### GRIMES JOSHUA

#### Education in a New South Africa AOSIS

Higher education systems around the world are undergoing fundamental change and reform due to external pressures—including internationalization of higher education, increased international competition for students, less reliance on public funding, and calls to create greater access opportunities for citizens. How are higher education systems evolving structurally as a result of these and other pressures? In light of these changes, how can higher education be a positive force for democratizing societies? This book examines the emerging trends taking place in higher education systems around the world, focusing on the most salient political and social forces that underlie these trends. Each chapter provides a case study of a country, exploring its cultural and political history, the political and social developments that have affected its higher education system, and the result of these changes on the higher education system. In a fast-changing, knowledge-intensive, democratic society, Democratizing Higher Education explores how higher education systems can be developed to provide access, affordability, participation, and quality life-long learning for all.

*Better Choices* OECD Publishing

This book deals with the relevance of recognition and validation of non-formal and informal learning education and training, the workplace and society. In an increasing number of countries, it is at the top of the policy and research agenda ranking among the possible ways to redress the glaring lack of relevant academic and vocational qualifications and to promote the development of competences and certification procedures which recognise different types of learning, including formal, non-formal and informal learning. The aim of the book is therefore to present and share experience, expertise and lessons in such a way that enables its effective and immediate use across the full spectrum of country contexts, whether in the developing or developed world. It examines the importance of meeting institutional and political requirements that give genuine value to the recognition of non-formal and informal learning; it shows why recognition is important and clarifies its usefulness and the role it serves in education, working life and voluntary work; it emphasises the importance of the coordination, interests, motivations, trust and acceptance by all stakeholders. The volume is also premised on an understanding of a learning society, in which all social and cultural groups, irrespective of gender, race, social class, ethnicity, mental health difficulties are entitled to quality learning throughout their lives. Overall the thrust is to see the importance of recognising non-formal and informal learning as part of the larger movement for re-directing education and training for change. This change is one that builds on an equitable society and economy and on sustainable development principles and values such as respect for others, respect for difference and diversity, exploration and dialogue.

*The Skills Balancing Act in Sub-Saharan Africa* Pan Macmillan South africa

This 2015 OECD Economic Survey of South Africa examines recent economic developments, policies and prospects. Special chapters cover infrastructure and business regulation; tax policy and inclusive growth.

*Local Economic and Employment Development (LEED) Engaging Employers in Apprenticeship Opportunities Making It Happen Locally* UNESCO Publishing

African Pentecostal Theology: Modality, Disciplinarity, and Decoloniality explores research methodology, theological disciplines, and contextualization as important aspects in the process of studying Pentecostal theology in an African context. Mookgo Solomon Kgatle outlines different data collection and data analysis methods, including the skills of interpreting and presenting research findings in a responsible manner. This book illustrates that Pentecostal theology, given its

pneumatological approach, goes beyond conventional theological disciplines in transdisciplinary research. The development of knowledge in African Pentecostal Theology should recognize African Indigenous Knowledge Systems (AIKS), African oral and traditional cultures, and African indigenous languages to be relevant to Africans. Pentecostal theologians from different theological disciplines in Africa and globally will find this book a worthwhile read.

*Getting Skills Right: South Africa* IGI Global

In *Bombardier Abroad*, Thomas examines several cases of the Canadian aerospace giant's work in the high-speed rail sector in South Africa, China/Tibet, and Israel/Palestine and argues that these projects are deepening existing social and political tensions. By participating in these infrastructure projects, Thomas argues, Bombardier is both inserting itself into highly contested social and political climates and profiting from actions that further exacerbate existing conditions of dispossession and inequality. Thomas also examines the various ways in which the Canadian state supports the work of Bombardier in these countries. Centred around a theoretical framework that combines concepts of dispossession, political economy and important interventions from the field of settler colonial studies, *Bombardier Abroad* is a critical look at the problematic practices of a Canadian corporation and the ways in which the Canadian state is culpable.

