*Living Prototypes* CRC  
Press  
This title covers the  
key vocabulary needed

by learners of English  
at Advanced level.  
Each of the 30 units  
presents vocabulary  
relating to a particular  
topic using clear  
language and  
examples. This is  
followed by practice

exercises to ensure the learner will remember and be able to use what they have learnt with confidence in their written and spoken English.

### Chemical Storylines.

Birkhäuser

From podcast host Sutanya Dacres comes *Dinner for One*, an unforgettable memoir of how she rebuilt her life after her American-in-Paris fairy tale shattered, starting with cooking dinner for herself in her Montmartre kitchen. When Sutanya Dacres married her French boyfriend and moved to Paris at twenty-seven, she felt like she was living out her very own Nora Ephron romantic comedy. Jamaican-born and Bronx-raised, she had never dreamed she herself could be one of

those American women in Paris she admired from afar via their blogs, until she met the man of her dreams one night in Manhattan. A couple of years later, she married her Frenchman and moved to Paris, embarking on her own “happily-ever-after.” But when her marriage abruptly ended, the fairy tale came crashing down around her. Reeling from her sudden divorce and the cracked facade of that picture-perfect expat life, Sutanya grew determined to mend her broken heart and learn to love herself again. She began by cooking dinner for one in her Montmartre kitchen. Along the way, she builds Parisienne friendships, learns how to date in French, and examines what it

means to be a Black American woman in Paris—all while adopting the French principle of pleasure, especially when it comes to good food, and exploring what the concept of self-care really means.

Brimming with charm, humor, and hard-won wisdom, Sutanya's story takes you on an adventure through love, loss, and finding where you truly belong, even when it doesn't look quite how you expected.

The retail industry and associated business models have gone through a significant phase of disruption. The rapid emergence of new technologies, digital business models and the evolution of

social media platforms as a new sales channel continue to influence the sector. Key contextual or external trends will affect and shape the retail landscape in the years to come. Therefore, it seems important to prepare for this situation and be ready with a head start in terms of knowledge. This textbook provides its readers basic knowledge about the national and international retail sector and gives important insights into trends and developments. It deals with key trends, in particular new patterns of personal consumption, evolving geopolitical dynamics, technological advancements and structural industry shifts. Moreover, it

explains why it is so important that retailers use these trends, adapt their retail strategies and tactics, create strong brands and come up with innovative, new ways of doing business. Today we are living in a challenging time for retail. This textbook tries to give insights and explanations to better understand these challenges and provide managerial implications.

The last witchcraft trial in German-speaking countries was held in 1782 in Eveline Hasler's home canton of Glarus in Switzerland. A servant woman, Anna Goeldin, was accused of having

bewitched a child of the physician household in which she worked, making it crippled and spit pins. The accused confessed under torture, was sentenced by the city council and executed. Sources show that the trial provoked great controversy in Europe even at the time. The courts in Glarus were ridiculed and criticized by more enlightened cities in Switzerland and Germany. In her novel with its beautiful simple language, Hasler tells Anna Goeldin's story and trial. With the means of fiction, Hasler attempts to explain how a witchcraft trial could come to take place in the heart of Europe during the heyday of the Enlightenment. The novel was first published in 1982 and

also draws parallels to women's fight for equal rights two hundred years later. This novel is a bestseller in German-speaking countries, has been translated into several languages, and made into a feature film by Gertrud Pinkus. The translation by Mary Bryant has won an Arts and Humanities Initiative Award at the University of Iowa. Eveline Hasler (born in 1933) was trained as a teacher of History and turned to writing children's books, fiction, and historical fiction. She is the recipient of many awards, among them the Switzerland Award for Juvenile Fiction (1978), Honors by the City of Zurich (1988), Schubart Award (1989), Droste Award (1994), and Justinus

Kerner Award (1999).

**German books in print** Knopf Books for Young Readers

There have been many developments in the field of light pollution over the last few years, and this second edition of 'Light Pollution - Responses and Remedies' will introduce them in detail. Examples include the appearance of anti-light pollution legislation in various countries, new departures in lighting design, human health implications, and the growing realization among the general public that lighting is not always a good thing. In this title, author Bob Mizon discusses the various ways in which wasted artificial light has damaged the quality of modern life, and

suggest solutions. This book is for anyone who has experienced glare, discomfort, or nuisance from poorly directed lights; has wondered why we waste so much money lighting the sky; or anyone who simply wants to see the stars instead of a baleful urban glow. "Light Pollution, 2nd Edition" offers practical and inexpensive solutions to the world-wide problem of wasted artificial light, and emphasizes that light pollution is not just an astronomers' problem, but affects everyone in various ways.

