FRANCIS DAYTON

Regional Language Television in India SAGE

Pramukh Swamiji Maharaj, one of the most inspiring spiritual figures of modern times and the fifth spiritual successor of Bhagwan Swaminarayan, became a friend of the eleventh president of India, Dr A.P.J. Abdul Kalam. Together they created an unparalleled spirituality-science fellowship. In Roohdaar, Dr Kalam and Arun Tiwari map a journey of self-realization reflected in the eyes of Pramukh Swamiji, painting a delightful fusion of spirituality, science and leadership. Through the life of Pramukh Swamiji and the history of the Swaminarayan mission, Dr Kalam traces the great rise of the Indian diaspora across the world. Drawing from the lives of great

scientists and creative leaders, the book captures the spiritual essence of all religions and is a tribute to the multi-faith Indian society.

Fortune favors the humble Arrogant. Charismatic. Narcissistic If you were to name traits that define strong leaders, these are some of the words that likely spring to mind. Conventional thinking would have us believe that it's those filled with hubris and free of self-doubt that make the best leaders. The evidence, however, tells quite a different story. In *Humbitious*, professional speaker, executive coach and distinguished Trinity University professor Amer Kaissi shatters the common myths about leadership being an ego-driven game. Drawing on extensive research, personal stories, and fascinating historical examples of leadership done right (and wrong), Kaissi reveals why the most effective, high-performing leaders aren't those with the biggest egos, but who possess humility, coupled with ambition and drive. Tracing triumphs (and missteps) of leaders from Napoleon Bonaparte to New Zealand Prime Minister Jacinda Ardern, Apple co-founder Steve Jobs to disgraced Theranos founder Elizabeth Holmes, soccer star Alex Morgan to Costco CEO Jim Sinegal, and others, Kaissi illuminates what true humility is—and what it isn't—and how to cultivate it within yourself and with others. As you gain insight into this critical leadership trait, you'll come to understand that humility requires ambition, courage, and fierce determination. Humility, you'll learn, isn't about false modesty; it's about being honest with yourself, and others, about your abilities and potential, so you can make a realistic plan for improvement. The unequivocal truth is that the successful narcissists that you either know or are working for right now are the exception to the rule. The highest performers are those who adopt and integrate humility into their relationships with others, with their organizations, and with themselves. Because fortune favors not simply the bold—but the humbitious. *Anagram Solver* SAGE Publications

Have you ever heard or read about a world record in education in the most adverse environment of the prison? Probably the answer would be 'No'. I must admit that I was fortunate to accomplish such an achievement in the prison and outside the prison. I am very curious to share with you and reveal to you all the aspects and secrets of my achievement that led to the world record in education in prison. 'Adversity causes some men to break, others to break records' a maxim by famous maxim writer 'William Arthur Ward' which has been proved appropriate by my achievement. Because I accomplished this achievement in the most adverse and indifferent prison environment. The goal was very tough and difficult because education and prison are very contradictory and conflicting in nature. Generally, studying in a prison environment is a very difficult task. It's like swimming in the opposite direction of the flow. Have I also revealed what kind of environment is there in prison? From the outside, only projections and guesses can be made about it. Most prisoners in prison suffer from negative factors such as anxiety, frustration, worry, fear, depression, despair, anger, feelings of retaliation, etc. Sometimes they may lose their mental stability and mental balance. Incarceration makes life difficult for prisoners inside the prison and outside the prison after their release. In such a prison's negative environment, it is very difficult to form a circle of mental peace, mental balance, and a positive attitude for noble and sacred activities like education which needs a special role of the sound mind. At the age of fifty, I began to study again in life in an adverse and negative environment of prison. Even though both my place of study (prison) and my age (50+) did not match with the activities of study, I completed 31 educational courses in this adverse environment of the prison, At the same time, performing the duty of managing study centers located inside the prison premises and set a world record in education. This book has been written with my sublime desire to share my immense pleasure and contentment with my unique, unparalleled achievement and how I accomplished it. After being released from prison, I continued my study while doing a full-time job at Dr. Babasaheb Ambedkar Open University and completed 23 more educational courses taking the tally of my educational courses to 54. I completed them with good grades and in just 12 years. Being a prisoner is destiny; but establishing a world record as a prisoner in education in prison is a testament to the ability to shape one's personality with

strong morale, self-confidence, and inner strength. This book is based on my prison experience or my prison journey and in my prison experience, education was at the center. I chose the medium of this book to convey my message to my readers revealing how I accomplished this gigantic task. Hopefully, this life story will prove to be inspiring to you and will encourage you with great vigor and passion to achieve your unique, unimaginable achievements and to conquer the highest peaks in life. With best wishes. "Prison is a laboratory of turning difficulties and adversities into success." – Bhanu Patel

The Rough Guide to India Regional Language Television in India

Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. Twelve Years a Slave by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

