*A Companion  
to American  
Indie Film*  
Frontiers  
Media SA  
Medieval art  
history has  
long  
emphasized  
the glories of  
the Byzantine  
Empire, but  
less known  
are the  
profound  
artistic  
contributions  
of Nubia,  
Egypt,  
Ethiopia, and  
other powerful

African  
kingdoms  
whose pivotal  
interactions  
with  
Byzantium  
had an  
indelible  
impact on the  
medieval  
Mediterranean  
world.  
Bringing  
together more  
than 170  
masterworks  
in a range of  
media and  
techniques—from mosaic,  
sculpture,  
pottery, and  
metalwork to  
luxury objects,  
panel  
paintings, and  
religious

manuscripts—  
Africa and  
Byzantium  
recounts  
Africa's  
centrality in  
transcontinent  
al networks of  
trade and  
cultural  
exchange.  
With incisive  
scholarship  
and new  
photography  
of works  
rarely or never  
before seen in  
public, this  
long-overdue  
publication  
sheds new  
light on the  
staggering  
artistic  
achievements  
of late antique

Africa. It reconsiders northern and eastern Africa's contributions to the development of the premodern world and offers a more complete history of the region as a vibrant, multiethnic society of diverse languages and faiths that played a crucial role in the artistic, economic, and cultural life of Byzantium and beyond.

**Spirit of the Silk Road**

Publishing  
For centuries, Pentecostalism has played a significant role in oppressively shaping the life of formerly colonized people of Africa. Moreover, its theologies have perpetuated neocolonial policies developed through the lens of colonial legacies rooted in la mission civilizatrice (mission to civilize). However, since the 1980s, Neo-Pentecostalism

is increasingly reshaping the Congolese Christendom. It sanctions the theologies of a prosperity gospel rooted in an uncritical reading of the Bible and self-theologizing informed by a lack of literal, contextual translation effects. This book argues that the prosperity gospel bankrupts its adherents--in this case, the vulnerable, impoverished sections of Sub-Saharan Africa, and particularly the

Postcolonial Congo--and instead offers a balanced theological reflection that broadens Neo-Pentecostal studies with an African voice encouraging the rewriting and rereading of the story of redemptive mission. The research engages a paradigm shift within global missions and world Christianity, or the history of missions as the platform to negotiate literal, prophetic, and contextual translation

and retransmission of the biblical gospel. It is critical to reclaim and reestablish a hermeneutic of mixed methodologies and construct a contextual and critical interpretation of the Bible in the Congo. To avoid the African assumption of cultural baggage, which affects how the Congolese interpret the Bible, the interpreter has to be neutral and experience the voice of Christ in the

text instead of the voice of Congolese culture; they must be a prophetic voice to reconstruct the authentic meaning of the salvific story.

[Towards a Sustainable Construction Industry: The Role of Innovation and Digitalisation](#)  
Springer  
The U.S. Nuclear Regulatory Commission (NRC) has prepared this environmental impact statement (EIS) in response to

an application submitted by Northwest Medical Isotopes, LLC (NWMI) for a construction permit for the NWMI medical radioisotope production facility. The EIS includes the analysis that evaluates the environmental impacts of the proposed action and considers the following alternatives to the proposed action: (1) the no-action alternative (i.e., the construction permit is denied), (2) one

alternative site, and (3) two alternative technologies. After weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, the NRC staff's recommendation, unless safety issues mandate otherwise, is to issue a construction permit to NWMI. The NRC staff based its recommendation on the

following factors: the NRC staff's review of the NWMI Environmental Report and responses to requests for additional information; the NRC staff's consultation with Federal, State, and local agencies and Tribal officials; the NRC staff's independent environmental review; and the NRC staff's consideration of public comments. Related products: Other products published by the U.S.