*Global Perspectives on Recognising Non-formal and Informal Learning* World Bank Publications  
 Invasive species are among the greatest challenges to environmental sustainability and agricultural productivity in the world. One of the most promising approaches to managing invasive species is voluntary citizen stewardship. However, in order for control measures to be effective, private citizens often need to make sustained and sometimes burdensome commitments. *Community-Based Control of Invasive Species* is based on five years of research by leading scholars in natural resource and human behavioural sciences, which involved government and citizen groups in Australia and the United States. It examines questions including, 'how can citizens be engaged in voluntarily managing invasive species?', 'what communication strategies will ensure good motivation and coordination?' and 'how can governing bodies support citizens in their efforts?'. With chapters on institutional frameworks, changing governance, systems thinking, organisational learning, engagement, communication and behavioural change, this book will be a valuable reference for researchers and practitioners involved in natural resources management.

*Handbook of Research on Inclusive and Accessible Education* Routledge

'A must-read, accessible and skilful account of South Africa's socio-economic challenges, policy and governance choices.'- THEMBA MASEKO All the numbers on South Africa's crisis dashboard are blinking red. The economy is failing to grow and more and more young people find themselves on the outside looking in as education falters and jobs disappear. Energy and transport are in crisis. Governance is floundering as debt mounts and government runs out of money. *Better Choices* is a collection by South Africa's top thinkers on the political economy, providing an unflinching account of the myriad challenges the country faces. The picture that emerges is of a nation on the brink of a catastrophic slide into failure unless better, if tough, policy choices are made. As stark as these problems are, their solutions are tantalisingly close at hand. The chapters in this book outline exactly the solutions - those 'better choices'- that need to be made by leadership to alter the country's bleak trajectory. South Africa cannot talk its way out of trouble. Key to success is removing the sources of friction - the red tape, over-regulation and rents - that slow down investment. This is only possible if a more effective, focused government acts decisively. Compiled by The Brenthurst Foundation, Africa's leading think tank on economic development, *Better Choices* is for those who want to build a positive, inclusive future for South Africa.

*Annual Report* CSIRO PUBLISHING

While sharing some characteristics with other middle-income countries, South Africa is a country with a unique economic history and distinctive economic features. It is a regional economic

powerhouse that plays a significant role, not only in southern Africa and in the continent, but also as a member of BRICS. However, there has been a lack of structural transformation and weak economic growth, and South Africa faces the profound triple challenges of poverty, inequality, and unemployment. Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments, robust empirical evidence, and rigorous analysis of South Africa's complex economic landscape. This volume seeks to provide a wide-ranging set of original, detailed, and state-of-the-art analytical perspectives that contribute to scientific knowledge as well as to well-informed and productive discourse on the South African economy. While concentrating on the more recent economic issues facing South Africa, the handbook also provides historical and political context. It offers an in-depth examination of strategic issues in the country's key economic sectors, and brings together diverse analytical perspectives.

*African Youth and the Persistence of Marginalization* Rowman & Littlefield

This book develops the core system science needed to enable the development of a complex industrial internet of things/manufacturing cyber-physical systems (IIoT/M-CPS). Gathering contributions from leading experts in the field with years of experience in advancing manufacturing, it fosters a research community committed to advancing research and education in IIoT/M-CPS and to translating applicable science and technology into engineering practice. Presenting the current state of IIoT and the concept of cybermanufacturing, this book is at the nexus of research advances from the engineering and computer and information science domains. Readers will acquire the core system science needed to transform to cybermanufacturing that spans the full spectrum from ideation to physical realization.

