Biogeography and Ecology in South America Gulf Professional Publishing
This volume collects together the Dada writings of Theo van

Doesburg, the celebrated De Stijl architect. Apart from the title lecture these texts appeared under the pseudonym of I.K. Bonset and were generally published in Van Doesburg's magazine Mecano (four issues 1922-23). Also included is his novel The Other Sight. Michael White's

introduction describes the Dada tour of Holland undertaken by Van Doesburg and his friends at the beginning of 1923." **Denkwürdigkeiten einer reise nach dem russischen Amerika, nach Mikronesien und durch Kamtschatka** Taylor & Francis
Based on phylogenetic

research, this complete study of the genus *Sylvia* describes two new species and establishes identification criteria for all members of the family. A lengthy introduction explains the background to the research and outlines the main features of the genus. The 25 species are then treated in detail, including the African parusomas, which are here included in the *Sylva* group. The species accounts include sections on every aspect of identification, with colour illustrations showing age,

sex and racial differences, distribution maps, sonograms, moult and wing diagrams and tables. Zoology in Early Modern Culture: Intersections of Science, Theology, Philology, and Political and Religious Education Princeton University Press This volume collects the most substantial correspondence and documents relating to Wittgenstein's long association with Cambridge between the years 1911 and his death in 1951, including the letters he exchanged with

his most illustrious Cambridge contemporaries Russell, Keynes, Moore, and Ramsey (and previously published as Cambridge Letters). Now expanded to include 200 previously unpublished letters and documents, including correspondence between Wittgenstein and the economist Piero Sraffa, and between Wittgenstein and his pupils Includes extensive editorial annotations Provides a fascinating and intimate insight into Wittgenstein's life and thought

"When I see a thing it is not a play for me, but when I write something that somebody else can see then it is a play for me." —Gertrude Stein In the more than seventy-five plays Gertrude Stein wrote between 1913 and 1946, she envisioned a new dramaturgy, beginning with her pictorial conception of a play as a landscape. She drew into her plays the daily flow of life around

her—including the natural world—and turned cities, villages, parts of the dramatic structure, and even her own friends into characters. She made punctuation and typography part of her compositional style and chose words for their joyful impact as sound and wordplay. For Stein, the writing process itself was always important in developing the "continuous present" at the heart of her work. Long out of print, *Last Opera and Plays* again makes available many of

Stein's most important and most-produced works. As a special feature, it also included her thought-provoking essay "Plays," in which she reflects on the experience in the theater of seeing and hearing, and on emotion and time. "Now nearly a half century after her death," writes Bonnie Marranca in her introduction, "it is indisputable that Gertrude Stein is the great American modernist mind. No American author has been more influential for more generations of

artists in the worlds of theater, dance, music, poetry, painting, and fiction."

Insectivorous Plants

Open Road + Grove/Atlantic
Aesthetics is no longer merely the philosophy of perception and the arts. Nelson Goodman, Arthur Danto and others have contributed to develop aesthetics from a field at the margins of philosophy to one permeating substantial areas of theoretical and practical philosophy. New approaches like

environmental and ecological aesthetics widened the understanding of the aesthetics of nature. The contributions in this volume address the most important issues in contemporary aesthetics, many of them from a Wittgensteinian perspective. The 39th International Ludwig Wittgenstein Symposium, organized by the Austrian Ludwig Wittgenstein Society, was held at Kirchberg am Wechsel, Lower Austria, from August 7th to 13th 2016

and aimed at taking an inventory of important tendencies and positions in contemporary aesthetics. The volume includes a selection of the invited papers.
Proceedings of the International Ornithological Congress
Springer Nature
Long awaited by the scholarly community, Wittgenstein's so-called Big Typescript (von Wright Catalog # TS 213) is presented here in an en face English-German scholar's edition. Presents scholar's edition of

important material from 1933, Wittgenstein's first efforts to set out his new thoughts after the publication of the *Tractatus Logico Philosophicus*. Includes indications to help the reader identify Wittgenstein's numerous corrections, additions, deletions, alternative words and phrasings, suggestions for moves within the text, and marginal comments.

The Hawfinch Рипол Классик

This volume tries to map out the intriguing

amalgam of the different, partly conflicting approaches that shaped early modern zoology. Early modern reading of the "Book of Nature" comprised, among others, the description of species in the literary tradition of antiquity, as well as empirical observations, vivisection, and modern eyewitness accounts; the "translation" of zoological species into visual art for devotion, prayer, and religious education, but also scientific and scholarly curiosity; theoretical, philosophical,

and theological thinking regarding God's creation, the Flood, and the generation of animals; new attempts with respect to nomenclature and taxonomy; the discovery of unknown species in the New World; impressive Wunderkammer collections, and the keeping of exotic animals in princely menageries. The volume demonstrates that theology and philology played a pivotal role in the complex formation of this new science. Contributors

include: Brian Ogilvie, Bernd Roling, Erik Jorink, Paul Smith, Sabine Kalff, Tamás Demeter, Amanda Herrin, Marrigje Rikken, Alexander Loose, Sophia Hendrikx, and Karl Enenkel.

