**Community College Students in Hong Kong** Springer Science & Business Media

This book explores personal responses to risk from a social psychological framework.

**School Leadership in the Context of Standards-Based Reform** Routledge

The molecular age has brought about dramatic changes in medical microbiology, and great leaps in our understanding of the mechanisms of infectious disease. *Molecular Medical Microbiology* is the first book to synthesise the many new developments in both molecular and clinical research in a single comprehensive resource. This timely and authoritative three-volume work is an invaluable reference source of medical bacteriology. Comprising more than 100 chapters, organized into 17 major sections, the scope of this impressive work is wide-ranging. Written by experts in the field, chapters include cutting-edge information, and clinical overviews for each major bacterial group, in addition to the latest updates on vaccine development, molecular technology and diagnostic technology. Topics covered include bacterial structure, cell function, and genetics; mechanisms of pathogenesis and prevention; antibacterial agents; and infections ranging from gastrointestinal to urinary tract, central nervous system, respiratory tract, and more. - The first comprehensive and accessible reference on molecular medical microbiology - Full color presentation throughout - In-depth discussion of individual pathogenic bacteria in a system-oriented approach - Includes a clinical overview for each major bacterial group - Presents the latest information on vaccine development, molecular technology, and diagnostic technology - More than 100 chapters covering all major groups of bacteria - Written by an international panel of authors who are experts in their respective disciplines

**Adult and Pediatric Urology** Springer Nature

This volume gives an up-to-date account of the language situation and social context in multilingual Hong Kong. After an in-depth, interpretive analysis of various language contact phenomena, it shows why it is such a tall order for Hongkongers to live up to the Special Administrative Region government's language policy goalpost, 'bilingualism and trilingualism'. A detailed contrastive analysis between Cantonese and (a) English, (b) Modern Written Chinese, and (c) Putonghua helps explain the nature of the linguistic and acquisitional challenges involved. Economic forces and sociopolitical realities helped shape the 'mother tongue education' or 'dual MoI streaming' policy since September 1998. The book provides a critical review of the significant milestones and key policy documents from the early 1990s, and outlines the concerns of stakeholders at the receiving end. Another MoI debate concerns the feasibility and desirability of teaching Chinese in Putonghua (TCP). Based on a critical review of the TCP literature and recent psycholinguistic and neuroscience research, the language-in-education policy implications are discussed, followed by a few recommendations. Hongkongers of South Asian descent saw their life chances curtailed as a result of the post-1997 changes in the language requirements for gaining access to civil service positions and higher education. Based on a study of 15 South Asian undergraduate students' prior language learning

experiences, recommendations are made to help redress that social inequity problem.

**The Human Body** Routledge

In the wake of the 1997 Asian financial crisis, various reform initiatives, policies and programmes have been carried out in different countries within the Asia-Pacific region. All these reform efforts aim to restructure different aspects of schooling in order to promote learning and to prepare students for future challenges in globalised economies. These measures to a certain extent challenge traditional practices, established arrangements and deep-seated assumptions related to different aspects of learning. The authors in this book discuss educational reforms in different countries in the Asia-Pacific region in light of student learning, clarify their concepts, evaluate implementation and impact on the learning processes, with a hope that we can learn better from each other and develop a better understanding of "contemporary" learning and teaching processes within the region. The central argument running through different chapters in this book highlights the importance of understanding reforms and learning within their historical, political and sociocultural contexts. Reforming learning involves changes in established cultural practices in our schools, classrooms, and other learning sites, and therefore inevitably arouses tensions and negotiations. The discussion in this book puts to the fore the disputable nature of reforming learning and the significance of contextualising the complex relationship between reforms and learning.

**Managing the Curriculum** Routledge

In today's increasingly interconnected, knowledge-based world, language policy in higher education is rapidly becoming a crucial area for all societies aiming to play a part in the global economy. The challenge is double faceted: how can universities retain their crucial role of creating the intellectual elites who are indispensable for the running of national affairs and, at the same time, prepare their best-educated citizens for competition in a global market? To what extent is English really pushing other languages out of the academic environment? Drawing on the experience of several medium-sized language communities, this volume provides the reader with some important insights into how language policies can be successfully implemented. The different sociolinguistic contexts under scrutiny offer an invaluable comparative standpoint to understand what position can - or could - be occupied by each language at the level of higher education.

