Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators

such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with

a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art

and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

Cubism in the Shadow of War Armand Colin

"The vibrant late paintings of Pierre Bonnard (1867-1947) are considered by many to be among his finest achievements. Working in a small converted bedroom of his villa in the south of France, Bonnard suffused his late canvases with radiant Mediterranean light and dazzling color. Although his subjects were close at hand-usually everyday scenes taken from his immediate surroundings, such as the dining room table being set for breakfast, or a jug of

flowers perched on the mantelpiece - Bonnard rarely painted from life. Instead, he preferred to make pencil sketches in small diaries and then rely on these, along with his memory, once in the studio." "This volume, which accompanies the first exhibition to focus on the interior and related still-life imagery from the last decades of Bonnard's long career, presents more than seventy-five paintings, drawings, and works on paper, many of them rarely seen in public and in some cases, little known. Although Bonnard's legacy may be removed from the succession of trends that today we consider the foundation of modernism, his contribution to French art in the early decades of the twentieth century is far more profound than history has generally acknowledged. In their insightful essays and catalogue entries the authors bring fresh critical perspectives to the ongoing reappraisal of Bonnard's reputation and to his place within the narrative of twentieth-century art."--Jacket

Best known outside the scientific community for the Nobel Prize in Physics

he won in 1991, Pierre-Gilles de Gennes was exceptional amongst scientists for the breadth and depth of his contributions in multiple fields of physics. He was also much ahead of his time in his desire to break down barriers between scientific disciplines and between fundamental and applied science. He was equally unusual in his willingness to explain the nature and purpose of his work to society at large and to young people in particular. Laurence P(ri)vert's fascinating work retraces the influences and experiences that moulded this complex, charismatic, charming and eclectic genius. It follows him from his unconventional childhood on the fringes of the old French aristocracy and in war-divided France, through his glittering school and early scientific career, up to the revolutionary breakthroughs in fields as diverse as superconductivity, liquid crystals, polymers and soft matter, culminating in the final consecration of the Nobel prize. Constructed from exclusive interviews with the physicist himself, his family, friends and colleagues, this biography immerses us in the work and character of a truly remarkable figure, a Renaissance man of the 20th century

Pierre et Gilles Metropolitan Museum of Art Hadot shows how the schools, trends, and ideas of ancient Greek and Roman philosophy strove to transform the individual's mode of perceiving and being in the world. For the ancients, philosophical theory and the philosophical way of life were inseparably linked. Hadot asks us to consider whether and how this connection might be reestablished today.

Résumé en 4ème de couverture: "Pierre et Gilles incarnent depuis les années 1980 un art du portrait hautement sophistiqué, entre photographie et peinture. Avec leurs images aux tonalités sombres et joyeuses, nourries d'art et de culture populaire, ils réenchangent le monde, aspirant à réconcilier les genres, les âges et les styles. Placé sous la direction scientifique de Sophie Duplaix (Centre Pompidou, Paris) et rassemblant les écrits d'éminents spécialistes - Michel Poivert, Marc Donnadiéu... -, cet ouvrage, édité à l'occasion de l'exposition présentée au Musée d'Ixelles (Bruxelles) et du MuMa (Le Havre), offre un éclairage inédit sur l'oeuvre dense et prolifique de ce duo

d'artistes aussi inclassable qu'incontournable."

"Accompanying an exhibition in honor of Philippe de Montebello, Director Emeritus of The Metropolitan Museum of Art, this engaging book examines the influence of music and theater on the art of Jean-Antoine Watteau (1684-1721). Fifteen major paintings and a number of drawings by Watteau that illustrate the connections between painting and the performing arts in Paris are explored. In addition, drawings and prints by other 18th-century artists featuring musical or theatrical subjects and objects and musical instruments are included."--Publisher description.

Flash Art University of Toronto Press Internationally acclaimed Dutch artist Claudy Jongstra creates visceral landscapes of texture and color. These site specific and often monumental murals and sculptural installations have a strong connection with their physical space. Using a surprising range of natural materials and techniques, Jongstra's distinctive approach involves a breathtaking inquiry into the mysteries of

dye crops and natural pigments from which her intense nuances of colors are crafted. With deep connections with her surroundings as vital elements for the production of her work and sustainability at the center of her philosophy and working process, Jongstra is committed to the preservation and activation of natural and cultural heritage.

ABRAMS

This groundbreaking book provides a major reassessment of the history and significance of cubism. David Cottingham examines the cubist movement and sets it within the complex political, economic, and cultural forces of pre-World War I France. Cubism, as a part of the Parisian artistic avant-garde, played an integral role in the turbulent Belle Epoque. The author focuses on cubism's relation to the particular discourses of nationalism, aestheticism, gender, the social purpose of art that gave meaning to the experience of modernity in Paris in the decade before the war. In Part I of the book, the author discusses the "cubist conjuncture," the years that followed the collapse of the Bloc des Gauches. The Bloc, more than a

parliamentary alliance, represented an effort of collaboration between the liberal middle class and sectors of the working class led by Parisian intellectuals and artists (future cubists among them). In the wake of the Blocs failure, workers withdrew into trade unionism and artists into aesthetic avant-gardism. Cottington analyzes this consolidation of the artistic avant-garde, its relation to the expanding dealer-centered art market, and the dominant and counter discourses of the day. In Part II, he considers specific aspects of cubist art and the cubist movement?from the conservative modernism of the paintings of Le Fauconnier and Gleizes to the aestheticism of Picassos papiers-collés to the collective architectural and interior design project of the "cubist house." These examples and others, Cottington concludes, reveal cubism as a contradictory and unstable constellation of interests and practices, sometimes complicit with dominant social and political forces, sometimes opposed to them, but in every case shaped by them. *Watteau, Music, and Theater* Lucia Marquand
Once considered the golden age of French

