Esta obra recoge una selección de los trabajos presentados en el I Simposio MANES, celebrado en Madrid en el año 1996. En esa primera reunión científica organizada por el proyecto se presentaron diversos trabajos centrados en el estudio histórico de los manuales escolares. En este volumen se recogen veintitrés de dichos trabajos, una vez revisados por sus autores a la luz de los debates mantenidos en el encuentro. La obra se organiza en tres partes, dedicada cada una de ellas a un ámbito de investigación de especial relevancia. Con este volumen se abre una nueva línea dentro de la colección, tendente a ofrecer a los investigadores y estudiosos los resultados que va arrojando el Proyecto MANES.

This reinterpretation of the history of modern Spain from the

Enlightenment to the threshold of the twenty-first century explains the surprising changes that took Spain from a backward and impoverished nation, with decades of stagnation, civil disorder, and military rule, to one of the ten most developed economies in the world. The culmination of twenty years' work by the dean of economic history in Spain, founder of the *Revista de Historia Económica* and recipient of the Premio Rey Juan Carlos, Spain's highest honor for an academic, the book is rigorously analytical and quantitative, but eminently accessible. It reveals views and approaches little explored until now, showing how the main stages of Spanish political history have been largely determined by economic developments and by a seldom mentioned factor: human capital formation. It is comparative throughout, and concludes by applying the lessons of Spanish history to the plight of today's developing nations.