Springer Science & Business Media  
In addition to social media's prevalence for personal use, online networking tools are also gaining momentum in the

healthcare field. Health information and patient discussion are embracing these technologies to create a more ubiquitous communication platform. Social Media and Mobile Technologies for Healthcare provides insight on the tools that are integral to understanding and implementing emerging technologies in health-related fields. With an ever-growing presence of patients and health professionals on social networking sites, this book will provide insight into the effect of communication technologies on health services. This publication is useful for professionals and researchers in health informatics, as well as students, practitioners,

clinicians, and academics.

*Dinner for One* Bonnier Publishing Fiction Ltd. Each animal feels the golden apple in the forest belongs to him but in the end none can get it.

Deutscher Literatur-Katalog Routledge

As a history scholar and courier for the secretive Circle of Thales, Rene Laurent is a man of many talents - none of them lending themselves much to a life of adventure. But when a chance meeting with a young, idealistic Belligra priest drags him into a wild quest to keep a dangerous mutagen off the streets of Floor, his curiosity gets the better of him. Between monsters both human and man-made, he realises that maybe fieldwork is more of his

game than he had ever thought possible...

Written by Rainbow-Award-winning authors Beryll and Osiris Brackhaus, 'The PV-3 Mutagen' is a colourful non-romance sci-fi adventure set in the wildly diverse 'Virasana Empire', and the first novel of the 'Doctor Laurent' series.

By the time ninth  
grade begins, Ishmael  
Leseur knows it won't

be long before Barry  
Bagsley, the class  
bully, says, "Ishmael?  
What kind of wussy-  
crap name is that?"  
Ishmael's perfected the  
art of making himself  
virtually invisible. But  
all that changes when  
James Scobie joins the  
class. Unlike Ishmael,  
James has no sense of  
fear - he claims it was  
removed during an  
operation. Now nothing  
will stop James and  
Ishmael from taking on  
bullies, bugs and Moby  
Dick, in the toughest,  
weirdest, most  
embarrassingly awful -  
and the best - year of  
their lives.

**The Golden Apple**

Scribe Publications

The international  
bestseller - an  
enthraling exploration  
of the how and why  
behind the science of  
happiness. We all know  
what it feels like to be

happy, but what mechanisms inside our brains trigger such a positive emotion? What does it really mean to be happy, and why can't we feel that way all of the time?

Psychologists and neuroscientists have been studying negative emotions for decades, but until recently few have focused on the subject of happiness. Now, in *The Science of Happiness*, leading science journalist Stefan Klein ranges widely across the latest frontiers of neuroscience and psychology to explain how happiness is generated in our brains, what biological purpose it serves, and the conditions required to foster 'the pursuit of happiness'. A remarkable synthesis of a growing body of

research that has not been brought together before, *The Science of Happiness* is, ultimately, a book that helps us understand our own quest for happiness and is certain to help make you happier.

Philip Street Press

The pedosphere - the thin mantle of soil on the earth's surface - plays a potentially crucial role in climate and climate change . The carbon storage of soils is the second largest in the biosphere, making the dynamics of soil organic carbon an important issue that must be understood if we are to fully comprehend global change. This new book examines the

importance of soils and their relationship to global change, specifically to the greenhouse effect. *Soils and Global Change* presents a state-of-the-art compendium of our present knowledge of soils. This up-to-date information source enables readers to delve into the literature about soils and climate change and examine soils in both natural and managed environments.

