So you want to keep your kitchen counter clean but you aren't ready to toss the toaster? You want to be able to find your kids' socks but aren't looking to spend your 401(k) on clear bins? You long for a little more peace but minimalism isn't sparking joy? Discover 100 practical, doable tips to organize, declutter and manage your home. Traditional organizing

advice never worked for decluttering expert and self-proclaimed recovering slob Dana K. White. Is it possible, she wondered, to get organized without color coding my sock drawer? As Dana let go of the need for perfection, she discovered the joy of having an organized house in the midst of everyday life. You can too! In *Organizing for the Rest of Us*, Dana teaches you how to make great strides without losing your mind in organizing every room of your home. You'll find her 100 easy-to-read organizing tips invaluable, including: Why you need to get

a grip on laundry and dishes before getting organized The basics of organization for people who don't like to organize Why changing how we think about clutter is the first step to getting rid of it How living with less stuff is better for the environment, our spiritual lives, and our relationships The simple yet life-changing tactic that is the container concept *Organizing for the Rest of Us* includes colorful, practical photos, a presentation page, and a ribbon marker, making it a thoughtful and useful gift or self-purchase if you are: Doing spring

cleaning (or cleaning during any season)  
 Making New Year's resolutions Downsizing  
 your own home or your parents' home  
 Decluttering and organizing for your own  
 peace of mind Fans of Dana's popular  
 podcast, *A Slob Comes Clean*, will treasure  
 this book as a timeless (and frequently  
 revisited) resource. With her humorous,  
 lighthearted, easy-to-follow approach,  
 Dana provides bite-size, workable  
 solutions to break through every  
 organizational struggle you have--for  
 good! Look for additional, practical

 Decluttering at the Speed of Life How to  
 Manage Your Home Without Losing Your  
 Mind  
[Bulletin - Bureau of Education](#) Oxford  
 University Press  
 \*The basis for the wonderfully funny and  
 moving TV series developed by Amy  
 Poehler and Scout Productions\* A  
 charming, practical, and unsentimental  
 approach to putting a home in order while  
 reflecting on the tiny joys that make up a  
 long life. In Sweden there is a kind of  
 decluttering called *döstädning*, *dö*  
 meaning "death" and *städning* meaning  
 "cleaning." This surprising and

invigorating process of clearing out  
 unnecessary belongings can be  
 undertaken at any age or life stage but  
 should be done sooner than later, before  
 others have to do it for you. In *The Gentle  
 Art of Swedish Death Cleaning*, artist  
 Margareta Magnusson, with Scandinavian  
 humor and wisdom, instructs readers to  
 embrace minimalism. Her radical and  
 joyous method for putting things in order  
 helps families broach sensitive  
 conversations, and makes the process  
 uplifting rather than overwhelming.  
 Margareta suggests which possessions you  
 can easily get rid of (unworn clothes,  
 unwanted presents, more plates than  
 you'd ever use) and which you might want  
 to keep (photographs, love letters, a few  
 of your children's art projects). Digging  
 into her late husband's tool shed, and her  
 own secret drawer of vices, Margareta  
 introduces an element of fun to a  
 potentially daunting task. Along the way  
 readers get a glimpse into her life in  
 Sweden, and also become more  
 comfortable with the idea of letting go.

Millions of children and adults across the nation spend their days in school buildings, and they need safe, healthy environments to thrive, learn, and succeed. This book explores the school environment using the methods and perspectives of environmental health science. Though environmental health has long been understood to be an important factor in workplaces, homes, and communities, this is the first book to address the same basic concerns in schools. The editors are physicians and educators trained in pediatrics, occupational and environmental medicine, and medical toxicology, and the authors are experts in their fields drawn from across the United States and abroad. Each section of the book addresses a different concern facing schools today. In the first six sections, the various aspects of the school environment are examined. Chapters include the physical environment of the school, air quality issues, pest control, cleaning methods, food safety, safe designs of playgrounds and sports fields, crime and violence prevention, and

transportation. In the last two sections, recommendations are made for school administrators on how to maximize the health of their schools. Appropriately evaluating the school environment, implementing strategies to address children and adults with disabilities, emphasizing health services, infectious disease prevention and recognition, and occupational health for faculty and staff are all addressed. The entire book is evidence-based, readable, generously illustrated, and practical. An indispensable resource for parents, school staff, administrators, government officials, and health professionals, this book is for anyone who cares about the health of our schools.