**Exercise Genomics** WIT Press

**The Politics of Education Reform in China's Hong Kong** Routledge

**Multilingual Hong Kong: Languages, Literacies and Identities** Springer

**The Human Body: Linking Structure and Function** provides knowledge on the human body's unique structure and how it works. Each chapter is designed to be easily understood, making the reading interesting and approachable. Organized by organ system, this succinct publication presents the functional relevance of developmental studies and integrates anatomical function with structure. - Focuses on bodily functions and the human body's unique structure - Offers insights into disease and disorders and their likely anatomical origin - Explains how developmental lineage influences the integration of organ systems

Hong Kong University Press

This book discusses the recent assessment movements in the eastern and western worlds with particular focuses on the policies, implementation, and impacts of assessment reform on education. A new perspective of assessment sees assessment as a means to enhance learning. This book examines the tensions, challenges and outcomes (intended and unintended) of assessment reform arising at the interface of policy and implementation, and implementation and student learning. The book reviews the experiences insights gained from research, and identifies the facilitators and hindrances to effective change. It reflects current thinking of assessment and provides the readers with ample background information of assessment development in many countries including USA, England, Scotland, Wales, Northern Ireland, Australia, Singapore, Taiwan, and Hong Kong.

Diverse Approaches to Teaching, Learning, and Writing Across the Curriculum John Wiley & Sons

Presents the full data set underlying PISA 2006 Volume 1: Analysis. Includes data on student performance in science, student engagement in science, quality and equity in schools, school and system characteristics, and student performance in reading and math.

Electricity Comes to Cocoa Bottom Springer

"Although standards-based reform emerged in the United States and the United Kingdom, the idea has spread across the world, as an approach to systemic reform. It might appear that there is a world-wide "tsunami" of standards-based reform that will standardize and homogenize the educational system across the globe. This volume makes it very clear, however, that there is no one approach to standards-based reform and countries change - there is a danger in paying attention to its evolution and impact in only one context. That's what makes this volume so valuable. Louis Volante has drawn together descriptions from a wide range of countries, all involved in large-scale reform and using standards and assessments as part of their process. What becomes very obvious is that the language may be the same but the words reflect different contexts and can represent very different ideals, values, and processes. I'm sure you will find this book as interesting and challenging as I have - a gem that pushes your thinking and does not allow readers to remain neutral." (Lorna Earl)

The Meaningful Writing Project SAGE

CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Assessment Reform in Education Walter de Gruyter

Oral squamous cell carcinoma (SCC) is the 13th commonest cancer worldwide, and the most common cancer in the Asian subcontinent due to the widespread habit of tobacco and betel nut chewing. Despite many advances in diagnosis and treatment, the survival statistics have only marginally improved. However our understanding of the disease process and transformation from pre-cancerous lesions of the oral mucosa to an invasive SCC cancer and their progression has expanded exponentially. There are many conditions of the oral mucosa that can progress to an

invasive malignancy. A thorough understanding of these conditions is a prerequisite for all those involved in the management of the diseases of the oral mucosa and head and neck region. The recognition and timely treatment of potentially pre-malignant conditions of the oral cavity can minimize the change to an overt malignancy in many patients through patient education, appropriate treatment and surveillance. In this book we cover relevant anatomy, biology, diagnosis and latest management strategies for pre-cancerous conditions that affect the oral mucosa. The respective chapters are written by expert contributors from around the world, lending the book a global perspective and making it an essential guide for all those involved in the management of pre-malignant lesions arising in this challenging anatomical region.

**Evolution Education Around the Globe** Academic Press

Education reform has become a highly political issue in the Hong Kong Special Administrative Region (HKSAR) since the transfer of sovereignty to the People's Republic of China (PRC). Lo and Hung focus on the political struggles among stakeholders, including the government of Hong Kong, the Catholic Church, parents, students, teachers, the central authorities of Beijing, and even the bureaucratic politics between Beijing, the Hong Kong government and the Examination Authority. They examine the key elements of education reform in the HKSAR, including language and curriculum reform, national security education, civic and patriotic education, the rise of the pro-Beijing education elites and interest groups, and the revamp of examination questions and examination authority. The entire education reform in the HKSAR has pushed the Hong Kong education system toward a process of mainlandization, making Hong Kong's education system more similar to the mainland system with emphasis on political "correctness" in the understanding of Chinese national security, history and culture. Highlighting the political struggles among the various stakeholders, this book is essential for scholars of Hong Kong and China, especially those with an interest in the relationship between education and politics.