**Don't Call Me**

**Ishmael** Springer

This book describes the basics and various applications of DNA fingerprinting, including in actual case studies. The book is divided in four modules; Module 1: Basics of DNA Fingerprinting, Module 2: Applications of DNA

Fingerprinting, Module 3: DNA Fingerprinting: Case Studies, and Module 4: Future of DNA Fingerprinting. Each module consists of 4 to 5 chapters, written by reputed researchers, academics and forensic scientists from around the globe. The respective chapters cover e.g. related fields, the tools and techniques used, various genotyping kits, real-world case studies, ancient DNA and wild life forensics, molecular diagnosis of human diseases, legal aspects, microbial forensics and the economics of the DNA fingerprinting technique. The book offers a practical guide for professionals, graduate and post-graduate students in the fields of Forensic

Science, Medicine, Genetics, Anthropology, Microbiology, and Zoology. It also serves as a useful reference resource, summarizing major technological advances in the field of DNA fingerprinting, the problems faced in this field of science and possible new solutions to these problems. Presently, DNA fingerprinting is utilized in solving the majority of criminal cases; as such, the book is also helpful for investigating agencies, as it includes representative case studies.

**The Science of Happiness** Ballantine Books  
Vergessenes Schulwissen leicht verständlich aufgefrischt  
Mendel'sche Gesetze?

Prozentrechnen? Die Gründung Roms? Wie war das noch ...?  
Nützliches Schulwissen unterhaltsam und leicht verständlich aufzufrischen und damit die ein oder andere Lücke in der Allgemeinbildung zu schließen steht im Fokus dieses Buches.  
Von Deutsch über Biologie bis hin zu Kunst und Musik erläutert P.M.-Redakteur Martin Tzschaschel kompetent und unterhaltsam alles Wissenswerte. Was einen in diesem Buch nicht erwartet: Alles, was schon in der Schule langweilig war und die Ahnung hervorrief, das brauche ich nie wieder.  
*Strategic Retail Management and Brand Management*  
Vantage Press, Inc  
The book provides

students of European company law courses, scholars and practitioners with an overview. Although company law remains mainly regulated at the level of national laws, it has become important to obtain a systematic view of the main directives in the field of company law, the EU Court of Justice's jurisprudence, the European Model Company Act and the state of implementation of these directives in the member states of the Union. The book therefore contains, in addition to the illustration of the law laid down by EU legislative bodies and the related soft laws, detailed references to the most important domestic legislations and case laws, in order

to make them known and usable as much as possible. Moreover, the book allows identifying the most relevant current legislative trends and the main historical reasons for divergences.

**Subject guide to German books in print** Collins

Educational

"Did you know that the biggest animal on Earth, the blue whale, only eats some of the smallest creatures in the ocean? That humpback whales sing underwater songs with lots of verses? Or that orcas can live with their families for their whole lives and bowhead whales can live for more than 200 years? The World of Whales explores the special characteristics and reveals mind-blowing facts about

these fantastic animals. Join our sub-aquatic expedition through the vast oceans of our planet." -

### Wie war das noch?

Harlequin

This manual presents practical approaches to using DNA

fingerprinting and genetic profiling to answer a variety of biological and medical questions. It provides detailed methodology for setting up and performing experiments and evaluating results.

Extensive troubleshooting tips, helpful hints, and advice for daily practice are also included. This will be a useful guide for scientists and researchers engaged in genetic identification and relationship

analyses.

*Human Anatomy, Physiology and Pathophysiology* Walter de Gruyter GmbH & Co KG

The first libraries of complementary DNA (cDNA) clones were constructed in the mid-to-late 1970s using RNA-dependent DNA polymerase (reverse transcriptase) to convert poly A\* mRNA into double-stranded cDNA suitable for insertion into prokaryotic vectors.

Since then cDNA technology has become a fundamental tool for the molecular biologist and at the same time some very significant advances have occurred in the methods for constructing and screening cDNA libraries. It is not the aim of cDNA Library Protocols to

give a comprehensive review of all cDNA library-based methodologies; instead we present a series of up-to-date protocols that together should give a good grounding of procedures associated with the construction and use of cDNA libraries. In deciding what to include, we endeavored to combine up-to-date versions of some of the most widely used protocols with some very useful newer techniques. cDNA Library Protocols should therefore be especially useful to the investigator who is new to the use of cDNA

libraries, but should also be of value to the more experienced worker. Chapters 1—5 concentrate on cDNA library construction and manipulation, Chapters 6 and 7 describe means of cloning difficult-to-obtain ends of cDNAs, Chapters 8-18 give various approaches to the screening of cDNA libraries, and the remaining chapters present methods of analysis of cDNA clones including details of how to analyze cDNA sequence data and how to make use of the wealth of cDNA data emerging from the human genome project.