Arohan Oxford University Press

This volume, the first in a three-book series titled *Communication Processes*, is devoted to understanding the politics in, and of, communication. It explores both the ground on which processes of communication unfold and the political configurations implied in communication processes. This two-pronged approach questions the preoccupation in Indian scholarship with the `deployment` of communication technology, and the `impact` of mass media, and suggests a repositioning of `communication` as an interdisciplinary domain of enquiry. Like in the ensuing volumes, the editors of this book juxtapose a pluralist universe of conceptual articulations, theoretical constructs and empirical validations. In addressing these questions, the contributors steer through, on the one hand, the modernization-inspired tradition of communication research in India—predominated by impact and reception studies—and, on the other, global trends that shaped the glut of fashionable writings—coincidental with and spurred by transnational television and the internet—during the 1990s. *Role of Media in Nation Building* Routledge
Memoir of one of India's most prominent businessmen The pioneer who gate-crashed his way to the top Subhash Chandra, the promoter of Essel/ Zee

Group, is an unlikely mogul. Hailing from a small town in Haryana, where his family ran grain mills, Chandra has been a perennial outsider, repeatedly aiming high and breaking into businesses where he was considered an interloper. Starting work as a teen to pay off family debts, Chandra had to rely on bluff, gumption and sheer hard toil to turn things around. A little bit of luck and political patronage saw him make a fortune in rice exports to the erstwhile USSR. Always a risk-taker, Chandra then had the vision of getting into broadcasting early, even as established media players failed to see its potential. His Zee TV, India's first private Indian TV channel, changed the rules of the game and tickled the fancy of a public starved of entertainment. Several gutsy initiatives followed, though not all of them were successful. Chandra's attempts to launch satellite telephony and a cricket league came a cropper. But the man continues to reinvent himself; he is now also focusing on infrastructure and smart cities. This is an unusually candid memoir of a truly desi self-made businessman who came to Delhi at age twenty with seventeen rupees in his pocket. Today, he has a net worth of \$6.3 billion and annual group revenues of about \$3 billion.

In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technologies across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century. The surveys reported cover different DE contexts, methodologies, and levels of generalisability, and add to the existing scholarship on the subject by providing previously unavailable, firm evidence about DE's prospects in Asia. The contributors give important recommendations that can be translated into practical and political actions to help solve critical socio-economic problems of Asia as well as other parts of the world. *The Republic of India* Readme Publishing

The educational use of television, film, and related media has increased significantly in recent years, but our fundamental understanding of how media communicate information and which instructional purposes they best serve has grown very little. In this book, the author advances an empirically based theory relating media's most basic mode of presentation -- their symbol systems -- to common thought processes and to learning. Drawing on research in semiotics, cognition and cognitive development, psycholinguistics, and mass communication, the author offers a number of propositions concerning the particular kinds of mental processes required by, and the specific mental skills enhanced by, different symbol systems. He then describes a series of controlled experiments and field and cross-cultural studies designed to test these propositions. Based primarily on the symbol system elements of television and film, these studies illustrate under what circumstances and with what types of learners certain kinds of learning and mental skill development occur. These findings are incorporated into a general scheme of reciprocal interactions among symbol systems, learners' cognitions, and their mental activities; and the implications of these relationships for the design and use of instructional materials are explored.

Encyclopedia of India Taylor & Francis

The concept of nation building is a multi-dimensional process, addressing various components simultaneously. It takes into account the various historical and geographical perspectives of the country in question, noting the peculiarities and diversity of its cultural ethos, including its social, economic and political structures. This volume addresses these inter-linked aspects, and the innovative development of these structures and institutions. However, such changes and development must be directed to create a more culturally homogenous and productive society, so that basic human needs like food, shelter, healthcare and education are fulfilled at the optimum level. All-round development and growth for the nation can be achieved only with a robust economy and political stability. As such, the process of nation building and development is a multifaceted phenomenon. In the context of India, this

process is associated with the central values embodied in the preamble of the country's constitution, which advocates for the establishment of secular, socialist and democratic society based on well-defined fundamental rights. This anthology reflects these academic spirits and vistas.

Tier II and III Cities in India Disha Publications

The Report emphasizes the need to give children the best possible start in life, to ensure that every child completes a basic education, and to involve children - adolescents in particular - in the decisions that affect their lives.

A Penguin Pillowcase Springer Nature

This book of 'directions' focuses on cyber

security research, education and training in India, and work in this domain within the Indian Institute of Technology Kanpur. IIT Kanpur's Computer Science and Engineering Department established an 'Interdisciplinary Center for Cyber Security and Cyber Defense of Critical Infrastructures (C3I Center)' in 2016 with funding from the Science and Engineering Research Board (SERB), and other funding agencies. The work at the center focuses on smart grid security, manufacturing and other industrial control system security; network, web and data security; cryptography, and penetration techniques. The founders are involved with various Indian government agencies including the

Reserve Bank of India, National Critical Information Infrastructure Protection Center, UIDAI, CCTNS under home ministry, Ministry of IT and Electronics, and Department of Science & Technology. The center also testifies to the parliamentary standing committee on cyber security, and has been working with the National Cyber Security Coordinator's office in India. Providing glimpses of the work done at IIT Kanpur, and including perspectives from other Indian institutes where work on cyber security is starting to take shape, the book is a valuable resource for researchers and professionals, as well as educationists and policymakers.
