first century. In *The Populist Century* he develops a rigorous theoretical account of populism, distinguishing five key features that make up populist political

culture; he retraces its history in modern democracies from the mid-nineteenth century to the present; and he offers a well-reasoned critique of populism, outlining a robust democratic alternative. This wide-ranging and insightful account of the theory and practice of populism will be of great interest to students and scholars in politics and the social sciences and to anyone concerned with the key political questions of our time.

The most incisive indictment against Christianity resides in the notion of a God who created a world in which there is untold suffering and death. Is this the best God could do? In response, most Christians will mutter something about free will or the necessity of evil to bring about God's plan for humanity. Theologians often reply by challenging the very legitimacy of the question; God only requires that we

persevere. Biblical scholars, who might otherwise be expected to offer a scriptural perspective, nervously denounce any suggestion that the presence of evil may have had something to do with a primordial couple and a fruit tree. Is it any wonder that most people believe that evil must surely be an intractable component of human existence introduced, perhaps, by the very God Jews and Christians worship? This book is a response to the problem of evil that

unconditionally affirms the goodness and power of God. Based on a new assessment of the Genesis creation story, one of the greatest texts ever to have emerged in human history, the author contends that God never intended for humanity to experience suffering and death.

In this book some 25 scholars focus on the

relationship between religion, children's literature and modernity in Western Europe since the Enlightenment (c. 1750). They examine various aspects of the phenomenon of children's literature, such as types of texts, age of readers, position of authors, design and illustration. The role of religion in giving meaning both in a substantive sense as well as through the institutionalised churches is studied from an interdenominational point of view (Judaism, Roman

Catholicism, Protestantism and Anglicanism). Finally, the contribution of pedagogy and child psychology in the interaction between modernity, religion and children's literature is also discussed. Various articles give a broad overview of the tensions between aesthetics and ethics and the demand for cultural autonomy in the development of children's literature. Children's bibles and missionary stories played an important part in the growing diversification of

children's literature, as did the publication of illustrated reviews for children. Remarkable differences are highlighted in the involvement of religious societies and institutions, episcopally approved publishing houses and supervisory bodies in the publication, distribution and supervision of children's literature. This volume adopts a comparative approach in exploring the underlying religious, ideological and cultural dimensions of children's literature in

modern society.)

 Virtues are values underlying human practices. We are at the dawn of a new era, an era of global ethics requiring some core virtues. These core virtues are hospitality, co-living, respect, tolerance, and

communality. Book 1 treats the virtue of hospitality that is a right and a duty of all, and which is still to be discovered and practiced unconditionally. Book 2 deals with the virtues of co-living, respect, and tolerance, which are important virtues if the peoples of the earth are to live together in peace in our common home, the planet Earth. Finally, Book 3 deals with the virtue of communality; this is a very important virtue because a large part of humanity experiences

hunger and thirst, which is something scandalous in this day and age, and which demonstrates a lack of humanity, because we possess the technical means and political framework to resolve this situation. If these core virtues become a reality, they will transform human practices into something beneficial both to human beings and to the planet Earth, our common home. Odyssey of the Voice Oxford University Press Hailed as one of the key theoreticians of

modernism, Eugène-Emmanuel Viollet-le-Duc was also the most renowned restoration architect of his age, a celebrated medieval archaeologist and a fervent champion of Gothic revivalism. He published some of the most influential texts in the history of modern architecture such as the Dictionnaire raisonné de l'architecture française du XIe au XVIe siècle and Entretiens sur l'architecture, but also studies on warfare, geology and racial history.

Martin Bressani expertly traces Viollet-le-Duc's complex intellectual development, mapping the attitudes he adopted toward the past, showing how restoration, in all its layered meaning, shaped his outlook. Through his life journey, we follow the route by which the

technological subject was born out of nineteenth-century historicism.