**Community-based Control of Invasive Species** IGI Global

This handbook provides foundational, conceptual, and practical knowledge and understanding of inclusive education and special needs education. It highlights the need for preparing special educators and teachers for inclusive classrooms to effectively cater to the needs of students with diverse needs in various low-, middle-, and high-income countries globally. It demonstrates various evidence-based and practice-based strategies required to create classrooms inclusive of diverse learners. While tracing the historical trajectory of the foundational underpinnings, philosophical bases, and crucial issues associated with inclusive education, this book presents a future roadmap and pathways through case instances and in-depth discussions to share with educators how they can strengthen their bases and make learning more inclusive in their context. It also provides an overview of the different models of assessment and their applications in the analysis of children in inclusive classroom settings. Comprehensive, accessible, and nuanced, this handbook will be of immense interest and benefit to teachers, educators, special educators, students, scholars, and researchers in the areas of social inclusion, education, special needs education, educational psychology, technology for inclusion, disability studies, among other related disciplines. It will be extremely beneficial for academicians, teacher educators, special educators, and those interested in professional teacher training courses.

**OECD Economic Surveys: South Africa 2017** Routledge

Over the last two decades, South Africa has accomplished enormous social progress by bringing to millions of citizens access to key public services. Nevertheless, growth has trended down markedly recently due to constraints on the supply side. Low growth has led to the stagnation of GDP per ...

*The Effective Facilitator's Handbook* IGI Global

"UNESCO has recently published the third volume of its Education on the Move series, a series dedicated to the analysis of key trends in education with the hope of inspiring dialogue among policy makers, educators and other key stakeholders on the challenges of education for tomorrow. The latest publication, entitled Unleashing the Potential: Transforming Technical and Vocational Education and Training is focused entirely on issues related to technical and vocational education and training (TVET). It takes stock of the steadily increasing demands and expectations on TVET systems around the globe and presents recent policy trends in the field of TVET. In their analysis, the authors provide insights into what it takes to unleash the potential of TVET systems around the world. They propose an integrated analytical approach that takes into consideration such factors as economic growth, social equity and issues related to sustainability so that TVET can contribute more effectively to contemporary policy issues such as youth unemployment, gender disparities and climate change. Overall, the book calls for a transformation of TVET systems to enable them to respond to the demands of their contexts. This transformation should enable TVET systems to acquire agility to stay current and responsive to the rapidly changing demands of the twenty-first century."--Publisher's website.

*Factors in Studying Employment for Persons with Disability* African Minds

This joint OECD-ILO publication provides guidance on how local and regional governments can foster business-education partnerships in apprenticeship programmes and other types of work-based learning, drawing on case studies across nine countries.

*Issues in Career, Technical and Vocational Education and Training* Taylor & Francis

Many students across the globe seek further education for future employment opportunities. Vocational schools offer direct training to develop the skills needed for employment. New emphasis has been placed on reskilling the workforce as technology has infiltrated all aspects of business. Teachers must be prepared to teach these new skill requirements to allow students to directly enter the workforce with the necessary competences intact. As the labor market and industry are changing, it is essential to stay current with the best teaching practices within vocational education courses to provide the future workforce with the proper tools and knowledge. The Research Anthology on Vocational Education and Preparing Future Workers discusses the development, opportunities, and challenges of vocational education courses and how to best prepare students for future employment. It presents the best practices in curriculum development for vocational education courses and analyzes student outcomes. Covering topics such as industry-academia

collaboration, student satisfaction, and competency-based education, this major reference work is an essential resource for academic administration, pre-service teachers, educators of vocational education, libraries, employers, government officials, researchers, and academicians.

**Change Management in TVET Colleges** Cambridge University Press

South Africa is characterised by a youthful population, and the challenges and possibilities that characterise the young generation are both warning signs and beacons of hope for a nation founded on social justice. Youth in South Africa: Agency, (in)visibility and national development takes stock of the nation's development as it affects young people. Authors offer both personal and professional insights into the ways in which the youth navigate their own pathways to adulthood. These include formal and informal engagements with politics, as well as protest, (un)employment, entrepreneurship, education, religion, experiences with sexuality and violence and a multitude of other life experiences. Contributors paint a picture of the initiative, agency and resilience of the youth, as well as the challenges before them. Authors also identify the state of "waithood" faced by those unable to make the transition out of youth into full adulthood as a result of their socio-economic circumstances and political context. By engaging these experiences and insights, and primarily informed by the inputs of young people, the authors highlight the limitations of existing youth policies and frameworks. The case is made for policy instruments to be informed by the lived experiences of the youth as they navigate a complex macrosocial environment, and by the messages the youth communicate about the limitations of current approaches.

