This edited volume contains the selected papers presented at the scientific board meeting of the German Cluster of Excellence on “Integrative Production Technology for High-Wage Countries”, held in November 2014. The topical structure of the book is clustered in six sessions: Integrative Production Technology, Individualised Production, Virtual Production Systems, Integrated Technologies, Self-Optimising Production Systems and Human Factors in Production Technology. The Aachen perspective on a holistic theory of production is complemented by conference papers from external leading researchers in the fields of production, materials science and bordering disciplines. The target audience primarily comprises research experts and

practitioners in the field but the book may also be beneficial for graduate students.

Doing Business in 2005: Obstacles to Growth is the second in a series of annual reports investigating the scope and manner of regulations that enhance business activity and those that constrain it. New quantitative indicators on business regulations and their enforcement can be compared across more than 130 countries, and over time. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why. Topics in Doing Business in 2005 include: Licensing and Inspections: Having registered a business, now what? In most countries, firms face a myriad of sector specific licenses as well as inspections to enforce compliance. The Doing Business database constructs two sets of indicators on the regulation of operations. One measures the steps, time and costs of complying with licensing and permit requirements for ongoing. The other assesses the enforcement of regulations through two of the most common types of inspections-labor and tax. Registering

Property: Property registries were first developed to help raise tax revenue. What was good for the tax authorities has since proven to be good for strengthening property rights--the registries strengthen incentives to invest, facilitate trade, and expand access to credit. New indicators cover the steps, time and cost to register property. Measures of the legal provisions that strengthen property rights and the efficiency of property registries are also developed. Protecting Investors: Corporate governance issues are often thought to affect only publicly listed companies in developed countries. In fact, corporate governance is relevant for every large privately held company that has more than one owner. New indicators examine several possible types of shareholder expropriation, including related-party transactions, guarantees and loans to company managers and directors, mergers and acquisitions, disclosure of ownership information, and treatment of conflicts of interest. Including a new emphasis on gender, Doing Business not only provides insights into business constraints throughout the world but highlights particular barriers faced by women. Doing Business is a comprehensive resource that no investor, economic adviser, business developer, or economic policymaker should be without.

This insightful new book sheds light directly on shame and guilt--interactive aspects of the human condition that are deeply involved in the development and treatment of alcoholism and chemical dependency. Contributors to this valuable book discuss the process of healing internalized shame within the chemically dependent client and among the family members. They explore creative techniques that foster understanding and coping

strategies--videotaping and storytelling with clay and stuffed animals. Professionals who are experienced in treating chemically dependent clients and their families explore shame and the healing of shame, while examining the culture within which both occur. A major focus is the destructiveness of shame and guilt--shame keeps the family from seeking help, erodes self-worth, and produces destructive secrets that cannot heal, and guilt may circulate freely between alcoholic and family members, so that everyone begins to feel responsible for the pain of others.

The FASB Statements of Financial Accounting Concepts contains the full text of five of the six Statements of Financial Accounting Concepts issued to date. The existing concepts are intended to serve the public interest by setting the objectives, qualitative characteristics, and other concepts that guide selection of economic events to be recognized and measured for financial reporting. Unlike a Statement of Financial Accounting Standards, a Statement of Financial Accounting Concepts does not establish generally accepted Accounting Principles.

In an introductory chapter and six speeches the former Vice-President of Indonesia stresses the importance of the formation of co-operatives. The speeches are directed to Indonesians, and in them the author expresses his view that co-operatives are the only way to build the national economy. The tables in the book give evidence as to how much the co-operative movement has grown, despite the tremendous handicaps of lack of capital, lack of experience, lack of leadership, and the general poverty of the people! Hatta envisions a classless society in which every man is both worker and manager in his co-operative, and he sees capitalistic enterprises as only temporary necessities in Indonesia-to do those jobs too big for the small co-operatives but not large enough to be government projects. This work should prove to be thought-provoking for economists and all who are interested in Indonesia's future.

