## DUDLEY ESCOBAR

### Dibujo y pintura 1 Editorial UNED

A magnificent epic of cataclysmic upheaval and heroic love in a breathless age of mythic wonders It was a time of legend, when the last shadows of the mighty Roman conqueror faded from the captured Isle of Britain. While, across a vast sea, bloody war shattered a peace that had flourished for two thousand years in the doomed kingdom of Atlantis. From the award-winning author of THE DRAGON KING TRILOGY comes a majestic tale of breathtaking scope and haunting beauty. It is the remarkable adventure of Charis—the courageous princess from Atlantis who escapes the terrible devastation of her land—and of the fabled seer and druid prince Taliesin, singer at the dawn of the age. A story of an incomparable love that joins two astonishing worlds amid the fires of chaos, and spawns the miracles of Merlin . . . and Arthur the king! TALIESIN “Reminiscent of C. S. Lewis . . . Highly recommended.” —Library Journal

En esta obra, un grupo de medievalistas realiza un balance de la enseñanza de la Historia Medieval en las aulas de los institutos de secundaria a través de uno de los principales materiales a disposición de los profesores: los libros de texto. A través de ellos, se trata de constatar qué tendencias están presentes en la docencia de la historia medieval en la enseñanza secundaria, y si esa Historia Medieval responde adecuadamente a la renovación de las tendencias historiográficas y docentes de los últimos treinta años en España. Además, se proporcionan materiales que el profesor pueda utilizar con sus alumnos, tanto bibliográficos como gráficos y audiovisuales, con una especial incidencia en los trabajos prácticos a través de Internet y de los videojuegos.

This book describes how different nations have defined the core competencies and skills that young people will need in order to thrive in the twenty-first-century, and how those nations have fashioned educational policies and curricula meant to promote those skills. The book examines six countries—Chile, China, India, Mexico, Singapore, and the United States—exploring how each one defines, supports, and cultivates those competencies that students will need in order to succeed in the current century. Teaching and Learning for the Twenty-First Century appears at a time of heightened attention to comparative studies of national education systems, and to international student assessments such as those that have come out of PISA (the Program for International Student Assessment), led by the Organisation for Economic Co-operation and Development. This book's crucial contribution to the burgeoning field of international education arises out of its special attention to first principles—and thus to first questions: As Reimers and Chung explain, "much can be gained by an explicit investigation of the intended purposes of education, in what they attempt to teach students, and in the related questions of why those purposes and how they are achieved." These questions are crucial to education practice and reform at a time when educators (and the students they serve) face unique, pressing challenges. The book's detailed attention to such questions signals its indispensable value for policy makers, scholars, and education leaders today.

Children Draw is a concise, richly illustrated book, aimed at parents, teachers, and caretakers, that explores why children draw and the meaning and value of drawing for youngsters—from toddlers aged two to pre-adolescents aged twelve. Informed by psychology and practical teaching with children, it guides readers through the progressive stages and characteristics of drawing development as children grow and change mentally, physically, socially, emotionally, and creatively. It offers parents tips about encouraging children to express their ideas visually, age-appropriate art materials, workspaces, and different media, as well as suggestions for making an art museum visit more meaningful—not to mention more fun—for both parents and kids. Packed with many delightful examples of children's art, Children Draw is an essential book for parents interested in their child's art activities.

Advanced art education is in the process of developing research programs throughout Europe. What does the term research actually mean in the practice of art? What is the relation to the scientific methods of alpha, beta or gamma sciences, directed toward knowledge production and the development of a certain scientific domaine? What will be the influence of scientific research on the art forms?

The huge and fractured literature on adolescence challenges both students and scholars. For students there is too much to learn and too little coherence across topics to enable deeper understanding. For scholars, there are few integrative visions to connect minitheories, research programs, and practical concerns. In the first edition of this advanced text, Moshman provided a constructivist synthesis of the literatures of cognitive, moral, and identity development, from the classic universalist theories of Piaget, Kohlberg, and Erikson through the more pluralist research and theorizing of the late 20th century. Without assuming any prior knowledge of psychology, he introduced and coordinated basic concepts to enable students to wrestle with the questions of concern to experts and help experts see those concerns from a larger perspective. In this thoroughly updated second edition, Moshman develops his conceptualization of advanced psychological development in adolescence and early adulthood and proposes--in a new chapter--a conception of rational moral identity as a developmental ideal. Unlike the prototypical changes of early childhood, advanced psychological development cannot be understood as progress through universal stages to a universally achieved state of maturity. Progress is possible, however, through rational processes of reflection, coordination, and social interaction.

America is a corporatized society defined by a culture of consumerism, and the youth market is one of the groups that corporations target most. By marketing directly to children, through television, movies, radio, video games, toys, books, and fast food, advertisers have produced a 'kinderculture'. In this eye-opening book, editor Shirley R. Steinberg reveals the profound impact that our purchasing-obsessed culture has on our children and argues that the experience of childhood has been reshaped into something that is prefabricated. Analyzing the pervasive influence of these corporate productions, top experts in the fields of education, sociology, communications, and cultural studies contribute incisive essays that students, parents, educators, and general readers will find insightful and entertaining. Including seven new chapters, this third edition is thoroughly updated with examinations of the icons that shape the values and consciousness of today's children, including Twilight, True Blood, and vampires, hip hop, Hannah Montana, Disney, and others.