Energy Efficiency in the Minerals Industry Dr. Andrei-Lucian Drăgoi "Valley transports the reader to places few will ever go: the very edges of the earth and of human endurance." —Evan Solomon In this gripping first-hand account, four seasoned adventurers navigate a sophisticated, high-tech rowboat across the Northwest Passage. One of the "last firsts" remaining in the adventure world, this journey is only possible because of the dramatic impacts of global warming in the high Arctic, which provide an ironic opportunity to draw attention to the growing urgency of climate change. Along the way, the team repeatedly face life-threatening danger from storms unparalleled in their ferocity and unpredictability and bears witness to unprecedented changes in the Arctic habitat and inhabitants, while weathering gale-force vitriol from climate change deniers who

have taken to social media to attack them and undermine their efforts.

*Probability-Based Multi-objective Optimization for Material Selection*

AOSIS

This book focuses on research methodologies that apply to business research, particularly for researchers and managers embarking thereon to support managerial decision-making in the industry. In doing so, the book's

objective is to guide business researchers in identifying, defining, and applying rigorous academic methodologies that will enable them to formulate, design, and execute effective research that answers their specific management problems. Such guidance can empower organizational managers to understand that business research can contribute to practical solutions to actual

problems experienced in the industry. In addition, by emphasizing the integrative nature between (1) academic research and (2) experienced industry problems, it becomes possible to foster an awareness of such research's potential impact on organizational performance management, sustainability, and resilience. With that, attention is given to narrowing the gap between

theory and practice, which requires that fundamentals of scientific research be adhered to while maintaining the delicate balance between a practice-friendly guide to pragmatically sound and academically rigorous business research.

### **Planning the Pacific**

**Northwest**  
John Wiley & Sons

This book is a systematic analysis of the trade interconnectiv

ity, logistics, urbanization, and economic development among countries along the Silk Road. The prospects for cooperation amongst countries on the Silk Road are clarified in a book which will interest scholars of geopolitics, of economic growth, and of China's Belt and Road Initiative.

*South African Accounting Education Stocktake*

Wipf and Stock Publishers  
The Sociology of Sport has

grown since its inception in the late 1950s and has become robust, and diverse. Many countries now boast strong scholars in the field and this volume reflects the fascinating research being done. This innovative volume is dedicated to a review of the state of the area by region.

*Make Me!*  
Springer

The purpose of this book is to combine perspectives of scholars from Africa on

Child Theology from a variety of theological sub-disciplines to provide some theological and ministerial perspectives on this topic. The book disseminates original research and new developments in this study field, especially as relevant to the African context. In the process it addresses also the global need to hear voices from Africa in this academic field. It aims to convey the importance of considering Africa's children in theologising. The different chapters represent diverse methodologies, but the central and common focus is to approach the subject from the viewpoint of Africa's children. The individual authors' varied theological sub-disciplinary dispositions contribute to the unique and distinct character of the book. Almost all chapters are theoretical orientated with less empirical but more qualitative research, although some of the chapters refer to empirical research that the authors have performed in the past. Most of the academic literature in the field of Child Theologies is from American or British-European origin. The African context is fairly absent in this discourse,

<p>although it is the youngest continent and presents unique and relevant challenges. This book was written by theological scholars from Africa, focussing on Africa's children. It addresses not only theoretical challenges in this field but also provides theological perspectives for ministry with children and for important social change. Written from a variety of theological sub-</p>	<p>disciplines, the book is aimed at scholars across theological sub-disciplines, especially those theological scholars interested in the intersections between theology, childhood studies and African cultural or social themes. It addresses themes and provides insights that are also relevant for specialist leaders and professionals in this field.</p>	<p>No part of the book was plagiarised from another publication or published elsewhere. <u>30 years of the Comet Assay: an overview with some new insights</u> AOSIS This volume describes the development and application of the Mmogo-method® as a projective visual data-gathering method, applied in different contexts and with different groups of people. "Mmogo" means</p>
---	---	--

togetherness in Setswana, one of the 11 official languages of South Africa. The Mmogo-method® provides a deep understanding of personal, relational and group experiences and is particularly useful in cross-cultural contexts and across age groups. By allowing visual expressions of the self as a complex, dynamic social system it overcomes some of the limitations of traditional

data-collection methods, such as questionnaires or interviews. The book draws together contributions by leading social scientists to show how this flexible, visual data-collection method can be used independently or jointly with other data-gathering techniques, such as journalling or in-depth interviewing, to acquire rich information. The research method described here enables

investigators to access perceptions, feelings and personal experiences participants might otherwise find hard to verbalize and explain. Researchers in disciplines such as education, social sciences, consumer sciences, market research, and city and town planning will find this book and its innovative method particularly valuable in addressing a gap in

available visual and other data collection resources.