printmaking, Louis XIV's reign saw Paris become a powerhouse of print production. During this time, the king aimed to make fine and decorative arts into signs of French taste and skill and, by extension, into markers of his imperialist glory. Prints were ideal for achieving these goals; reproducible and transportable, they fueled the sophisticated propaganda machine circulating images of Louis as both a man of war and a man of culture. This richly illustrated catalogue features more than one hundred prints from the Getty Research Institute and the Bibliothèque nationale de France in Paris, whose print collection Louis XIV established in 1667. An esteemed international group of contributors investigates the ways that cultural policies affected printmaking; explains what constitutes a print; describes how one became a printmaker; studies how prints were collected; and considers their reception in the ensuing centuries. *A Kingdom of Images* is published to coincide with an exhibition on view at the Getty Research Institute from June 18 through September 6, 2015, and at the Bibliothèque nationale de France in Paris

from November 2, 2015, through January 31, 2016.

Exploring the mechanisms and strategies used in different cultures across Hispano-America and the Caribbean to narrativise, represent and understand HIV/AIDS as a social and human phenomenon, this book examines a wide range of cultural, artistic and media texts, as well as issues of human phenomenology, to understand the ways in which HIV positive individuals make sense of their own lives, and of the ways in which the rest of society sees them. Drawing on a variety of cultural texts from cinema, television, photography and literature, the author considers the manner in which contemporary cultural forms have shaped a body of public opinion in response to the social and cultural impact of HIV/AIDS, re-interpreting the condition in the light of advances in treatment. With attention to both the temporality and spatiality of production,

this book examines whether heterosexual and homosexual, and masculine and feminine bodies are narrativised in the same manner, considering the question of whether representations foster discrimination of any kind. The book also asks whether representations across Latin America are homogenous or varied according to national, social or cultural context, and explores the commonalities between the representations of HIV/AIDS in Hispano-America and the Caribbean and other global narratives. A detailed study of the various representations of HIV/AIDS and the construction of public opinion, this book will appeal to scholars of cultural, media and film studies, the sociology of health, the body and illness, and Latin American and Caribbean Studies.

An authentic compendium of 1970s' New York style and attitude and a confirmed masterpiece. Idols began with an awestruck Larrain visiting Kansas City in the explosively liberating early years of the gay rights movement and befriending Taylor Meade and John Noble. Once they had been photographed, the rest of the troupe followed suit. The result is a collection of photographs of a generation of New York's most talented, outrageous, glamorous and mostly gay personalities who posed for Larrain in his now legendary Soho studio.

Tropicality is a centuries-old Western discourse that treats otherness and the exotic in binary – 'us' and 'them' – terms. It has long been implicated in empire and its anxieties over difference. However, little attention has been paid to its twentieth-century genealogy. This book explores this neglected history through the work of Pierre Gourou, one of the century's foremost purveyors of what anti-colonial writer Aimé Césaire dubbed *tropicalité*. It explores how Gourou's interpretations of 'the nature' of the tropical world, and its innate difference from the temperate world, were built on the shifting sands of twentieth-century history – empire and freedom, modernity and disenchantment, war and revolution, culture and civilisation, and race and development. The book addresses key questions about the location and power of knowledge by focusing on Gourou's cultivation of the tropics as a romanticised, networked and affective domain. The book probes what Césaire described as Gourou's 'impure and worldly geography' as a way of opening up interdisciplinary questions of geography, ontology, epistemology, experience and

materiality. This book will be of great interest to scholars and students within historical geography, history, postcolonial studies, cultural studies and international relations.

This extensive bibliography and reference

guide is an invaluable resource for researchers, practitioners, students, and anyone with an interest in Canadian film and video. With over 24,500 entries, of which 10,500 are annotated, it opens up the literature devoted to Canadian film and video, at last making it readily accessible to scholars and researchers. Drawing on both English and French sources, it identifies books, catalogues, government reports, theses, and periodical and newspaper articles from Canadian and non-Canadian publications from the first decade of the twentieth century to 1989. The work is bilingual; descriptive annotations are presented in the language(s) of the original publication. *Canadian Film and Video / Film et vidéo canadiens* provides an in-depth guide to the work of over 4000 individuals working in film and video and 5000 films and videos. The entries in Volume I cover topics such as film types, the role of government, laws and legislation, censorship, festivals and awards, production and distribution companies, education, cinema buildings, women and film, and video art. A major section covers filmmakers, video artists,

cinematographers, actors, producers, and various other film people. Volume II presents an author index, a film and video title index, and a name and subject index. In the tradition of the highly acclaimed publication *Art and Architecture in Canada* these volumes fill a long-standing need for a comprehensive reference tool for Canadian film and video. This bibliography guides and supports the work of film historians and practitioners, media librarians and visual curators, students and researchers, and members of the general public with an interest in film and video.

Ce livre n'est pas un panégyrique sur l'homosexualité. C'est une étude scientifique menée par le Professeur James Smalls qui enseigne l'histoire de l'art dans la prestigieuse université de Maryland, Baltimore County. Mettre en

évidence la sensibilité particulière des homosexuels dans la créativité, telle est la démarche de l'auteur, en abandonnant les clichés classiques et l'approche sociologique. Cet ouvrage analyse l'acte de création et permet d'appréhender, sans aucune complaisance, l'apport de l'homosexualité dans l'évolution de la

perception des émotions. A une époque où les tabous sont tombés, cette démonstration conduit à une relecture et une nouvelle compréhension des chefs-d'œuvre de notre civilisation. Grâce à son iconographie très riche et à l'angle d'analyse choisi, L'Homosexualité dans l'Art est un ouvrage de référence majeur.
