Mobile plant and machinery daily compliance inspection diary. The daily inspections cover some of the most important safety checks that need to be performed in order to meet health, safety and environmental compliance standards for your site or operation. There are also several blank fields where you can add your own custom inspections. This inspection book is designed to make life more straightforward for site managers and health and safety managers.

NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial

and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.
