The I, Claudius author's "lightning sharp interpretations and

insights . . . are here brought to bear with equal effectiveness on the Book of Genesis" (Kirkus Reviews). This is a comprehensive look at the stories that make up the Old Testament and the Jewish religion, including the folk tales, apocryphal texts, midrashes, and other little-known documents that the Old Testament and the Torah do not include. In this exhaustive study, Robert Graves provides a fascinating account of pre-Biblical texts that have been censored, suppressed, and hidden for centuries, and which now emerge to give us a clearer view of Hebrew myth and religion than ever. Venerable classicist and historian Robert Graves recounts the ancient Hebrew stories, both obscure and familiar, with a rich sense of storytelling, culture, and spirituality. This book is sure to be riveting to students of Jewish or Judeo-Christian history, culture, and religion.

The affective domain and the emotional factors which influence language learning have been of interest in the field of language teaching for a number of years. By proposing a holistic approach to the learning process, this volume takes the position that the language learning experience will be much more effective when both affect and cognition are considered. The eighteen chapters discuss issues such as memory, anxiety, self-esteem, facilitation, autonomy, classroom activities, and assessment from the perspective of affect. *Affect in Language Learning* will be of interest to teachers-in-preparation, teachers, teacher educators, curriculum designers, programme administrators and researchers and to those second language teaching professionals who wish to improve language teaching through a greater awareness of the role affect plays.

Hailed as one of the most important Eastern European writers of the post-Communist era, Pavel Vilikovsky actually began his career in 1965. But the political content of his writing and its straightforward treatment of such taboo topics as bisexuality kept him from publishing the works collected here until after the Velvet Revolution.

"An exquisite book, rich, shimmering, and truly incomparable."

—The New Yorker This lyric portrait of a boy's companionship with his little donkey, Platero, is the masterpiece of Juan Ramón Jiménez, the Spanish poet awarded the 1956 Nobel Prize for Literature. Poetic, elegiac, it reveals the simple pleasures of life in a remote Andalusian village and is a classic work of literature, beloved by adults and children alike.

Awarded the 1989 Nobel Prize for Literature, Camilo José Cela has long been recognized as one of the preeminent Spanish writers of the twentieth century. *Journey to the Alcarria* is the best known of his vagabundajes, Cela's term for his books of travels, sketchbooks of regions or provinces. The Alcarria is a territory in New Castile, northeast of Madrid, surrounding most of the Guadalajara province. The region is high, rocky, and dry, and is famous for its honey. Cela himself is "the traveler," an urban intellectual wandering from village to village, through farms and along country roads, in search of the Spanish character. Cela relishes his encounters with the simple, honest people of the Spanish countryside--the blushing maid in the tavern, the small-town shopkeeper with airs of grandeur lonely for companionship, the old peasant with his donkey who freely shares his bread and blanket with the stranger. These vignettes are narrated in a fresh, clear prose that is wonderfully evocative. As the New York Times wrote, Cela is "an outspoken observer of human life who built his reputation on portraying what he observed in a direct colloquial style."

A History of Loneliness Houghton Mifflin Harcourt

Cognitive Development and Cognitive Neuroscience: The Learning Brain is a thoroughly revised edition of the bestselling *Cognitive Development*. The new edition of this full-colour textbook has been updated with the latest research in cognitive neuroscience, going beyond Piaget and traditional theories to demonstrate how emerging data from the brain sciences require

a new theoretical framework for teaching cognitive development, based on learning. Building on the framework for teaching cognitive development presented in the first edition, Goswami shows how different cognitive domains such as language, causal reasoning and theory of mind may emerge from automatic neural perceptual processes. Cognitive Neuroscience and Cognitive Development integrates principles and data from cognitive science, neuroscience, computer modelling and studies of non-

human animals into a model that transforms the study of cognitive development to produce both a key introductory text and a book which encourages the reader to move beyond the superficial and gain a deeper understanding of the subject matter. Cognitive Development and Cognitive Neuroscience is essential for students of developmental and cognitive psychology, education, language and the learning sciences. It will also be of interest to anyone training to work with children.