**The Oxford Handbook of the South African Economy** Oxford University Press

The purpose of education has been debated in recent years, especially surrounding its curriculum and structure. In order to fully understand this discussion, the relationship between education and the labor market must be explored. Global Perspectives on Work-Based Learning Initiatives is a pivotal reference source that provides vital research on recent progress in selected countries across the globe in educational programs designed to better prepare students for the workforce through the use of work-related learning. While highlighting topics such as degree apprenticeships, integrated learning strategy, and economic development, this book is ideally designed for education administrators, professors, business and education professionals, academicians, researchers, and graduate-level students seeking current research on the relationship between the education and labor market.

**Annual Performance Plan** Emerald Group Publishing

Through a critical review of existing related theories and models, the authors address gaps in existing workforce management studies and propose a conceptual model to improve the management of workers in the construction industry.

*Youth In South Africa* Academic Conferences and publishing limited

21st-century educators face a new frontier beyond the boundaries of traditional teaching practice and pedagogical praxis. Imagination Creativity Education (ICE) creates fresh opportunities for teachers who are committed to genuine, empowering, experiential learning. In *Crushing ICE: Short-on-Theoretical, Long-on-Practical Approaches to Imagination Creativity Education*, teachers will discover how to: • take risks and transition with confidence from conventional to imaginative and creative approaches • promote collaborative learning • enrich the efficacy, esteem, and identity of learners • implement learning-centred strategies, activities, and practices informed by diverse theoretical perspectives • advance meaningful inquiry and relational learning that engages learners at a deep level Every day, teachers—confronted with student exceptionalities, multi-age groupings, overemphasis on provincial standardized testing, and intransigent administrative practices and directives—struggle to promote curiosity, imagination, creativity, innovation, creative process, and risk-taking in their classrooms. ICE teaches a practical, alternative approach that recognizes the importance of these constructs within the self as teacher, the other as learner, and all together in a community of learnership. An exposition of ICE, *Crushing ICE* shows educators how to challenge the status quo enroute to fostering innovative learning in regular courses, visual-arts, performing arts, and educational transitions. This book is an instructional resource text focused on pre-service and in-service teachers for creativity-based education. *Crushing ICE* is a unique compilation of scholarly yet practical writings by nationally and internationally recognized teachers and teacher educators who present a predominantly pan-Canadian perspective. It can equally serve as a supplementary text or core text in university courses.

**Annual Report** African Books Collective

Adult learning systems play a crucial role in helping people adapt to the changing world of work and develop relevant skills. Community Education and Training has been brought forward as a possible way to foster adult learning in South Africa, especially among disadvantaged groups. South Africa ...

**Construction Workforce Management in the Fourth Industrial Revolution Era** African Minds

Technical and vocational education and training at technical schools are major contributing factors in combating poverty, unemployment, and inequality. The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace. As the Fourth Industrial Revolution continues to create more radical changes in the labor market, experts are calling for a reform of education, including vocational education and training and adult and professional education. New Models for Technical and Vocational Education and Training is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students' chances of employability and entrepreneurship in Industry 4.0. The book explores knowledge in respect to workforce preparation, digital skills development, teaching and learning of TVET, flexibility and articulation of TVET to respond to work-integrated learning, and reskilling and upskilling to avoid skill mismatches. It is ideal for TVET schools, academicians, curriculum designers, managers, training officers, administrators, vocational professionals, researchers, and students.
