 Meredith Willis is suspicious of Adrien, the new guy next door. When she dares to sneak a look into the windows of his house, she sees something in the cellar that makes her believe that Adrien might be more than just a creep—he may be an actual monster. But her sister, Heather, doesn't share Meredith's repulsion. Heather believes Adrien is the only guy who really understands her. In fact, she may be falling in love with him. When Adrien and Heather are cast as the leads in the school production of *Romeo and Juliet*, to Heather, it feels like fate. To Meredith, it feels like a bad omen. But if

she tries to tear the couple apart, she could end up in the last place she'd ever want to be: the cellar. Can Meredith convince her sister that she's dating the living dead before it's too late for both of them?

The betrayal between two birds is a novel by author Shawn M. Wells. The synopsis of the book is about a boy named Christopher Stephens, who is the protagonist of this story and is being sued by Malcolm X High School for holding illegal narcotics in his locker. Chris in the story believes that he is being framed for this incident because he has no memory of doing this heinous act, but he has no evidence to prove it wasn't him. Though the attorney who is representing Malcolm

X High School has evidence to prove this, in this case, the judge and jury found Chris Stephens guilty. The punishment that Chris would have to endure is ten years of juvenile detention. Throughout the story, he goes through life feeling like a criminal stuck in a hellhole, including being bullied by some delinquent kids and turning insane in the process. Chris gets introduced to a gang that breaks him out of a padded room. The gang consists of five boys. Their names are James, Sam, Cody, Marcus, and Doug. They all came up with a plan to break out of the detention center, and they are hoping that they can get Chris's help. They are able to break him out of the padded room and get him to help, especially since they leaked information on who put him in this detention center in the first place. Chris realizes that he was framed by his closest friend, Greg. That makes Chris angry, to

the point that he wants to exact revenge against Greg. Chris and his gang are able to break out, and they all go their separate ways. Chris accomplishes his goal in escaping the juvenile detention center, but now his next goal is to get even with his friend Greg, which would also lead to Chris's own death.

Big Nate meets Timmy Failure in *Funny Kid for President*, the first book in an uproarious new middle grade series by Matt Stanton, Australia's bestselling children's book author. When Max gets blamed for pooping in the storeroom (which he did NOT do), tensions hit an all-time high between him and his terrifyingly large teacher, Mr. Armstrong. But then, the most unexpected thing happens--the school principal, Mrs. Sniggles, suggests Max run for class president. Max isn't the only kid on the ballot, however. His archenemy, Abby Purcell, is also up for election--and she's out to defeat him at all costs. To win, Max is going to need the 24/7 help of his best friend, Hugo, and he's going to have to run the campaign of a lifetime. Max may not be the smartest or fastest kid, or the handsomest, but he just might be the funniest kid you'll ever meet--and it's this talent that could turn him from underdog to top dog. Max for President! Matt Stanton brings his veteran children's book chops to this hilarious new series, perfect for early middle grade readers looking for side-splitting laughs! *The Answers Book for Kids Volume 1* Turtleback Books

Dr. Goldstein has authored more than 50 publications and co-edited two books. Her latest contribution to the field of nephrology, *Mechanisms of Injury in Renal Disease and Toxicity*, promotes an understanding of the pathophysiologic mechanisms mediating renal dysfunction in disease. It provides an important perspective in understanding mechanisms of chemically induced renal injury. Over the past decade, understanding of the pathophysiologic and molecular basis of renal disease has grown tremendously. New and evolving concepts on the pathophysiology of glomerulonephritis, chronic glomerular injury, diabetic nephropathy, and acute renal failure are changing the clinical management of these disease states.

Raising a child is a tough job. The job has two major components, parenting and teaching. It is an onerous task and the two communities in the forefront of it are the parents and teachers. The efforts of the two groups run complementary to each other, as both are well-wishers of children and share a common objective. There is, therefore, need for a strong partnership between the two communities. They have to share each other's stories and concerns about the child. *Let Them Fly* has 25 stories, each based on true-life experiences about raising a child and attending to its psychological and academic needs in the contemporary social and scholastic milieu. The book contains no abstract theories but actual case studies. This makes it a unique presentation. The stories are drawn from a diverse set of geographies and social strata. The experiences shared in this book are from sleepy rural centres, as also from boisterous metros. Yet, typical of a parent or teacher from any background, their concerns could be the same. The stories are written in simple and easy language. The book does not nit-pick either the teachers or parents, but brings out the sensitivity on issues about growing up. Each story ends with a conclusion, suggesting a more appropriate alternate course.

In the first book of the *Diary of a Wimpy Kid* series, #1 international bestselling author Jeff Kinney introduces us to Greg Heffley: an unforgettable, unlikely hero that every family can relate to. Being a kid can really stink. And no one knows this better than Greg. He finds himself thrust into middle school, where undersized weaklings share the hallways with kids who are taller, meaner, and already shaving. Greg is happy to have Rowley Jefferson, his sidekick, along for the ride. But when Rowley's star starts to rise, Greg tries to use his best friend's newfound popularity to his own advantage, kicking off a chain of events that will test their friendship in hilarious fashion. The hazards of growing up before you're ready are uniquely revealed through words and drawings as Greg records them in his diary. But as Greg says: "Just don't expect me to be all 'Dear Diary' this and 'Dear Diary' that." Luckily for us, what Greg Heffley says he won't do and what he actually does are two very different things. A captivating memoir about tutoring for Manhattan's elite, revealing how a life of extreme wealth both helps and harms the children of the one percent. Ben orders daily room service while living in a five-star hotel. Olivia collects luxury brand sneakers worn by celebrities. Dakota jets off to Rome when she needs to avoid drama at school. Welcome to the inner circle of New York's richest families, where academia is an obsession, wealth does nothing to soothe status anxiety and parents will try just about anything to gain a competitive edge in the college admissions rat race. When Blythe Grossberg first started as a tutor and learning specialist, she had no idea what awaited her inside the high-end apartments of Fifth Avenue. Children are expected to be as efficient and driven as CEOs, starting their days with 5:00 a.m. squash practice and ending them with late-night tutoring sessions. Meanwhile, their powerful parents will do anything to secure one of the precious few spots at the Ivy Leagues, whatever the cost to them or their kids. Through stories of the children she tutors that are both funny and shocking, Grossberg shows us the privileged world of America's wealthiest families and the systems in place that help them stay on top.

Designed to cover techniques for analysis of data in the animal sciences, this popular textbook provides an overview of the basic principles of statistics enabling the subsequent applications to be carried out with familiarity and understanding. Each chapter begins by introducing a problem with practical questions, followed by a

brief theoretical background. Most topics are followed up with numerical examples to illustrate the methods described using data-sets from animal sciences and related fields. The same examples are then solved using the SAS software package. Written primarily for students and researchers in animal sciences, the text is also useful for those studying agricultural, biological, and veterinary sciences.