Stefan Zweig and World Literature

Hachette UK
In 1999, translator Richard Zenith made a

new find in the Pessoa archive in Lisbon: a group of prose writings by a previously unknown heteronym, the Baron of Teive.' The Portuguese volume of these writings has been received by scholars as a crucial piece of the puzzle that is Pessoa's oeuvre. The Education of the Stoic is the unique work left by the Baron of Teive, who, after destroying all his previous literary attempts and before destroying himself, explains 'the impossibility of producing superior art.' It is the dark

companion piece to The Book of Disquiet.'

The Education of the Stoic
Collins

A tour de force of scholarship and book production: an essential reference for anyone interested in costume history, Renaissance studies, theater, and ethnography.

Of Trees and Birds

Wiley-Blackwell
Gisbert Fanselow's work has been invaluable and inspiring to many - researchers working on syntax, morphology, and information structure,

both from a theoretical and from an experimental perspective. This volume comprises a collection of articles dedicated to Gisbert on the occasion of his 60th birthday, covering a range of topics from these areas and beyond. The contributions have in common that in a broad sense they have to do with language structures (and thus trees), and that in a more specific sense they have to do with birds. They thus cover two of Gisbert's major interests in- and outside of the

linguistic world (and - perhaps even at the interface).

Speciation and Biogeography of Birds

Data can be extremely valuable if we are able to extract information from them. This is why multivariate data analysis is essential for business and science. This book offers an easy-to-understand introduction to the most relevant methods of multivariate data analysis. It is strictly application-oriented, requires little knowledge

of mathematics and statistics, demonstrates the procedures with numerical examples and illustrates each method via a case study solved with IBM's statistical software package SPSS. Extensions of the methods and links to other procedures are discussed and recommendations for application are given. An introductory chapter presents the basic ideas of the multivariate methods covered in the book and refreshes statistical basics which

are relevant to all methods. Contents Introduction to empirical data analysis Regression analysis Analysis of variance Discriminant analysis Logistic regression Contingency analysis Factor analysis Cluster analysis Conjoint analysis The original German version is now available in its 16th edition. In 2015, this book was honored by the Federal Association of German Market and Social Researchers as “the textbook that has shaped market research and

practice in German-speaking countries”. A Chinese version is available in its 3rd edition. On the website www.multivariate-methods.info, the authors further analyze the data with Excel and R and provide additional material to facilitate the understanding of the different multivariate methods. In addition, interactive flashcards are available to the reader for reviewing selected focal points. Download the Springer Nature Flashcards App and use

exclusive content to test your knowledge.

This computerized edition of Wittgenstein's complete philosophical writings include digitized images with instant access to the 20,000 facsimiles and transcriptions cataloged by von Wright in his 1982 publication, *The Wittgenstein papers*. They are presented in two formats: an uncluttered, Normalized reading-text

and a detailed, Diplomatic study-text.

The Big Typescript

Penguin

Completely revised, updated and with four new chapters on sustainability, new technologies, precision agriculture and the future of animal welfare. This book is edited by an outstanding world expert on animal welfare, it emphasizes throughout the importance of measuring conditions that compromise welfare, such as lameness, heat stress, body condition, and

bruises during transport. The book combines scientific information with practical recommendations for use on commercial operations and reviews practical information on livestock handling, euthanasia, slaughter, pain relief, and assessments of abnormal behavior.

Improving Animal Welfare CABI

The Collins New Naturalist series is the longest-running and arguably the most influential natural history series in the world with over 100 volumes

published in over 60 years. This edition is produced from an original copy by William Collins. While the mainstream New Naturalist volumes were initially intended to deal with broad subjects such as wild flowers, insects or National Parks, a parallel New Naturalist series of monographs on single species or related groups of species was also published between 1948 and 1971. There have been no additions since. Now, for the first time in over forty years, these best-selling

volumes are available again. The New Naturalist monographs shared the same high standards of the main series and were envisioned as relatively short books of about 50,000 words, and in a smaller format than the main series. Artists Clifford and Rosemary Ellis were asked to design jackets for this series alongside the main series, which resulted in the same stunning, distinctive cover illustrations that had helped inspire an entire new generation of nature enthusiasts. The

New Naturalist Monograph Series: 1 The Badger by Ernest Neal 2 The Redstart by John Buxton 3 The Wren by Edward A. Philosophical Remarks
A&C Black
"Within a day of receiving
this book, I had consumed
it... Absorbing, moving,
and compulsively
readable."—Lydia Davis In
this affectionate, heart-
warming chronicle,
Rosamund Young distills a
lifetime of organic farming
wisdom, describing the
surprising personalities of
her cows and other
animals At her famous
Kite's Nest Farm in
Worcestershire, England,
the cows (as well as

sheep, hens, and pigs) all
roam free. They make
their own choices about
rearing, grazing, and
housing. Left to be
themselves, the cows
exhibit temperaments and
interests as diverse as our
own. "Fat Hat" prefers
men to women; "Chippy
Minton" refuses to sleep
with muddy legs and
always reports to the barn
for grooming before bed;
"Jake" has a thing for
sniffing the carbon
monoxide fumes of the
Land Rover exhaust pipe;
and "Gemima" greets all
humans with an angry