**Stomatal Physiology** Cambridge University Press

The updated edition of this classic three-volume work is a comprehensive reference on all surgical and medical aspects of urology. The first two volumes cover adult urology; the third volume focuses on pediatric urology. Includes expanded coverage of prostate disease, male sexual dysfunction, spinal cord injuries, and more. The CD-ROM provides quick access to the full text of the book, plus video clips of surgical procedures. 2,704.

*Risk and 'The Other'* Lippincott Williams & Wilkins

Written by three academic specialists on Hong Kong cultural identity, social history, and mass media, this book explores Hong Kong's cultural relation to the Chinese nation and state in the recent past, present, and future.

The Politics of Education Reform in China's Hong Kong Cambridge University Press

This book contains a collection of papers presented at a series of meetings organised by the Wessex Institute of Technology (WIT) dealing with sustainability, the environment and ecological issues. The complexity of the modern world presents new challenges to scientists and engineers that requires finding interdisciplinary solutions. Any problem solving carried out in the isolation of a particular field of expertise may give rise to a series of damaging effects which can create new and unintentional environmental and ecological problems. Specialisation, while required in our culture, needs to be

kept under control by the understanding of the whole, which leads to the need of relying on interdisciplinary teams. Nowadays this can be easily achieved thanks to the massive advances in information technology which ensure continuous and immediate contact between all partners. This collaboration needs to be effective and to produce results that will lead to a better world. For this to happen, it is necessary that different groups of scientists and engineers acquire the necessary skills to be able to talk to each other. Furthermore, they need to understand the social and economic aspects of a given problem, in addition to the scientific and engineering issues involved. The Wessex Institute of Technology (WIT) has a long and very successful record in organising interdisciplinary conferences. The papers in this book are a reflection of the proceedings of some of those meetings.

**Immersion Education** The Politics of Education Reform in China's Hong Kong

Self-Hypnosis For Dummies is a hands-on guide to achieving your goals using hypnosis. Whether you want to lose weight, overcome anxiety or phobias, cure insomnia, stop smoking, or simply stop biting your nails, this guide has it covered! The reassuring and straight-talking information will help you harness the power of your mind and re-train your subconscious to think in more healthy and constructive ways, and to overcome specific issues, such as anxiety and paranoia, and break bad habits, such as smoking. The easy-to-follow style will guide you through every step of the process, empowering you to take control and start making changes right away.

*Premalignant Conditions of the Oral Cavity* CRC Press

Within bilingual education, more and more programs are adopting the option of immersion education, in which a second language is used as the medium of instruction. This volume illustrates the implementation immersion education in North America, Europe, Asia, the Pacific, and Africa, showing its use in programs ranging from preprimary to tertiary level and demonstrating how it can function in foreign language teaching, for teaching a minority language to members of the language majority, for reviving or supporting languages at risk of extinction, and for helping learners acquire a language needed for wider communication or career advancement. A final section reviews lessons

learned from experiences with immersion and explores new directions the approach is taking. This text will be of interest to teachers, teacher educators, and others involved in bilingual education.

*Old Southern Apples* Springer Science & Business Media

*Atlas of Human Body: Central Nervous System and Vascularization* is a multidisciplinary approach to the technical coverage of anatomical structures and relationships. It contains surface and 3D dissection images, native and colored cross sectional views made in different planes, MRI comparisons, demonstrations of cranial nerve origins, distribution of blood vessels by dissection, and systematic presentation of arterial distribution from the precapillary level, using the methyl metacrylate injection and subsequent tissue digestion method. Included throughout are late prenatal (fetal) and early postnatal images to contribute to a better understanding of structure/relationship specificity of differentiation at various developmental intervals (conduits, organs, somatic, or branchial derivatives). Each chapter features clinical correlations providing a unique perspective of side-by-side comparisons of dissection images, magnetic resonance imaging and computed tomography. Created after many years of professional and scientific cooperation between the authors and their parent institutions, this important resource will serve researchers, students, and doctors in their professional work. - Contains over 700 color photos of ideal anatomical preparations and sections of each part of the body that have been prepared, recorded, and processed by the authors - Covers existing gaps including developmental and prenatal periods, detailed vascular anatomy, and neuro anatomy - Features a comprehensive alphabetical index of structures for ease of use - Features a companion website which contains access to all images within the book

*Multiple Representations in Biological Education* Multilingual Matters

this collection documents a key moment in the history of Writing Across the Curriculum, foregrounding connection and diversity as keys to the sustainability of the WAC movement in the face of new and long-standing challenges.