**Business Research**  
Lexington Books

This book is intended to take stock of the current state of accounting education with a specific emphasis on the South African situation. It provides a critical overview of the current published research and identified gaps. Through this, it aims to equip accounting

academics with information and tools to motivate them to research the field of accounting education to improve teaching and learning. It also aids in the identification of suitable research topics in this regard and highlights potential pitfalls in researching accounting education. The book, therefore, focuses on accounting educators as specialists in their

respective disciplines. Different authors with a keen interest in a specific area relating to accounting education research wrote each chapter in this book. It forms a planned collective work, assembled by appropriately qualified and experienced scholars in the accounting education field which generates a new conceptual synthesis that advances scholarship of accounting education

research, since no such synthesis currently exists for accounting education research in South Africa. *Book Banning in 21st-Century America* Pan Macmillan South africa In this groundbreaking book, Eric Toshalis explores student resistance through a variety of perspectives, arguing that oppositional behaviors can be not only instructive but productive. All too often

treated as a matter of compliance, student resistance can also be understood as a form of engagement, as young people confront and negotiate new identities in the classroom environment. The focus of teachers' efforts, Toshalis says, should not be about "managing" adolescents but about learning how to read their behavior and respond to it in developmentally productive,

culturally responsive, and democratically enriching ways. Noting that the research literature is scattered across fields, Toshalis draws on four domains of inquiry: theoretical, psychological, political, and pedagogical. The result is a resource that can help teachers address this pervasive classroom challenge in ways that enhance student agency, motivation,

engagement, and academic achievement. The coauthor of *Understanding Youth: Adolescent Development for Educators* (Harvard Education Press, 2006), Toshalis blends accessible explanations of theory and research with vignettes of interactions among educators and students. In *Make Me!*, Toshalis helps teachers perceive possibility, rather than pathology, in student resistance.

*Natural Disasters and Risk Communication* Springer Nature  
The second edition of this book illuminates the fundamental principle and applications of probability-based multi-objective optimization for material selection in viewpoint of system theory, in which a brand new concept of preferable probability and its assessment as well as other treatments are introduced

by authors for the first time. Hybrids of the new approach with experimental design methodologies (response surface methodology, orthogonal experimental design, and uniform experimental design) are all performed; robustness assessment and performance utility with desirable value are included; discretization treatment in the evaluation is presented; fuzzy-based approach and

cluster analysis are involved; applications in portfolio investment and shortest path problem are concerned as well. The authors wish this work will cast a brick to attract jade and would make its contributions to relevant fields as a paving stone. It is designed to be used as a textbook for postgraduate and advanced undergraduate students in relevant majors, while also serving as a valuable reference

book for scientists and engineers involved in related fields. *Proceedings of the 7th International Conference on Business and Finance* Taylor & Francis  
 This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and

distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance education systems are managed and structured. This book is the second in a series, following *Open and Distance Education in*

Australia, Europe and the Americas (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online, open and distance education, this book will prove particularly valuable for policy-makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education. *Open and Distance Education in Asia, Africa and the Middle East* IGI Global

This book offers detailed strategies, methodologies, approaches, practice guidelines, and policy implications effective for professional coaching on the individual, group and organizational level. It details empirical research-based and theoretical perspectives on coaching psychology as well as elaborates upon the fundamentals within multi-cultural contexts. First delivering a general introduction to

coaching psychology before going on to examine specific psychological approaches towards coaching. The book also provides a conceptual framework for the use of psychometrics in multi-cultural coaching psychology. Next, the book presents meta-theoretical perspectives and applications for multi-cultural contexts, such as how to enhance leadership

with group coaching from a system psychodynamic approach, how coaching can be used to support behavioral engagement and wellbeing, and how to utilize symbolic expressions, art, myths, dreams, and fantasies in coaching. This book provides practical tools towards critical self-reflective practice. Delivering the current state of the art research by presenting psychological coaching

strategies theory and practice in one viewpoint. It also informs on the activity of various research approaches, thus interesting the broader student and academic reader. It will help all readers evaluate their current coaching competencies and, in the end, become better coaches. The book will also serve as an ideal resource for psychologists who want to migrate into