shake of the head and is
fiercely independent. An
organic farmer for
decades, Young has an
unaffected and homely
voice. Her prose brims
with genuine devotion to
the wellbeing of animals.
Most of us never
apprehend the various
inner lives animals
possess, least of all those
that we might eat. But
Young has spent
countless hours observing
how these creatures love,
play games, and form life-
long friendships. She
imparts hard-won wisdom
about the both moral and

real-world benefits of organic farming. (If preserving the dignity of animals isn't a good enough reason for you, consider how badly factory farming stunts the growth of animals, producing unhealthy and tasteless food.) This gorgeously-illustrated book, which includes an original introduction by the legendary British playwright Alan Bennett, is the summation of a life's work, and a delightful and moving tribute to the deep richness of animal

sentience. *International Catalogue of Scientific Literature* BRILL A selection of prose by “Portugal’s greatest writer of the twentieth century . . . as addictive, and endearing, as Borges and Calvino” (The Washington Post Book World). Building on the wonderful Fernando Pessoa & Co.: Selected Poems, which was acclaimed by Booklist as “a beautiful one-volume course in the soul of the twentieth century,” translator Richard Zenith has now edited and translated selections from

Pessoa’s prose, offering a second volume of this forgotten master’s flights of imagination and melancholy wit. Though known primarily as a poet, Pessoa wrote prose in several languages and every genre—the novel, short stories, letters, and essays. The pieces collected here span intellectual inquiry, Platonic dialogue, and literary rivalries between Pessoa’s many alter egos—a diverse cast of literary voices he called ‘heteronyms’—who launch movements and write

manifestos. There are appreciations of Shakespeare, Dickens, Wilde, and Joyce; critical essays in which one heteronym derides the work of another; experiments with automatic writing; and works that toy with the occult. Also included is a generous selection from Pessoa's masterpiece, *The Book of Disquiet*, freshly translated by Richard Zenith from newly discovered materials. Fernando Pessoa was one of the greatest exponents of modernism. The

Selected Prose of Fernando Pessoa is an important contribution to literature that brings back to life a forgotten but crucial part of the canon. *Der Muse reicht's* John Wiley & Sons
When in May 1930, the Council of Trinity College, Cambridge, had to decide whether to renew Wittgenstein's research grant, it turned to Bertrand Russell for an assessment of the work Wittgenstein had been doing over the past year. His verdict: "The theories contained in this new

work . . . are novel, very original and indubitably important. Whether they are true, I do not know. As a logician who likes simplicity, I should like to think that they are not, but from what I have read of them I am quite sure that he ought to have an opportunity to work them out, since, when completed, they may easily prove to constitute a whole new philosophy." "[Philosophical Remarks] contains the seeds of Wittgenstein's later philosophy of mind and of mathematics. Principally,

he here discusses the role of indispensable in language, criticizing Russell's *The Analysis of Mind*. He modifies the *Tractatus*'s picture theory of meaning by stressing that the connection between the proposition and reality is not found in the picture itself. He analyzes generality in and out of mathematics, and the notions of proof and experiment. He formulates a pain/private-language argument and discusses both behaviorism and the verifiability principle. The

work is difficult but important, and it belongs in every philosophy collection."—Robert Hoffman, *Philosophy* "Any serious student of Wittgenstein's work will want to study his *Philosophical Remarks* as a transitional book between his two great masterpieces. The *Remarks* is thus indispensable for anyone who seeks a complete understanding of Wittgenstein's philosophy."—Leonard Linsky, *American Philosophical Association*

Scorpions 2001 Kremer

In the same way Caravaggio was the inspiration behind "Jewels in Painting," so Fra Angelico is the starting point for "Children in Painting." It was while I was looking at his "Last Judgement" in the convent of San Marco in Florence that two child angels filled me with happiness. They are meeting in Paradise and embrace with tenderness before entering the dance of eternal happiness. They make you believe in true

love. Fra Angelico is divine but is a child so? From the day of his birth until the age of ten, one might believe so. This is the reason why no child over ten features in this book. Having a child is a universal desire. A child is life, a child is love. Having to choose amongst an infinite number of pictures, I have attempted to select the most representative ones in Italian, German, Dutch, Flemish, Spanish, English, American, Swiss and French painting, in which

children play, laugh, kiss, cry, eat or sleep. Each of them reveals a masterpiece, in which the artist has exchanged his knowledge for a marvellous innocence. the ordinary becomes extraordinary, truth reveals beauty and beauty reveals truth. This book is as much for adults as it is for children, who will hopefully be encouraged to delve further into the world of art. To understand it is to start loving it: admire it and let yourself be carried away from everyday's

routine.

The Secret Life of Cows
Universitätsverlag
Potsdam

This dissertation documents Pasternak's reception of literature from three periods within German Romanticism: the early Romanticism of the Jena School's literary representative, Friedrich von Hardenberg (Novalis), the "second-generation" Romanticism of E.T.A. Hoffmann; and the end and rejection of German Romanticism, represented by Heinrich Heine.
