 In January 2005, the German government enacted a substantial reform of the welfare system, the so-called "Hartz IV reform". This book evaluates key characteristics of the reform from a microeconomic perspective. It investigates whether a centralized or decentralized organization of welfare administration is more successful to integrate welfare recipients into employment. Moreover, it analyzes the employment effects of an intensified use of benefit sanctions and evaluates the effectiveness and efficiency of the most frequently assigned Active Labor Market Programs. The analyses have a focus on immigrants, who are highly over-represented in the German welfare system.

Declining American competitiveness in world economic markets has renewed interest in employment testing as a way of putting the right workers in the right jobs. A new study of the U.S. Department of Labor's General Aptitude Test Battery (GATB) Referral System sheds light on key questions for America's employers: How well does the GATB predict job success? Are there scientific justifications for adjusting minority test scores? Will increased use of the GATB result in substantial increases in productivity? Fairness in Employment Testing evaluates both the validity generalization techniques used to justify the use of the GATB across the spectrum of U.S. jobs and the policy of adjusting test scores to promote equal opportunity.

A Quick Guide to Human Resource Testing is a quick reference guide for human resource (HR) practitioners who use or plan to use assessment instruments in any context. It includes explanations, tips, case studies and suggestions to help practitioners get the most out of their HR testing. Those in charge of recruiting and selecting new staff face a decision-making process that needs to be responsible in its implementation and to produce a positive and wide-ranging outcome. The cost of a wrong selection decision has been estimated to be anywhere between one and a half times and five times the salary of the job in question. Studies have shown that appropriate assessment tools enhance the chances of making good selection and recruitment decisions. Testing is also important to the HR practitioner in a variety of other contexts, including team building, change management and ongoing organisational needs. Good practice and appropriate use of tests are as vital to these areas as they are in the selection and recruitment of staff.