Praktik koperasi sudah tidak asing lagi di Indonesia karena sejalan dengan asas kekeluargaan dalam perekonomian yang tertuang dalam UUD 1945. Dasar filosofis koperasi sangat jelas,

yakni mengedepankan kebersamaan individu di dalam kegiatan ekonomi, dan di sisi yang lain juga dikenal adanya kebersamaan yang sifatnya sosial. Namun pada kenyataannya, kebersamaan secara ekonomi sebagaimana keberadaan koperasi ini mengalami perkembangan yang pasang surut. Keberadaan koperasi itu sangat kompleks. Pengembangan koperasi terkait dengan multidimensi. Oleh karena itu, kurang memadai jika dalam pengelolaan dan pengembangannya hanya menggunakan pendekatan yang parsial. Harus ada bauran cara agar kompleksitas dimaksud bisa tertangani dengan baik. Buku ini akan membahas berbagai dimensi strategis yang dimiliki oleh koperasi dan pengelolaannya sehingga koperasi dapat dikembangkan secara optimal. Materi yang dibahas dalam buku ini mencakup: Bab 1 Pendahuluan Bab 2 Dimensi Kelembagaan Bab 3 Dimensi Usaha Bab 4 Dimensi Modal Bab 5 Dimensi Ilmu dan Teknologi Bab 6 Dimensi Manajemen Bab 7 Dimensi Kemitraan Bab 8 Dimensi Etika Moral Bab 9 Catatan Penutup *The Treatment of Shame and Guilt in Alcoholism Counseling* Routledge

This book aims to reflect the contours of the notion of aid as it is questioned by current scientific research. This notion appears as fuzzy in its scope of intervention, in its methods of multidisciplinary and multi-referential approaches in theoretical frameworks convened. Present in different areas that we propose to investigate in the book (training and teaching at university, inclusion in education, but also prevention, the fight against failure in orientation), the notion of help questions research in SHS and Computer Science. It comes in different formats labeled "help" but also "support", "support" or "guidance". In order to

take stock of these notions and to question their differences, we convoke several authors (French and foreign) who participate by their research (-action) underlining components and environmental factors of the device that give this notion any its thickness.

Ekonomi berbasis syariah yang karakteristiknya sangat kental dengan khazanah keislaman, merupakan alternatif yang sangat tepat untuk dikembangkan di tengah aliran konsep perekonomian yang sangat beragam. Lembaga keuangan syari'ah yang berkembang dengan pesat saat ini, memerlukan sistem yang dapat mendukung perkembangan dan keberlangsungannya, khususnya dalam hal pengawasan lembaga. Sistem pengawasan yang sudah berjalan perlu dituangkan dalam sebuah pedoman yang memungkinkan

siapapun yang mengelola lembaga keuangan syariah tersebut dapat menjalankannya dengan baik. Sementara itu, penyusunan sistem pengawasan yang dimaksud di atas, adalah sistem pengawasan di luar urusan (fatwa) kesyariahan. Sebab, pengawasan dalam kesyariahan koperasi telah menjadi domain Dewan Pengawas Syari'ah (DPS). Sementara itu, sistem pengawasan yang dijalankan oleh pengawas di Koperasi Simpan Pinjam dan Pembiayaan Syariah Nuri Jawa Timur lebih dititikberatkan pada pengawasan bidang kedisiplinan, administrasi, pencatatan keuangan, pengelolaan, serta kebijakan yang dilakukan oleh pengurus. Kami berharap buku pedoman pengawas ini dapat memudahkan pengawas KSPPS Nuri Jatim dalam memahami dan menerapkan sistem pengawasan yang sudah berjalan, serta dapat memberikan manfaat bagi kepentingan koperasi secara khusus dan masyarakat secara umum.

A new form of accounting statement--the value added statement--is gaining popularity in the corporate annual reports of the largest companies in the United Kingdom. This new statement can be viewed as a modified version of the income statement. Like the income statement, the value added statement reports the operating performance of a company at a given point in time, using both accrual and matching procedures. Unlike the income statement, however, it is interpreted not as a return to shareholders but as a return to the larger group of capital and labor providers. Riahi-Belkaoui shows that the value added statement can be easily derived from the income statement and

is therefore easily adaptable to the needs of U.S. companies. To illustrate the usefulness of the value added statement, Riahi-Belkaoui devotes Chapter 1 to a thorough discussion of its many benefits. He then analyzes the usefulness of the value added concept in understanding the characteristics of corporate takeovers in the United States, and in Chapter 3 he discusses the relationship between the value added concept and the systematic risk of U.S. companies, concluding in Chapter 4 with a discussion of value added statements in financial analysis. His book will thus interest not only accountants, teachers, and students who follow trends in international and multi-national accounting but also those who want to prepare themselves for the development of value added techniques and procedures that might reasonably be expected in the United States.

Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance

standards.

Understanding and Managing Public Organizations provides a comprehensive analysis of research and practice on public organizations and management. In this fourth edition of his award-winning best seller, Hal Rainey reviews topics including organizational goals and performance, decision making and strategy, leadership, motivation, organizational structure and design, organizational change, and others. He analyzes effective and ineffective practices, with suggestions for managing contemporary and classic challenges in public organizations, and with illustrative vignettes and examples. Carefully revised and updated, this edition of Understanding and Managing Public Organizations extends previous editions with deeper coverage of collaboration and networks, public values, public service motivation, managerial strategy, performance assessment, innovation and organizational change, and recent trends in public sector management. Praise for the Previous Editions "The third edition of the classic text provides a comprehensive, up-to-date analysis of research on public organizations and management. Drawing on a review of the most current research about government organizations and managers, this important source offers specific suggestions for managing these challenges in today's public organizations." ? Abstracts of Public Administration "A masterful textbook, as well as an important and original contribution to the public organization theory literature ? both comprehensive in its treatment of organization theory and decidedly 'public' in its perspective." ?Public Administration Review "A tremendous contribution to the field. Rainey's ability to

synthesize research streams from a variety of fields?such as political science, public administration, public policy, business administration, psychology, sociology, and others?is outstanding." ?Jeffrey L.  The magic and suspense of Graceling meet the political intrigue and unrest of Game of Thrones in this riveting fantasy debut. Your greatest enemy isn't what you fight, but what you fear. Elizabeth Grey is one of the king's best witch hunters, devoted to rooting out witchcraft and doling out justice. But when she's accused of being a witch herself, Elizabeth is arrested and sentenced to burn at the stake. Salvation comes from a man she thought was her enemy. Nicholas Peveril, the most powerful and dangerous wizard in the kingdom, offers her a deal: he will save her from execution if she can break the deadly curse that's been laid upon him. But Nicholas and his followers know nothing of Elizabeth's witch hunting past--if they find out, the stake will be the least of her worries. And as she's thrust into the magical world of witches, ghosts, pirates, and one all-too-handsome healer, Elizabeth is forced to redefine her ideas of right and wrong, of friends and enemies, and of love and hate. Virginia Boecker weaves a riveting tale of magic, betrayal, and sacrifice in this unforgettable fantasy debut.

This paper describes a new cross-country database on the importance of small and medium enterprises (SMEs). This database is unique in that it presents consistent and comparable information on the contribution of the SME sector to total

employment and GDP across different countries. The dataset improves on existing publicly available datasets on several grounds. First, it extends coverage to a broader set of developing and industrial economies. Second, it provides information on the contribution of the SME sector using a uniform definition of SMEs across different countries, allowing for consistent cross-country comparisons. Third, while we follow the traditional definition of the SME sector as being part of the formal sector, the new database also includes the size of the SME sector relative to the informal sector. This paper describes the sources and the construction of the different indicators, presents descriptive statistics, and explores correlations with other socioeconomic variables. This paper--a product of Finance, Development Research Group--is part of a larger effort in the group to study SME-related issues.

Bankruptcy prediction is one of the most important research areas in corporate finance. Bankruptcies are an indispensable element of the functioning of the market economy, and at the same time generate significant losses for stakeholders. Hence,

this book was established to collect the results of research on the latest trends in predicting the bankruptcy of enterprises. It suggests models developed for different countries using both traditional and more advanced methods. Problems connected with predicting bankruptcy during periods of prosperity and recession, the selection of appropriate explanatory variables, as well as the dynamization of models are presented. The reliability of financial data and the validity of the audit are also referenced. Thus, I hope that this book will inspire you to undertake new research in the field of forecasting the risk of bankruptcy.
