The News Crossway

This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in

different parts of the world.

The first encyclopedia to look at the study of material culture (objects, images, spaces technology, production, and consumption), and what it reveals about historical and contemporary life in the United States. Reaching back 400 years, *Material Life in America: An Encyclopedia* is the first reference showing what the study of material culture reveals about American society—revelations not accessible through traditional sources and methods. In nearly 200 entries, the encyclopedia traces the history of artifacts, concepts and ideas, industries, peoples and cultures, cultural productions, historical forces, periods and styles, religious and secular rituals and traditions, and much more. Everyone from

researchers and curators to students and general readers will find example after example of how the objects and environments created or altered by humans reveal as much about American life as diaries, documents, and texts. In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the

kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

SPECIAL EVENT Hailed by Toni Morrison as “required reading,” a bold and personal literary exploration of America’s racial history by “the most important essayist in a generation and a writer who changed the national political conversation about race” (Rolling Stone) NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • NAMED ONE OF PASTE’S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation’s history and current crisis. Americans have built an empire on the idea of “race,” a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and,

today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates’s attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children’s lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward. **Between the World and Me** Springer Nature English Unlimited is a six-level (A1 to C1) goals-based course for adults. Centred on purposeful, real-life objectives, it prepares

learners to use English independently for global communication.

The Knowing the Bible series is a resource designed to help Bible readers better understand and apply God's Word. These 12-week studies lead participants through books of the Bible and are made up of four basic components: (1) reflection questions help readers engage the text at a deeper level; (2) "Gospel Glimpses" highlight the gospel of grace throughout the book; (3) "Whole-Bible Connections" show how any given passage connects to the Bible's overarching story of redemption, culminating in Christ; and (4) "Theological Soundings" identify how historic orthodox doctrines are taught or reinforced throughout Scripture. With contributions from an array of influential pastors and church leaders, these gospel-centered studies will help Christians see and cherish the message of God's grace on every page of the Bible. The letter to the Ephesians is a source of great encouragement, clearly proclaiming the mystery of the gospel and the supremacy of Jesus while applying that theology to practical living. Made alive in

Christ, believers have received a bountiful inheritance and lavish blessings from God, fueling us for holy living. In this study, Eric Redmond opens our eyes to Paul's teaching about God's astonishing grace—grace that enables us to walk in love, holiness, and wisdom as we become imitators of Christ.

Moral Sentiments and Material Interests presents an innovative synthesis of research in different disciplines to argue that cooperation stems not from the stereotypical selfish agent acting out of disguised self-interest but from the presence of "strong reciprocators" in a social group. Presenting an overview of research in economics, anthropology, evolutionary and human biology, social psychology, and sociology, the book deals with both the theoretical foundations and the policy implications of this explanation for cooperation. Chapter authors in the remaining parts of the book discuss the behavioral ecology of cooperation in humans and nonhuman primates, modeling and testing strong reciprocity in economic scenarios, and reciprocity and

social policy. The evidence for strong reciprocity in the book includes experiments using the famous Ultimatum Game (in which two players must agree on how to split a certain amount of money or they both get nothing.)

Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods—and the wonder—of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a

greater impact in the classroom and provides resources for further research.

It is a challenge that has to be faced squarely by everyone who is interested in accomplishing his/her tasks within the limited time available, and this time is equally endowed. Good time management is an important factor in getting things done within the available 24-hour-period of a day. This book specially targets scholars who should be role models to other people on effective time management and utilization. Although the book has the scholar in mind other users of time in the various sectors of any economy will also find it useful.