<p>coaching psychology. <i>A scholarly inquiry into disciplinary practices in educational institutions</i> Springer This book gathers papers from the 12th Construction Industry Development Board (CIDB) Postgraduate Research Conference, which was held at the International Convention Centre, East London, Eastern Cape, South Africa, from July 10 to 12, 2022. The conference directly</p>	<p>addresses the objectives of SDG9: “Building resilient infrastructure, promoting inclusive and sustainable industrialization and fostering innovation”. Moreover, the conference is designed to promote capacity development and transformation within the built-environment space by providing an all-inclusive platform to established and emerging researchers to discuss the</p>	<p>recent advancements needed to move the industry forward. <u>Environmental Impact Statement for Construction Permit for the Northwest Medical Isotopes Radioisotope Production Facility Final Report</u> Rowman &amp; Littlefield Natural Disasters and Risk Communication: Implications of the Cascadia Subduction Zone Megaquake asks and addresses</p>
---	--	---

how we communicate about natural disasters and what effect our communication has on natural disaster education, understanding, assessment of risk, preparation, and recovery. The chapters of this book present expertise, analyses, and perspectives that are designed to help us better comprehend and deal with the natural risks such as the Cascadia Subduction Zone. It seeks

to move past primal, fear-induced physiological and emotional responses to crises with the understanding that if we accept that the disaster will occur, expect it, and learn how we can prepare, we can calm the collective panicked beats of our hearts as we wait for its first tremors. *Essentials of Health Care Marketing* LIT Verlag Münster This book is a collection of chapters based on original

research dealing with issues of discipline and disciplinary practices in educational institutions. The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings. The issue of discipline is investigated from diverse paradigmatic and methodological perspectives, presenting

empirical as well as also philosophical research. The empirical perspective includes quantitative (positivistic), qualitative (interpretive) and mixed methods (pragmatic), designs and worldviews. This book offers a ground-breaking contribution to the field of learner and student discipline, with insights into disciplinary practices and issues in educational institutions

not hitherto researched, such as Technical Vocational Education and Training colleges and universities. **Critical Perspectives on Global Englishes in Asia** Springer Nature In What if there were no whites in South Africa? Ferial Haffajee examines South Africa's history and present in the light of a provocative question that yields some thought-provoking discussion and analysis. From

round-table discussions with influential South Africans, to research, personal thoughts and powerful anecdotes, Ferial takes the reader through the rocky terrain of race rage in our country and grapples with what it means to be South African in 2015. **Religion and Outer Space** Springer This work proposes the generalization of the binary (strong) Goldbach's Conjecture, briefly called

“the Vertical Binary Goldbach’s Conjecture”, which is essentially a meta-conjecture because it states an infinite number of conjectures stronger than Goldbach’s, which all apply on “iterative” primes with recursive prime indexes, with many potential theoretical and practical applications in mathematics and physics) and a very special self-similar property of

the primes subset of positive integers. *Africa and Byzantium* Multilingual Matters International Food Law and Policy is the first interdisciplinary piece of academic literature of its kind with a comprehensive, reader-friendly approach to teaching the major aspects of food regulation, law, policy, food safety and environmental sustainability in a global context. The

sections are grouped by continents and focus on a range of cross-disciplinary subjects, such as public health, international food trade, the right to food, intellectual property and global regulatory aspects of food production. With its systematic approach, this book will be a valuable resource both for professionals working in food regulation and

anyone interested in the subject. It provides a solid foundation for courses and master's programs in environmental management, food law, policy and regulation, and sustainable development around the world.
