For the two-semester A&P

laboratory course. Help manage time and improve learning inside and outside of the lab The #1 best-selling Human Anatomy & Physiology Laboratory Manual helps students and instructors manage time inside and outside of the A&P lab classroom and works hand-in-hand with Mastering A&P, the leading online homework and learning program for A&P. The 13th Edition features dozens of new, full-color figures and photos in the review sheets, as well as

revamped clinical application questions and critical thinking questions that reinforce the most important concepts from lab. Encourage students to prepare for lab by assigning recommended Mastering A&P activities for each lab exercise, including 18 pre-lab videos (8 are new to this edition), Building Vocabulary Coaching Activities, exercise review sheet assessment questions, art labeling activities, mobile-ready Practice Anatomy Lab(tm) 3.1 with customizable

flashcards, and more. Thousands of assignment options in the Item Library are closely correlated with the print edition of the manual, making it easier than ever to create homework assignments that are aligned with your lab activities. Continuing to set the standard for the 2-semester A&P laboratory course, the lab manual complies with the illustration and presentation style of the best-selling Marieb/Hoehn Human Anatomy & Physiology text, but can accompany any A&P

textbook. New customization options are available through Pearson Collections, as well as three conventional versions: Main (12th Edition), Cat (13th Edition), and Fetal Pig (13th Edition). Also available with Mastering A&P Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience,

Mastering personalizes learning and improves results for each student. Mastering A&P assignments support interactive features in the lab manual, including pre-lab video coaching activities, bone, muscle, and dissection videos, Dynamic Study Modules, Get Ready for A&P, plus a variety of Art Labeling Questions, Clinical Application Questions, and more. Note: You are purchasing a standalone product; Mastering A&P does not come packaged with this content.

 The Bohensky Dissection  
 Series has been used  
 successfully by more than  
 300,000 biology students

nationwide. Each book in  
 the series is designed to  
 guide the student through  
 the study of anatomical  
 structures. The books do  
 this through the use of  
 clearly marked  
 photographs and  
 illustrations.  
 Accompanying text offers  
 the student both easy-to-  
 follow dissection  
 instructions and factual  
 information about the  
 section under  
 observation. At the end of  
 each chapter there are  
 tests which can be used  
 for self-study or for grade  
 course evaluation. Within

the traditional dissection  
 portion of a biology  
 course, many programs  
 include the sheep heart,  
 eye, and brain. Within  
 many of these guides, the  
 author has incorporated  
 photographs of these  
 structures to more closely  
 follow standard course  
 curriculum. The author  
 also provides important  
 information on human  
 organs such as the eye,  
 ear, and heart. In this  
 way, the student can  
 better understand the role  
 and function of these  
 organs as they relate to  
 human life processes. Add

to this each book's large-size format, lay-flat spiral binding, and reasonable cost, and you can see why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country's schools.

*Anatomy and Dissection of the Fetal Pig* Anatomy and Dissection of the Fetal Pig
